

Name: Kavitha M (Sr. Full Stack Java Developer)

kmuppa511@gmail.com

+1- 678-994-6067

Professional Summary

- Over the course of 8 **years** of professional IT experience in Analysis, Design, Development and Deployment of the scalable, reliable, and efficient enterprise applications using **UI, Java SE/EE/J2EE technologies**.
- Experience in developing the Projects by following **Agile** and **TDD** Methodologies.
- Experience in developing and implementing backend architecture (**MVC**, Service, and Data Access layers) using **Java 8, Spring Framework**, and **Spring Boot**.
- Experience in developing **SOAP** Web Services and **Spring REST** web services using various modules of Spring - **Spring Boot, Spring-MVC, AOP, DI, JMS, DAO, Transactions, Web Services, Test and ORM**.
- Experience in implementing persistence **DAO** layer using **Spring JDBC, Spring Data JPA** and **Hibernate**.
- Experience in Securing the API using **OAuth2** and **JWT** to make sure only approved users could get in.
- Experience in Secure **RESTful APIs** by implementing a token-based authentication mechanism using **Spring Security** with **OAuth2** and **JWT**, ensuring only authorized applications and users could access data.
- Experience in creating clear API documentation with **Swagger/OpenAPI** so others could use it easily.
- Experience in deploying the applications in the **Kubernetes cluster** environment.
- Experience in deploying the applications to **Azure and AWS Cloud** environments.
- Expertise in UI development using **Angular, TypeScript, JavaScript, jQuery, HTML/HTML5, CSS3, Bootstrap** and **SASS/LESS**.
- Experience server-side rendered web pages for an internal admin dashboard using **Thymeleaf** and **Spring Boot**, enabling dynamic content display without a complex **frontend framework**.
- Expertise in creating reusable **Components**, Services with Observables, Interceptors, Filters and writing Unit tests using **TypeScript** and **Angular**.
- Expertise in using **TypeScript Angular CLI** (Command line Interface).
- Experience in implementing responsive web design with Cross Browser compatibility using **CSS3, Bootstrap, LESS, SASS, Angular** material design.
- Experience in building fast and modern user interfaces with **Vue.js** and bundling/optimizing frontend code for faster loading using **Webpack**
- Experience in processing the event based real time data with **Kafka**.
- Experience with build tools **Maven, Gradle** and **CI/CD** tools **GitHub Actions** and **Jenkins**.
- Experience in monitoring and performance tuning of the applications with **Dynatrace**.
- Expertise in **UI Automation** with **Cucumber, Selenium** and **API automation** with **Rest API Assured**.
- Experience in writing **Unit** and **Integration** tests with **JUnit, Mockito, Spring**.
- Solid Experience on Relational databases - **Oracle, DB2, PostgreSQL, MySQL, NoSQL Database** and **MongoDB**.
- Experience in ensuring application quality by writing and executing automated tests with **TestNG**, and working with **MySQL databases** for data storage, retrieval, and automated updates with **Flyway/Liquibase**.
- Experience in enhancing application performance by **caching data in Redis** and **managing web traffic with NGINX**. You also ensure robust inter-service communication using **RabbitMQ**.
- Expertise in **Collections, Threading, Generics, Enumerations, Annotations, and Apache Utility Classes** like **StringUtils, CollectionUtils** etc.

- Experience in managing tasks and sprints (**JIRA, Trello**), and handling **code versioning (Bitbucket)** and documentation (**Confluence**).
- Experience in using Source Configuration Management Tool **Git**.
- Experience in writing custom sonar rules and fixing **Sonar** violations.
- Experience in deploying the applications in **Tomcat Server**.
- Good Working knowledge of various design patterns such as MVC, Singleton, Front Controller, Dao, Service Locator and Factory.
- Experience in developing using **VS Code/IntelliJ** and converting **Figma designs into code**.
- Quick to learn new technologies and ability to work in tight schedules on different applications concurrently.

Education Summary

- Master's in Computer Science from Kennesaw State University in 2022, USA.
- Bachelor's in Computer Science from JNTUK in 2016, Kakinada.

Certification

- Oracle Certified Professional: Java SE 11 Developer (**OCPJP**), 2022
- **AWS Certified Solutions Architect**, 2023
- Microsoft Certified **AZURE** Data Fundamentals, 2023
- Generative AI with Google Cloud, 2025

Project Profile

Mission Square Retirements, Washington, DC

May 2024 – Till date

Role: Sr. Full Stack Java Developer

- Involved in the development and modernization of the **EZlink legacy system**, focusing on supporting Consultant Access and Account Access Hub projects.
- Developed reusable **RESTful APIs**, enabling seamless interaction with the updated system architecture.
- Designed and implemented backend architecture (MVC, Service, and Data Access layers) using **Java 8, Spring Framework, and Spring Boot**.
- Developed and deployed secure **Web-based REST services**, enabling remote calls to Controller endpoints with **Spring Security** for access control.
- Developed **Spring Batch API** to automate scheduled tasks, optimizing system efficiency and reducing manual workload.
- Designed and implemented **secure Webhooks** to trigger real-time **email notifications** with new user details upon account creation.
- Developed and integrated frontend and backend components using **React.js, TypeScript, HTML5, CSS3, and Spring Boot**.
- Built reusable **React components** and managed state using **React Hooks and Context API**.
- Implemented **RESTful API interactions** using **Axios and Fetch**, ensuring seamless communication with the backend.
- Used **React Query/Redux** for efficient data fetching and state management.
- Wrote **optimized SQL queries** and **complex stored procedures** to fetch and process large datasets efficiently.

- Worked with **Oracle DB / SQL Server**, optimizing queries for better performance and indexing.
- Wrote **unit and integration tests** using **Jest, React Testing Library, JUnit, Mockito, and Selenium** to ensure code quality.
- performed **load testing (JMeter)**, managed **logs (Logstash, Kibana)**, monitor **performance (Prometheus, Grafana)**, and handled **IT tickets (ServiceNow)**.

Environment: Java 8, J2EE, Spring, Spring Boot, Spring Batch, Scheduling, Actuator, Lombok, Log4j/SLF4J, Bean Validation, JSON, JavaScript, React, TypeScript, Microservices Architecture, Oracle DB, XML, Gradle/Ant, Git, Jenkins, npm/yarn.

American Airlines, Dallas, TX

Feb22 – Apr24

Role: Sr. Full Stack Java Developer

- Involved in the development of **Tarmac Monitor and Diversion** Tracker Applications.
- Developed Restful web services using **Java and Spring Boot**.
- Used **Java 8** features and Executor service to develop the back-end components.
- Used Executor Framework for performing the tasks in parallel.
- Used **Giga space API** to read the flight data from cache.
- Written DAO layer using **Spring JDBC** and **Spring Data JPA**.
- Developed the applications using Azure resources and deployed them to **Azure cloud**.
- Process the event based big data with **Apache Kafka**.
- Developed the UI and backend components with **Typescript, HTML/HTML5, CSS3, Angular and Spring**.
- Created Components and services in **Angular**.
- Used **HTTP Client**, Observables and Interceptors to perform the **API** calls.
- Used Subject from **RxJs**, **@Input**, **@Output** and Event Emitter for communication between components.
- Used **Angular** Reactive forms to build **UI** forms.
- Written re-usable and manageable UI code with **TypeScript** and **Angular**.
- Used **Jasmine** and **Karma** to write unit tests.
- Written Unit, Integration and ATDD tests using **JUnit, Mockito, SpringTest, Cucumber and Selenium frameworks**.
- Created **CI/CD** jobs with **GitHub** Actions and Jenkins.
- Involved in deploying the application components (war, Streams jobs, Space PUS) to all environments – **DEV, TEST, STAGE and PROD**.

Environment: Java8, Spring, Angular13, SQL Server, Git, Jenkins, Selenium, Azure Cloud..

Bank of America, Dallas, TX

Jan 20 – Dec 21

Role: Full Stack Java Developer

- Involved in the development of **Bill.com** project.
- Developed the UI components with **Angular, TypeScript, Html** and **CSS**.
- Developed Angular components, Services, and Interceptors.
- Developed Angular reactive forms and written custom validations.
- Established the communication between components using **@Input** and **@Output**
- Developed the services in the UI that gets data using **API calls** and processes the data.

- Used Interceptors to pass the header info and handle the errors.
- Developed **DAO** layer using **Spring JDBC** and **Spring Data JPA**.
- Used **Spring DI** for wiring the **beans**.
- Developed the **SOAP API** and **Restful** web services using Java and Spring.
- Used Spring Rest Template to get the data from other web services.
- Extensively used core java concepts Collections, Exception Handling, Streams, and Multi-Threading.
- Involved in deploying the applications to **AWS** cloud environment.
- Used Postman to test the web services and Automated web services testing with Rest Assured.
- Used Executor Services to process the data concurrently.
- Written Unit and Automation tests with **Java, Junit, Cucumber, Selenium** and Rest Assured.
- Written the custom rewrite rules in **Apache http file**.

Environment: Java, Spring, Apache Tomcat Web server, Tomcat, SQL Developer, Git, Maven, MongoDB, Splunk, Oracle, PostgreSQL, Nodejs,.

FedEx, Memphis, TN

Mar 18 – Dec 19

Role: Java Developer

- Involved in the development of various modules in **Card online Servicing** application.
- Involved in requirements gathering and preparing software requirement specifications.
- Implemented **MVC** design pattern using **Spring Framework**.
- Developed **RESTful** Web Services using **REST controllers of spring framework**.
- Used Spring Framework and created the **Dependency injection** for the Action classes using Application Context.
- Developed applications using **Spring MVC** on the presentation layer, the business layer is built using spring and the persistent layer uses **Hibernate**.
- Implemented the **DAO** layer using Hibernate.
- XML was used to transfer the data between different layers.
- Implemented logging using **log4j**.
- Used **JUnit** framework for Unit testing of application.

Environment: Java, Spring, Tomcat, SQL Developer, Git, Maven, Splunk, Oracle.

HP, Bangalore, India

Mar 16 – Feb 18

Role: Java Developer

- Involved in development of various modules in **Pangea app**- Hotel Search, Availability, Booking, Guest Enrol and Guest Update.
- Developed the presentation layer using **HTML, CSS, TypeScript** and **Angular**.
- Developed Service layer using **Spring** and persistence layer using **Hibernate**.
- Worked on enhancements and defects.
- Extensively worked on various features of Hibernate such as Associations, Caching, Lazy loading and HQL
- Extensively used Dependency Injection and **AOP** features of **Spring** Framework.
- Extensively worked on Web Services to send and receive the data from **NGT**.
- Written complex **SQL** queries to perform efficient data retrieval operations.

- Written Unit, Integration Test Cases using **JUnit** and **Mockito** technologies.
- Involved in complete software development life cycle (**SDLC**)
- Developed the custom build scripts using ant tool.

Environment: Java, Spring, Hibernate, Tomcat, Oracle, SVN, Ant Build, Log4J, JUnit, Mockito, Waterfall
