

KRISHNASRI MAGULURI

+1 412 294 2599 | Pittsburgh, PA

mkrishnasri04@gmail.com | <https://www.linkedin.com/in/krishnasrimaguluri/>

Summary

Software Engineer with 4+ years of experience in developing and deploying scalable software solutions using Java, Spring Boot, and the Spring Framework. Demonstrated expertise in developing RESTful and SOAP-based web services, building microservices architectures. Skilled in Hibernate (JPA) for efficient ORM and database management. Strong understanding of data structures, algorithms, and database management (SQL, MongoDB). Expertise in CI/CD pipelines (Jenkins, Kubernetes, Docker) and AWS Cloud services to streamline deployments and improve performance. Experienced in version control with Git and managing projects through all phases of the SDLC. Well-versed in Agile methodologies (Scrum) and project tracking tools like Jira.

Skills

Programming, Scripting and Styling: Java (1.8/11), Python, Html, CSS, JavaScript

Frameworks and Tools: Spring MVC, Hibernate, JDBC, Eclipse IDE, Spring Tool Suite, Apache Tomcat

Platforms: GitHub, Wildfly, Linux, Jira, Agile (Scrum)

Web Technologies: RESTful APIs, SOAP, JSON, XML, HTTP

CI/CD & DevOps: Jenkins, Kubernetes, Docker

Cloud Platforms: AWS (Lambda, S3, CloudWatch)

Databases: MySQL, MongoDB, Oracle

Testing & Code quality: JUnit, Mockito, SonarQube, Postman, SoapUI

Education

Robert Morris University – Pittsburgh, PA

Aug 2023 – Dec 2024

Master of Science (M.S) in Data Analytics

- Graduated with GPA of 3.96/4

Gokaraju Rangaraju Institute of Engineering and Technology - Hyderabad, India

Sep 2014 – May 2018

Bachelor of Technology in Computer Science

- Graduated with GPA of 3.75/4

Work Experience

Java Developer – Accenture | Hyderabad, India

Nov 2021 - Dec 2022

- Implemented and enhanced credit, policy, and fraud services within the AT&T web application.
- Developed RESTful and SOAP web services using Java, JSON, and XML to perform credit checks for customers during product order placement, improving the accuracy and speed of the order process
- Built microservices architecture with Spring Boot to develop scalable solutions. Conducted API testing with Postman and SoapUI.
- Configured Continuous Integration/Continuous Deployment (CI/CD) pipelines using Jenkins, deploying applications on Kubernetes clusters and containerized with Docker.
- Worked with SQL databases for data management and automated Hibernate ORM mappings.
- Integrated with external third-party systems via SOAP, leveraging WSDL to generate client code and using JAXB for efficient XML parsing and object mapping.
- Leveraged Apache Kafka for event-driven processing, ensuring asynchronous communication between microservices, which improved system scalability and responsiveness.
- Collaborated with teams in an Agile environment, participating in Scrum calls and sprint planning.
- Collaborated with the production team for troubleshooting and root cause analysis, ensuring system stability and reducing downtime.

Technology stack: Java 1.8, J2EE, Spring boot, Microservices, JSON, XML, REST, JUnit, Hibernate, JDBC, MySQL, RESTful and SOAP Web service, GitHub, Jira, Jenkins, Kubernetes.

Systems Engineer – Tata Consultancy Services | Hyderabad, India**Oct 2019 - Nov 2021**

- Built Java-based REST APIs to monitor trends and assess the impact of Nokia EdenNet SON actions.
- Integrated third-party services, improving data exchange efficiency via JSON-based communication.
- Utilized multithreading concepts to enhance application responsiveness and concurrency handling.
- Automated builds with Maven and managed version control using Git.
- Conducted Unit and Integration testing with JUnit and MockMvc to ensure application stability.
- Configured SonarQube for code quality analysis, improving code maintainability and detecting vulnerabilities.
- Deployed applications on Apache Tomcat and used Log4j for real-time monitoring and logging.
- Participated in daily scrum calls to update the team on delivery progress and resolve any blockers.

Technology Stack: Java 1.8, Java EE, Spring boot, Hibernate, Microservices, GitHub, Jira, MySQL, Jenkins, Junit, Log4j, Restful Web Services, Maven, Apache Tomcat.

Systems Engineer Trainee – Tata Consultancy Services | Hyderabad, India**Sep 2018 - Oct 2019**

- Contributed to an Easy Deployment Server application (EDS) by replacing DHCP-based configurations for remote CPE terminals, improving configuration efficiency.
- Implemented services using Java based on microservice architecture, effectively managing EDS objects such as system, profile, and activation code.
- Developed REST APIs for CRUD operations on EDS objects and used MongoDB for data storage.
- Deployed serverless applications using AWS Lambda, integrating with API Gateway for seamless microservices communication.
- Utilized AWS CloudWatch for logging, and leveraged AWS S3 for secure, scalable data storage and retrieval, improving system reliability and data accessibility.
- Participated in daily Scrum meetings, collaborated with cross-functional teams to track progress, identify challenges, and prioritize tasks.

Technology Stack: Core Java, Spring Boot, MongoDB, REST, Microservices, API gateway, AWS lambda, CloudWatch, Swagger.
