SUMMARY

Software Engineer with 6+ years of experience building scalable backend systems using **Java Spring Boot, Python, and SQL** across fintech and telecom domains. Skilled in designing microservices, optimizing data pipelines, and deploying cloud-native apps with **Docker, AWS, and CI/CD automation**. Proven track record of improving system reliability, reducing latency, and solving real-time business problems through clean, production-grade code.

EXPERIENCE

GOLDMAN SACHS

Jan 2024 – Current

Software Engineer - Trade Reconciliation & Clearing System – Global Markets Technology

- Developed backend **Java Spring Boot microservices** to automate trade reconciliation across 5+ global exchanges; integrated with internal clearing engines and reduced unmatched trade volume by **31%**, easing downstream load on Ops
- Investigated and fixed data mismatches in **P&L reporting APIs** and backend **SQL Server** queries by tracing faulty joins and mapping errors; resolved a long-standing exposure overstatement of **\$42M** in FX derivatives
- Deployed services via **Docker containers** on **AWS ECS**, replacing legacy shell-based deployment; shortened release cycle from hours to **under 15 minutes**, improving environment consistency and rollback speed
- Implemented structured logging and exception tagging using **AWS CloudWatch** and custom Python scripts; enabled real-time alerts and helped reduce average trade failure resolution time by **45%** during peak clearing windows
- Modernized batch-driven flows by building **event-driven microservices** with **MyBatis, RabbitMQ, and Java**, converting T+1 settlement tasks into near-real-time processes and improving overall **system output** and compliance.

COGNIZANT TECHNOLOGY SOLUTIONS

Dec 2017 - Aug 2020

Programming Analyst - Self-care Portal & Service Usage Platform

- Built backend services in **Java (Spring Boot + Hibernate)** to fetch and display user plan details, call/data usage, and billing history; handled **1M+ daily active users** with <2s API response time
- Migrated legacy JSP/Servlet-based UI to a modular **AngularJS + REST API** architecture; improved frontend load times by **42%** and reduced session drop-offs on mobile browsers
- Integrated with downstream systems (BSS, OSS) using **SOAP-to-REST adapters**, enabling real-time sync of service status, plan changes, and user KYC across platforms
- Designed and deployed **CI/CD pipelines on Jenkins**, with automated regression test coverage and daily staging rollouts; cut production deployment failures by **over 50%**

INFINITE INFOLAB

Feb 2016 - Oct 2017

Software Engineer

- Designed a modular **data ingestion framework in Python** using **FastAPI, Pandas, and SQLAlchemy** to pull, validate, and store user metadata from third-party APIs (XML/REST); improved ingestion speed by **60%** and reduced schema mismatches during ETL
- Built a dynamic **permission engine** using **Python decorators** and **JWT-based authentication**, enabling context-aware access control for internal APIs; supported custom rules for user roles, time windows, and IP restrictions
- Deployed the entire service stack using **Docker** and orchestrated with **GitHub Actions CI/CD**, automating testing and release cycles across dev and staging environments; brought down manual deployment errors by **nearly 80%**

TECHNICAL SKILLS

- **Programming Languages & Frameworks:** Java, Python, C++, Flutter, Spring Boot, Spring MVC, Spring Security, Hibernate, J2EE (Servlets, JSP, JSTL, JMS, JDBC, JavaBeans, JSF, Multithreading), Node.js, Express.js, React.js, Next.js, Vue.js, AngularJS, HTML5, CSS3, JavaScript, TypeScript, RESTful APIs, Tailwind, jQuery, Ajax, Bootstrap, XML, JSON
- **AI/ML & Data Science:** PyTorch, TensorFlow, Keras, NLP, Deep Learning, RAG, Big Data Analytics
- **Tools, Platforms & Cloud:** Docker, Kubernetes, Jenkins, Git, Bitbucket, GitLab, SVN, IntelliJ IDEA, VS Code, Maven, Gradle, Ant, AWS, Azure
- **Databases & ORMs:** Oracle, MySQL, SQL Server, PostgreSQL, MongoDB, Prisma, SQLAlchemy
- **Methodologies & Operating Systems:** SDLC, Agile, Waterfall, Data Pipeline Development, Windows, Linux

EDUCATION

DePaul University , Chicago, IL

Master of Science in **Computer Science - Specialization in Data Science & AI**
