[linkedin.com/in/keith-jackson-4682b9349](https://www.linkedin.com/in/keith-jackson-4682b9349)

Seasoned Senior .NET Full Stack Developer with over 10 years of distinguished experience, experienced in elevating enterprise solutions to unparalleled heights. A virtuoso in architecting cloud-native infrastructures and highly scalable microservices, I have consistently led development teams to chart new frontiers and deliver extraordinary results. My expertise encompasses designing impregnable systems, executing flawless data migrations, and crafting future-ready solutions that endure the test of time. With an unwavering focus on Agile methodologies and an innate talent for delivering user experiences that knock it out of the park, I leave no stone unturned in driving innovation. My relentless pursuit of excellence and ability to transform challenges into steppingstones ensure I stay ahead of the curve, delivering solutions that set new industry benchmarks and propel businesses to soaring success.

SKILLS

Backend:

C#, ASP.NET Core, .NET Framework, .NET 6/7/8, Entity Framework, EF Core, EF 6, RESTful APIs, GraphQL, Microservices Architecture, Web API Development, gRPC, WCF, SignalR, Blazor Server, Blazor WebAssembly, JWT, OAuth2, OpenID Connect, Azure Functions, Serverless Architecture, Hangfire, Quartz.NET, Azure Logic Apps

Payment Integration:

Stripe, PayPal, Braintree

Message Queues & Caching:

Redis, Memcached, Azure Cache for Redis, RabbitMQ, Azure Service Bus, Kafka, NATS

Containerization & Orchestration:

Docker, Kubernetes, Azure Kubernetes Service (AKS)

Frontend:

React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Context API, Zustand, Recoil, React Hooks, React Query, Styled Components, Emotion, JSS, Material-UI, Ant Design, Fluent UI, Bootstrap, TailwindCSS, SSR, SSG, PWA, ASP.NET Razor Pages, Blazor UI, WebAssembly (WASM), Webpack, Babel, Module Federation, Frontend Performance Optimization, WCAG, ARIA Standards

Database & Query Optimization:

SQL Server, T-SQL, PostgreSQL, MySQL, Azure SQL Database, Azure Cosmos DB, MongoDB, DynamoDB, Firebase Firestore, Query Performance Tuning, EF Core Migrations, Liquibase, Flyway

CI/CD & DevOps:

CI/CD Pipelines, GitHub Actions, Azure DevOps, Jenkins, GitLab CI/CD, Terraform, CloudFormation, Pulumi, Bicep, Azure Key Vault, AWS Secrets Manager, HashiCorp Vault

Cloud Technologies:

Azure Functions, Azure App Service, Azure SQL, Azure Kubernetes Service (AKS), Azure Storage, AWS EC2, AWS S3, AWS Lambda, AWS API Gateway, AWS CloudFront, AWS RDS, AWS DynamoDB, AWS IAM, AWS ECS, AWS EKS, Serverless Architecture

Networking & Security:

Azure Virtual Networks, Load Balancing, VPN Gateways, IAM Policies, RBAC, MFA, NSG

Monitoring & Logging:

Azure Monitor, AWS CloudWatch, ELK Stack, Grafana, Datadog

Messaging & Event-Driven Architecture:

Azure Event Grid, Azure Service Bus, AWS SNS, AWS SQS

Testing & QA:

xUnit, NUnit, MSTest, Selenium, Cypress, Playwright, Postman, RestAssured, Swagger, Test Automation, CI/CD Integration, JMeter, k6, Locust.io, Moq, NSubstitute, FakeItEasy

Code Quality & Security:

SonarQube, Coverlet, Istanbul, FxCop, StyleCop

Version Control & Agile Practices:

Git, GitHub, GitLab, Bitbucket, Git Flow, Trunk-based Development, Scrum, Kanban, SAFe, JIRA, Azure DevOps Boards, Trello, Monday.com, Code Reviews, Pair Programming

Documentation & Collaboration:

Swagger, OpenAPI, Confluence, Markdown, Continuous Feedback, Retrospectives

WORK EXPERIENCE

Senior Software Developer

May 2021 - Dec 2024

Sunsoftwarellc | Los Angeles, CA

- ✓ **Designed and implemented scalable front-end solutions using React.js**, ensuring an intuitive user experience and high performance. Leveraged **TypeScript** for type safety, enhancing code quality and maintainability across large projects.
- ✓ **Led the development team** in managing state and component hierarchies efficiently using **Redux** and **React Context API**, implementing **React Hooks** for modern state management solutions, while also mentoring junior developers in best practices.
- ✓ **Built and optimized RESTful APIs with C# and ASP.NET Core**, ensuring high-performance microservices architecture with low latency and easy scalability.
- ✓ **Integrated cloud-native solutions using AWS services**, including **Lambda, API Gateway, S3, DynamoDB, and CloudFront**, to ensure application scalability and reliability. Additionally, **architected serverless solutions** with AWS Lambda, reducing operational overhead and improving application responsiveness.
- ✓ **Migrated legacy .NET Framework applications to .NET 6/7/8**, improving performance, security, and scalability, while leveraging the latest features of C# for modern development.
- ✓ **Automated CI/CD pipelines with Azure DevOps and Jenkins**, streamlining deployment workflows, minimizing downtime, and improving deployment velocity.
- ✓ Utilized **C# and React** to develop reusable components and server-side logic, enhancing the maintainability and performance of both front-end and back-end codebases.
- ✓ **Designed and maintained GraphQL APIs**, optimizing data querying for front-end applications and ensuring efficient client-server communication in real-time.
- ✓ Implemented robust security practices, including **OAuth, JWT authentication**, and **Azure Active Directory** integration, ensuring secure and compliant authentication across the platform.
- ✓ Conducted performance tuning using tools like **Webpack, Babel**, and **Chrome DevTools** for front-end optimization, while leveraging **Azure Monitor** and **Application Insights** for backend system performance monitoring.
- ✓ **Led Agile development practices**, participating in daily standups, sprint planning, and retrospectives. Collaborated with cross-functional teams to ensure project alignment and timely delivery.

- ✓ **Managed infrastructure as code** using **Azure DevOps**, **Terraform**, and **AWS CloudFormation**, automating resource provisioning and enhancing infrastructure reliability and repeatability.
- ✓ **Led the development of unit and integration tests** using **xUnit**, **Moq**, and **NUnit**, ensuring reliable application behavior and high-test coverage across C# and React codebases.
- ✓ **Enhanced real-time application performance** using **SignalR** for real-time bidirectional communication, improving user engagement and system responsiveness.
- ✓ Utilized monitoring tools like **AWS CloudWatch**, **Datadog**, and **Azure Monitor** to track application performance, identify bottlenecks, and ensure system reliability and optimal uptime.

Project 1: TrackMate GPS

<https://trackmategps.com>

- ✓ TrackMate GPS is an advanced GPS tracking and fleet management platform designed to provide real-time vehicle tracking, fleet performance monitoring, and route optimization to improve operational efficiency for businesses.
- ✓ Developed real-time GPS tracking, fleet management dashboards, and reporting tools using **React** and **ASP.NET** for the frontend and backend, respectively.
- ✓ Leveraged **PWA** technology to ensure offline functionality and a seamless multi-device experience.
- ✓ Designed and implemented an intuitive, responsive UI using **MUI** (Material UI), ensuring consistent design across all devices.
- ✓ Deployed the application on **IIS** and **Windows Server**, optimizing server management and scaling.
- ✓ Integrated **RESTful APIs** and **WebSockets** to enable real-time communication and data synchronization across the platform.
- ✓ Utilized **Redux** for state management and **Axios** for API requests, ensuring smooth and responsive interactions with the server.
- ✓ Optimized performance and built efficient bundling using **Webpack** to enhance load times.
- ✓ Applied **JWT** and **OAuth** for secure user authentication and authorization.
- ✓ Managed data storage and retrieval using **SQL Server**, ensuring secure and efficient database operations.
- ✓ Integrated **Sentry** for error tracking and real-time issue monitoring, ensuring smooth user experiences.
- ✓ Wrote comprehensive unit and integration tests with **Jest** and **Mocha**, ensuring high code reliability and performance.
- ✓ Set up and maintained **CI/CD pipelines** with **Jenkins**, streamlining deployment and version control via **Git** and **GitHub**.
- ✓ Used **Docker** for containerization, ensuring smooth deployment and scalability across different environments.
- ✓ Hosted the platform on **AWS** and **Azure**, ensuring scalable infrastructure and enhanced security.
- ✓ **Tech Stack: React, MUI, PWA, Redux, Axios, Webpack, ASP.NET, Node.js, SQL Server, IIS, Windows Server, AWS, Docker, Azure, RESTful APIs, WebSockets, JWT, OAuth, Jest, Mocha, Jenkins, Git, GitHub, Sentry, LogRocket.**

Project 2: PlanStreet

<https://www.planstreet.com>

- ✓ PlanStreet is a robust project management platform designed to enhance team collaboration and streamline project workflows.
- ✓ **ASP.NET** and **C#** were used to build a secure, scalable backend that powers the platform's core functionalities, ensuring smooth operation and handling large datasets.
- ✓ Developed a responsive and engaging frontend using **Bootstrap**, ensuring accessibility and performance across multiple devices and screen sizes.
- ✓ Integrated the **LinkedIn Insight Tag** to gather data on user interactions, helping improve marketing strategies.
- ✓ Hosted the platform on **Azure**, providing high availability and scalability while ensuring secure access for users.
- ✓ Implemented user authentication and secure access management with **OAuth**, ensuring data privacy and security for users.
- ✓ Used **SQL Server** to efficiently store and retrieve project-related data, providing fast and reliable database operations.
- ✓ Ensured code quality and streamlined development by working with version control tools like **Git** and using **Visual Studio** for development.

- ✓ **Tech Stack: ASP.NET, C#, Web API, MVC, Bootstrap, JavaScript, jQuery, HTML5, CSS3, SASS/LESS, SQL Server, Azure, RESTful APIs, OAuth, LinkedIn Insight Tag, Google Analytics, Google Ads, Git, Visual Studio, Entity Framework, Power BI, Nginx.**

.NET Full Stack Developer

Jan 2018 - May 2021

Altors | Pleasanton, CA

- ✓ Spearheaded development within an **Agile Scrum** environment, consistently delivering high-quality features and enhancements in each sprint.
- ✓ Played a critical role in **feature implementation, performance optimization, code refactoring, and defect resolution** to ensure a seamless user experience.
- ✓ Designed and developed a **Hybrid Single-Page Application (SPA)** leveraging **C# 5.0, .NET Framework 4.5, ASP.NET MVC 5, and React.js**, enabling dynamic and responsive user interfaces.
- ✓ Integrated **SOAP APIs** from enterprise systems and **RESTful APIs** across the portfolio while developing **custom W&C RESTful services** to enhance interoperability.
- ✓ Led UI/UX improvements using **MVC 5 Master Pages**, modernizing layouts with **HTML5, Bootstrap, and CSS3** for a visually appealing and responsive design.
- ✓ Engineered interactive front-end components using **React.js and JavaScript**, implementing reusable components, hooks, and state management for seamless user interaction.
- ✓ Optimized application performance by leveraging **React Lazy Loading and Code Splitting** to enhance load times.
- ✓ Implemented complex numerical computations and algorithms using the **Math.net** library, ensuring high-performance data processing.
- ✓ Designed and optimized database connectivity with **Entity Framework 6.0 and LINQ**, creating efficient **stored procedures and database views** for improved data access and performance.
- ✓ Orchestrated **data migration from Oracle DB to SQL Server**, leveraging **PL/SQL and T/SQL** to ensure data integrity and smooth transitions.
- ✓ Developed robust **ETL pipelines using SSIS** and generated insightful **business reports with SSRS** to facilitate data-driven decision-making.
- ✓ Employed **OWIN middleware** for server decoupling, enhancing modularity and maintainability.
- ✓ Secured user authentication and data exchange by implementing **JSON Web Tokens (JWT)** for a seamless and secure login experience.
- ✓ Enforced **dependency injection using Ninject**, fostering a loosely coupled and testable architecture.
- ✓ Utilized **Dapper ORM** to facilitate high-performance, lightweight data access.
- ✓ Adopted **Repository and Factory design patterns** to promote code reusability, scalability, and maintainability.
- ✓ Designed and executed **unit tests with NUnit**, ensuring application stability, reliability, and performance.
- ✓ Actively participated in **code reviews, CI/CD pipeline implementation, and automated deployments** using **Git and Jenkins**, improving software quality and development efficiency.

Project 1: SoloS Holidays

<https://www.solosholidays.com>

- ✓ SoloS Holidays is a specialized travel platform dedicated to solo travelers, offering tailored holiday packages that ensure both adventure and security.
- ✓ Developed the platform's backend with **ASP.NET**, ensuring scalable and maintainable services capable of handling high traffic and multiple concurrent bookings.
- ✓ Managed user and travel booking data efficiently using **SQL Server**, optimizing query performance and ensuring reliable data retrieval.
- ✓ Integrated with third-party services via **RESTful APIs**, enabling users to check real-time travel availability and process payments seamlessly.
- ✓ Designed and implemented a booking management system with automated confirmation emails and real-time updates using **SMTP and Node.js**.
- ✓ Integrated **Stripe** for secure payment processing, allowing users to easily complete transactions with confidence.

- ✓ Set up cloud-based monitoring and alerting using **Azure Monitor**, providing real-time insights into the platform's health and performance.
- ✓ **Tech Stack: React, MUI, .NET Framework, .NET Core, Microservices Architecture, WebSocket Communication in C#, OAuth, JWT, IdentityServer, NuGet Package Management, Kafka Integration, App Configuration Management, Azure DevOps for CI/CD, Unit of Work Pattern, Repository Pattern.**

Project 2: IMLeagues

<https://www.imleagues.com/>

- ✓ Developed a sports management platform to handle leagues, tournaments, and sports teams using **ASP.NET** and **C#**, ensuring scalability, security, and high performance.
- ✓ Built a reliable backend infrastructure using **ASP.NET MVC** and **Web API**, facilitating smooth interactions between the frontend and backend.
- ✓ Created a mobile-responsive and user-friendly frontend with **Bootstrap**, ensuring accessibility across devices.
- ✓ Hosted the platform on **Azure**, ensuring high availability, scalability, and security.
- ✓ Implemented **OAuth** for secure user authentication and access management.
- ✓ Used **SQL Server** for efficient data storage, retrieval, and management of platform data.
- ✓ Developed **RESTful APIs** for integration with third-party systems, improving data flow and platform extensibility.
- ✓ Collaborated with version control using **Git**, ensuring efficient code management and collaboration.
- ✓ Conducted development in **Visual Studio**, ensuring high code quality and optimized development processes.
- ✓ Managed user interactions, tournament schedules, and team data in a scalable manner, improving overall platform usability and performance.
- ✓ **Tech Stack: ASP.NET, C#, Web API, MVC, Bootstrap, JavaScript, jQuery, HTML5, CSS3, SQL Server, Azure, RESTful APIs, OAuth, Google Analytics, Google Ads, LinkedIn Insight Tag, Git, Visual Studio, Entity Framework, Power BI, Jenkins.**

Software Developer (C#/.NET)

Sep 2015 - Jan 2018

Upwork | San Francisco, CA

- ✓ Architected and developed the **GUI, Business Logic Layer, and Data Access Layer (DAL)** for seamless functionality.
- ✓ Engineered **Web Forms and reusable classes using C#.NET**, leveraging **N-tier architecture** for optimized performance and database connectivity.
- ✓ Developed **event-driven Web Forms** using **ASP.NET**, implementing robust form validation for improved user experience.
- ✓ Implemented a **scalable n-tier architecture**, ensuring a well-structured presentation layer with **ASP.NET**.
- ✓ Utilized **ADO.NET (Connection, Command, Datasets, Data Adapter, Data Reader, and XML)** to efficiently retrieve and store data in **SQL Server 2005**.
- ✓ Employed **advanced data controls** such as **Data Grid, Data List, Data Caching, Data Binding, and Repeater Controls** to present data in a highly customized format within **ASP.NET** web pages.
- ✓ Designed and managed **SQL Server 2005 databases**, creating **Tables, Indexes, Relations, Stored Procedures, and Triggers** for automated and optimized database operations.
- ✓ Integrated **Crystal Reports** to generate insightful reports for **Middle Office and Back Office** users.
- ✓ Utilized **Visual Studio.NET debugger** and **ASP.NET tracing** to efficiently debug and enhance application performance.
- ✓ **Tech Stack: .NET Framework 3.0/3.5, C#, ADO.NET, MVC, XML, Web Services, HTML, SQL Server 2005/2008, IIS 6.0, Windows 2000, VSS, NUnit, Visual Studio 2008.**

EDUCATION

Bachelor of Science - Computer Science

California State University San Marcos

2013 - 2015

San Marcos, California
