

Krishna Asoka Kumar Sajitha

Software Engineer

Krishna.asoka@techsmail.com | (312)-735-7662 | [linkedin.com/in/krishnaasoka](https://www.linkedin.com/in/krishnaasoka) | Chicago, IL

SUMMARY

A highly skilled software Engineer with 5+ years of experience specializing in scalable web applications. Proficient in Java, Spring Boot, Hibernate for backend development, and Angular/React for dynamic front-end solutions. Expertise in RESTful API implementation, database optimization with SQL, and cloud technologies like AWS, Docker, Kubernetes, and microservices architecture. Strong knowledge of CI/CD pipelines, version control (Git), and modern development practices like Agile, Scrum methodologies, and test-driven development.

EXPERIENCE

Software Engineer

Aug 24 - Current

DXC Technology, USA

- Developed and optimized SQL queries for MS SQL Server and DynamoDB, resulting in a 25% increase in weekly case resolution. Enhanced application performance by optimizing data retrieval, reducing latency, and improving backend processing and user experience.
- Resolved 420 technical issues by analyzing product logs, debugging Java-based RESTful APIs, and conducting thorough code reviews. Monitored AWS cloud services to ensure optimal system performance, reducing downtime and improving system reliability.
- Executed eight major upgrade deployments in Java environments, boosting system stability by 34%. These upgrades included bug fixes, architecture improvements, and performance optimizations, reducing post-deployment issues by 15%, enhancing overall system stability.
- Involved in all SDLC phases including analysis, design, implementation, and testing, following Agile (SCRUM) methodology. Collaborated with cross-functional teams to deliver high-quality software that met business objectives and user requirements effectively.
- Designed and implemented dynamic user interfaces using HTML5, CSS3, jQuery, JavaScript, AngularJS, Node.js, and XML, creating responsive grid layouts. Integrated JSP tag libraries and third-party libraries, simplifying complex functionalities and improving usability.
- Architected and implemented critical clearing systems using spring, REST, SQL, Hibernate, MyBatis, and MQ to support global markets. Deployed spring web services in AWS cloud with Docker containers, optimizing performance and improving system throughput efficiency.

Software Engineer - Programming Analyst

Dec 17 - Aug 20

Cognizant Technology Solutions, India

- Engineered Java/Spring Boot microservices to support dynamic services, integrating RESTful APIs for seamless transaction processing and data management. Developed a real-time calculation module using Spring Cloud, improving computational accuracy and efficiency.
- Collaborated with cross-functional teams to create scalable, secure APIs for data aggregation and transaction management. Ensured smooth data interaction between front-end applications (React.js) and backend services, optimizing overall system performance and reliability.
- Improved application performance by implementing memory management, multi-threading, and asynchronous processing techniques. Reduced latency and enhanced reliability during high-volume transactions, optimizing data processing and overall system responsiveness.
- Implemented end-to-end CI/CD pipelines using Jenkins and GitLab CI for seamless integration and delivery of full-stack applications. Reduced deployment time by 40% and improved code quality through automated testing and continuous integration practices.
- Managed data for various systems using SQL and NoSQL databases, optimizing complex queries and designing data models to support high-volume transaction flows. Ensured efficient data retrieval, improving system performance across multiple services and platforms.
- Prepared scripts to extract, clean, and transform data from multiple APIs (XML, RESTful, SOAP), reducing processing time by 80%. Enabled data-driven decision-making, empowering organizations to make informed choices based on reliable and actionable data.
- Developed backend infrastructure using Express, PostgreSQL, and AWS EC2 with Redis cache deployment on Jenkins CI/CD. Enhanced system stability and reduced downtime by 25%, ensuring reliable services, optimized backend performance for an improved user experience.
- Led the development of a mobile app suite, enabling users to interact with various system features. Implemented unit testing protocols with Spring Boot Test, Mockito, and JUnit, ensuring high-quality, reliable code and a seamless user experience for diverse applications.

Software Engineer

Feb 16 - Oct 17

Infinite Infolab, India

- Developed Microservices and APIs using Spring Boot, integrating Apache Kafka for messaging between APIs. Leveraged Spring Core (IOC), AOP, and JDBC to build efficient, responsive applications, ensuring high performance in high-concurrency environments.
- Created server-side components and Lambda functions using Node.js and Serverless architecture. Built single-page applications (SPAs) using Angular and TypeScript, optimizing user experience and application responsiveness across various platforms.
- Conducted unit testing, debugging, and performance profiling using tools like JUnit and Spock to ensure robust, defect-free code. Developed web pages using HTML, CSS, JavaScript, Angular, and React.js, deploying modules on AWS for scalable solutions.

ACADEMIC PROJECTS

Machine Learning/Data Science

- Developed an Anomaly Detection System utilizing Isolation Forest and Autoencoders to analyze time series data from industrial equipment, effectively identifying and predicting anomalies to prevent potential failures.
- Created a sentiment analysis using NLTK's VADER and Hugging Face Roberta Transformers for natural language processing in Python.
- Developed a Generative Adversarial Neural Network with TensorFlow and Python for generating high resolution fake human faces.

Scalable E-Commerce Microservices Architecture

- A microservices-based e-commerce platform using Spring Boot, Docker, Kubernetes, and PostgreSQL with API Gateway and Redis caching for scalability.

Real-Time Data Processing and Analytics with Apache Kafka

- A real-time streaming pipeline utilizing Apache Kafka, Spring Boot, and Elasticsearch for high-throughput data processing and analytics.

CERTIFICATIONS

- Certified Full Stack Engineer - by IIHTCOGNIZANT in July 2019
- AWS Lambda & Serverless Architecture Bootcamp – Udemy
- Machine Learning A-Z: Hands-On Python & R in Data Science - Udemy

TECHNICAL SKILL

- **Methodology** : SDLC, Agile, Waterfall
- **ML/AI** : NLP, Deep Learning, AWS, Azure Cloud Services, BigData Analytics, Data Pipeline Development, RAG
- **Programming Languages** : Java, C++, Python, Flutter
- **Frameworks** : Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Node.js, React.js, NEXT.js, Axios.js, Express.js, Angular JS, Vue.js, PyTorch, TensorFlow, Keras
- **Web Technologies** : HTML5, CSS3, Tailwind, JavaScript, RESTful APIs, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap
- **Databases/ IDEs** : Oracle, MySQL, SQL Server, PostgreSQL, Prisma, MongoDB, IntelliJ IDE, Visual Studio Code
- **J2EE Technologies** : Servlets, JSP, JDBC, JUnit, JMS, JSTL, Multi-threading, JavaBeans, JSF, JSTL, Multithreading
- **Version Control & Other Tools** : Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant, Jenkins
- **DevOps** : Docker, Kubernetes
- **Cloud Platforms** : AWS, Azure
- **Soft Skills** : Effective verbal and written communication, Problem-solving, and Troubleshooting skills
- **Operating System** : Windows, Linux

EDUCATION

DePaul University, Chicago, IL

Master of Science in **Computer Science - Specialization in Data Science & AI**

Graduate Presidential Scholarship Recipient

ACHIEVEMENTS

- Nominated participant in the **Women Hackathon (2019)**, ideating with Cognizant internal teams on the "Virtual Mom" project using Alexa for home management.
- Selected as an intern at Barba Yianni Inc. as Web Developer & Worked as a Python Teaching Assistant with "Greenwood Project".
- Awarded the Best Student Manager Award in 2023 for exemplary leadership and management skills across two university campuses.
