EDUCATION

Kennesaw State University, USA

Aug 2023 – Dec 2024

Master's in Computer Science and Engineering

CGPA – 4.0/4.0

Bapatla Engineering College, India

Jun 2016 – May 2020

Bachelor's in Computer Science and Engineering (CSE)

CGPA – 3.61/4.0

WORK EXPERIENCE

Graduate Research Assistant - Kennesaw State University

Jan 2024 – Dec 2024

- Conducted research on the impact of water parameters (temperature, dissolved oxygen, pH, turbidity) on E. Coli presence, integrating findings into an AI-based mobile app for accurate water safety monitoring.
- Developed a cloud-based mobile application for Water Safety authorities, utilizing machine learning algorithms to predict E. Coli levels in surface waters.
- Developed a website for Cobb County water department based on the given requirements.
- Our research work is approved for publication in IMCOM 2025.

Java Full Stack Developer – DBS Tech India Private Limited

Jun 2022 – Jul 2023

- Successfully managed multiple projects simultaneously, ensuring high-quality outcomes.
- Led end-to-end development of projects, spanning **front-end, backend, and database architecture**, maintaining security standards (**SAST, DAST, Sonar**) for robust cybersecurity and software integrity.
- Developed FCD, an intelligent system that autonomously detects and alerts potential illegal customer activities, improving security and ensuring compliance with TSU-defined regulations.
- Contributed to COSMIC, a collaborative information exchange system involving six banks to proactively identify and address early-stage terror risks, illegal transactions, and to identify shell companies. This is an initiative from **MAS** (Monetary Authority of Singapore).
- **Specialized in AML projects**, streamlining operations for TSU users through automated alerts and centralizing data to reduce costs and money laundering frauds.
- Led DevSecOps initiatives, including managing team-wide deployments in the cloud and central repository maintenance, ensuring streamlined CI/CD pipelines and collaboration.
- Worked on the migration from Nexus to JFrog Artifactory, independently developing Groovy scripts to automate and optimize the process.
- Collaborated within Agile methodologies to ensure efficient project execution.

Assistant System Engineer – Application Development, Tata Consultancy Services

Jan 2021 – Jun 2022

- Designed and developed a crisis communication tool MassCOM, enabling communication through SMS, voice calls, IVR, email, push notifications, and WhatsApp for enhanced crisis response.
- Worked on backend and database requirements for applications, ensuring seamless functionality aligned with project objectives.
- Expertly managed security with SAST, DAST, and manual testing, maintaining coding standards for system security.
- Ensured server security through proactive, timely patch management, maintaining a vulnerability-free environment.

TECHNICAL SKILLS

Programming Languages: Java, C, Python.

Frameworks: Spring MVC, Spring boot, Spring Security, Hibernate, Angular JS

DBMS: PostgreSQL, MySQL, Graph DB

Experience In: Micro Services and API development, Maven Dependencies, PostgreSQL, Janus Graph, Kafka, Artifactory Management, Grafana, Graylog

Development Tools: Eclipse, IntelliJ, NetBeans, Visual Studio Code, Postman

Devops Tools: GIT, Jenkins, Sonarqube

Security Tools: OWASP ZAP, Burp Suite, HP Fortify, HP WebInspect

Operating Systems: Windows and Linux

Project Development Methodologies: Agile

ACHIEVEMENTS

- Received '**Go That Extra Mile**' award for going Above & Beyond my roles and responsibilities to deliver FCD and COSMIC projects.
- Earned '**Best Team**' recognition for achieving an impressive 69% cost savings through the development and implementation of highly efficient projects in DBS.
- Received '**Star of the Month**' award for key contributions to TCS MassCOM.
- Runner up of 24Hrs. hackathon on "**Building chatbots using IBM Watson**" organized at Bapatla Engineering College in collaboration with Smart Bridge.
