Profile Summary

- Results-driven **Java Full Stack Developer** over 4+ years of experience accelerating the delivery of secure, scalable, and high-performance applications across healthcare, insurance, and job-tech domains by leveraging **Java/J2EE, REST/SOAP, Spring Boot, Hibernate, Microservices, GraphQL**.
- Proficient in designing and building interactive UIs by building reusable components and responsive pages using **React (Hooks, Context API, Redux, Router), Angular (12+ with services, routing, TypeScript), HTML5, CSS, and JavaScript**, ensuring secure API integration and seamless data flow.
- Skilled in cloud-native development and deployment on **AWS, Azure, and OpenShift**, with hands-on experience in containerization (**Docker**), CI/CD automation (GitHub Actions, **Jenkins**), and infrastructure as code (**Terraform**). Strong background in micro-front end architecture, pub/sub messaging (**Kafka**), and database optimization across **PostgreSQL, Oracle, and MongoDB**.
- Applied secure coding practices with **Spring Security, OAuth2, JWT**, and proactive resiliency testing to safeguard sensitive healthcare and financial data.
- Hands-on experience with **Agile/Scrum**, Test-Driven Development (TDD), and tools like **JUnit, Jest, Mockito, React Testing Library**, achieving 85%+ unit test coverage.
- Explored emerging technologies including cloud-native AI/ML APIs such as **AWS SageMaker** for data-driven enhancements.

Experience

UnitedHealth Group

May 2024 – Present

Java Full-Stack Developer

Minnetonka, Minnesota

- Developed and maintained scalable **React.js components with Redux and Hooks** for enterprise-grade healthcare portals, ensuring optimal performance across devices.
- Maintained and expanded **AWS infrastructure (EC2, S3)** and implemented serverless architecture using API Gateway and **AWS Lambda**, ensuring secure, scalable, and cost-effective cloud operations.
- Led end-to-end feature delivery from Figma designs to production deployment, collaborating with UX teams to translate requirements into responsive UI components.
- Implemented Micro-Frontend architecture using Module Federation to enable independent team deployments and reduce integration conflicts.
- Achieved over 90% unit test coverage using **JUnit and React Testing Library**, Implemented monitoring with **AWS CloudWatch** and **SonarQube**, with familiarity in industry-standard observability tools such as **DataDog** and for error/performance tracking.
- Deployed containerized apps using **Docker** and **OpenShift**; managed infrastructure using **Terraform** and GitHub Actions for automated deployments.
- Configured **OAuth2.0**-based authentication using **Spring Security and JWT** for secure backend access; enforced **Role-Based Access Control** across UI routes.
- Configured **Kafka** to manage real-time data streams, achieving 1000+ messages per second, enabling real-time healthcare claims data processing and reducing latency.
- Leveraged AI-powered coding assistants (**GitHub Copilot, ChatGPT**) to accelerate code reviews, unit test generation, and documentation, improving team efficiency.

Cigna Healthcare

Oct 2023 – Apr 2024

Software Engineer

Hartford, Connecticut

- Developed **Spring Boot & Hibernate services** for real-time claims processing, cutting transaction latency by **30%**, deployed via **Azure App Services + Application Gateway**.
- Designed **GraphQL APIs** reducing data over-fetching by **35%**, accelerating claims workflows.
- Integrated **Azure Active Directory (AAD)** with **OAuth2.0/JWT** for enterprise-wide single sign-on.
- Optimized **Oracle & PostgreSQL queries**, improving data retrieval speed by **25%**.
- Automated CI/CD pipelines using **Jenkins & GitLab**, ensuring consistent deployments across QA and production.
- Refactored legacy monolith into **modular microservices**, enhancing maintainability and scalability, reducing release cycle time by 25% and improving scalability for claims processing.

- Practiced **TDD with JUnit/Mockito**, maintaining **85%+ test coverage** and minimizing production issues.
- Collaborated in Agile sprints, participated in code reviews, and contributed to sprint planning and retrospectives to improve team velocity

Owfs jobpe Technologies

Jan 2023 – July 2023

Java Front-end Developer

Hyderabad, India

- Developed job search and applicant tracking platform features for Owfs Jobpe, a recruitment technology firm.
- Designed and built interactive user interfaces using **React.js, Typescript, and Bootstrap** to support dynamic job search and applicant tracking features.
- Integrated front-end components with backend APIs developed in **Java, Spring Boot**, ensuring seamless data flow and responsive user experience.
- Optimized frontend performance by improving rendering and minimizing API payloads, while building reusable components with **AngularJS/TypeScript** (lazy and dynamic loading) and streamlining deployments through automated CI/CD pipelines using **Jenkins and GitLab**.
- Collaborated with UX designers to convert wireframes and Figma prototypes into fully responsive front-end modules.
- Created custom, self-contained, reusable, and testable **Angular 14** modules, controllers, directives, and services to implement key functionalities for customer account summaries.
- Experience in testing with **JUnit** Framework using **Mockito, Spring Junit Runner, JMeter**.

Mantra technologies

May 2021 to Dec 2022

Java Developer

Hyderabad, India

- Led development of 3+ Java/J2EE web-apps, mentoring interns and improving project efficiency by 30% through structured debugging, testing, and clean code practices.
- Built and integrated enterprise solutions using Core Java (OOP principles) and the Spring framework (**Spring Boot, MVC, Security, Batch, AOP**), **Hibernate**, modernizing monoliths into scalable microservices architectures.
- Designed and implemented RESTful APIs with proper versioning, HTTP standards, and mobile integration, enabling seamless data exchange and enhancing user experience across platforms.
- Worked with **MySQL** and **MongoDB** for data storage, implemented complex joins, aggregations, and schema migrations as part of feature enhancements.
- Followed Test-Driven Development (TDD) using **Jest, JUnit and Mockito**, ensuring robust code with 90%+ unit test coverage.
- Deployed applications on **Apache Tomcat** and managed build pipelines using **Maven** and **Jenkins** for continuous integration and delivery.
- Integrated third-party APIs (e.g., payment gateways, SMS, email services) and handled authentication with **Spring Security** and **OAuth2**.
- Contributed to Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives, improving team communication and velocity.

Education

University of Bridgeport

Aug 2023 – May 2025

Master of Science in Computer Science

Bridgeport, CT

Certifications

- Oracle Certified: Professional Java SE 11 Developer.
- AWS certified Cloud Practitioner: In progress

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3, C

Frontend: React.js, Angular, Bootstrap, Redux, jQuery

Backend / Java Frameworks: Spring Boot, Spring MVC, Hibernate, JPA, Kafka, RESTful APIs, GraphQL APIs

Cloud / DevOps: AWS (EC2, S3, Lambda, CloudWatch, SageMaker), Azure, Docker, Kubernetes, Jenkins, Terraform, OpenShift, DataDog

Database / Storage: PostgreSQL, MySQL, Oracle, MongoDB, Redis

Tools / Platforms: Git, GitHub, GitLab, Maven, SonarQube, VS Code, Eclipse, JIRA, Linux, Shell Scripting

Testing: JUnit, Mockito, Pytest, React Testing Library, Postman

Methodologies: Agile (Scrum), TDD, BDD, CI/CD
