PROFESSIONAL SUMMARY

Full Stack Software Engineer skilled in React, JavaScript (ES6+), TypeScript, and Node.js, with experience in building scalable, high-performance web applications. Proficient in frontend optimization, backend API development, and database management, ensuring seamless user experiences and efficient system design.

PROFESSIONAL EXPERIENCE

Software Developer Intern | Flow | June 2024 – Present

- **Frontend Development:** Built a React & Next.js web app, improving user engagement by 30% and reducing page load time by 25% through code splitting and lazy loading.
- **Backend Development & APIs:** Developed Node.js & MongoDB services, optimizing query execution by 35% with indexing and efficient schema design. Designed scalable RESTful APIs, load-tested to handle 250+ concurrent requests with minimal latency.
- **Database & Data Management:** Reduced query latency by 40% through indexing and connection pooling, enabling real-time data retrieval.
- **Performance & Optimization:** Improved Lighthouse performance score by 20% by reducing render-blocking resources and optimizing assets.
- **Deployment & Hosting:** Deployed the application on Hostinger, managing domain setup, hosting, and SSL configurations for a seamless online experience.
- **Automation & CI/CD:** Automated deployments with GitHub Actions and Docker, cutting manual processing time by 60% and improving development efficiency.
- **Testing & Debugging:** Conducted unit and integration testing using Jest & Mocha, identifying and resolving critical issues early, leading to fewer post-release defects and improved system stability.
- **Agile Collaboration:** Worked in cross-functional teams, conducting code reviews and managing version control with Git & GitHub, ensuring high code quality.

Software Developer | Clover Infotech | Feb 2022–Jul 2023

- **Automated Bank Operations:** Developed React-based frontend tools and Node.js/Python scripts to streamline ICICI Bank's daily operations, increasing efficiency by 20% and reducing errors by 15%.
- **Backend & API Development:** Built and optimized RESTful APIs to connect frontend applications with internal banking systems, improving data processing efficiency.
- **Real-Time KPI Tracking:** Developed a backend service to aggregate and expose key performance metrics via RESTful APIs, improving data accuracy by 20% and system uptime by 10%.
- **Automated Data Reporting:** Developed Python and SQL pipelines to automate banking reports, reducing report generation time by 50% and enabling faster decision-making.

Software Developer Intern | Expertrons | Dec 2020- Apr 2021

- **CI/CD & Deployment Automation:** Developed automated CI/CD pipelines using GitHub Actions and Azure DevOps, improving deployment speed and software reliability by 25%.
- **Backend Optimization & Monitoring:** Built backend logging and monitoring dashboards using Grafana and Azure Monitor, enhancing error tracking, system uptime, and performance stability.
- **Infrastructure as Code (IaC) for Scalable Apps:** Designed containerized microservices with Docker and Kubernetes, ensuring efficient software deployment and resource scalability.
- **API Development & Integration:** Developed and optimized RESTful APIs to facilitate seamless communication between microservices, improving system efficiency and data flow.

PROJECTS

Rootz (Full Stack Web Application)

- Developed Rootz, a platform for plant enthusiasts, using JavaScript, Express.js, PostgreSQL, and Ruby, ensuring a secure and responsive user experience.
- Designed and integrated RESTful APIs, improving backend efficiency and boosting user satisfaction by 50% through optimized UI/UX.
- Implemented authentication and security protocols (JWT, bcrypt), enhancing user engagement and platform stability by 40%.
- Integrated server-side caching with Redis, reducing database query latency by 40%, ensuring a faster response time for users.

Mental Health Chatbot (Full Stack Application)

- Built a React-based UI to interact with a Flask chatbot API, enabling seamless real-time communication using Axios.
- Implemented sentiment analysis to process user messages and generate appropriate responses.
- Structured frontend components and optimized React-Flask integration, ensuring a smooth and maintainable system.
- Enhanced chatbot responsiveness by optimizing API request handling and implementing debouncing techniques, reducing latency and improving user experience.

TECHNICAL SKILLS

Programming & Scripting: JavaScript (ES6+), TypeScript, Python, C, C++, Ruby, HTML, CSS.

Frontend Development: React, Next.js, Redux, Context API, Tailwind CSS, Material UI

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, WebSockets, Authentication (JWT, OAuth)

Database Management: MySQL, PostgreSQL, MongoDB, SQL Server, Firebase

Cloud & DevOps: AWS (S3, Lambda, EC2), Azure, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins, Netlify)

Development Tools: Git, GitHub, Webpack, Babel, ESLint, Jest, Cypress, Postman

System Design & Architecture: Microservices, Caching Strategies, Load Balancing, Web Security

Testing Frameworks: Mocha, Chai, Jest, Cypress (for unit, integration, and end-to-end testing).

EDUCATION

Worcester Polytechnic Institute | Worcester, MA | Master of Science, Computer Science - Aug 2023 – May 2025

Thakur College of Science and Commerce | Bachelor of Science in Information Technology - Jun 2017 – Jul 2020

Thakur College of Science and Commerce | Master of Science in Information Technology - Jun 2020 – May 2022
