

SENIOR SALESFORCE DEVELOPER

Lakshmi Narayana P

Lakshminarayana.reddy9856@gmail.com | 2708831323 | <https://www.linkedin.com/in/lakshmi-narayana-p>

Professional Summary:

- Total 10+ Years of Experience in Salesforce Development and administration.
- Involved in various stages of Software Development Life Cycle (SDLC) including analysis, requirement gathering, enhancements, testing, deployment, and maintenance of standalone object-oriented enterprise applications.
- Worked on Sales Cloud, Service Cloud, Service Console and Communities for different customers.
- Worked on Standard. & Custom Objects related to Sales Cloud, Service Cloud and created Web to Lead & Email to Case.
- Performed administrative tasks like Creating User Permissions, Security Settings, Process Builder, Visual Flow, Custom Objects, Validation Rules, Approval Process, Data Loader, OWD settings, Formulas, Salesforce new release documentation, sandbox refreshes, deployments.
- Expertise in Lightning Aura Component development & LWC components.
- Experienced in Programming languages Apex, SOQL, OOPS, Visualforce & Lightning.
- Asynchronous operations like Batch Apex and Scheduled Apex for the operations with larger amount of data.
- Experienced on working with app-exchange vendor products.
- Experienced in Salesforce Communities.
- Excellent work experience in designing Custom Objects, Custom Formula Fields, Field dependencies, Relationships, Picklists, Custom Tabs, Validation rules, Workflows, Approval Processes, Page Layouts, Search Layouts to meet the client's requirement and functionality.
- Expertise in Salesforce.com Apex Coding, Apex Classes and Apex triggers, Visualforce, Force.com API, development of Test Classes, Batch Jobs, Scheduled Jobs and Service Cloud.
- Designed, implemented the Bulk & Rest API integrations for exporting & importing the data from Salesforce CRM to Down Stream Applications (Two-way Integrations).
- Experience in Salesforce SFA applications based on Apex Language and leveraging Force.com Platform.
- Expert in creating Business Requirement Document (BRD), Functional Specification Documents (FSD), gap analysis, cost benefit analysis, use case diagrams, sequence diagrams and activity diagrams using UML, Microsoft Office.
- Continuous integration tools like GITHUB, Jenkins and written scripts and deployments using Change Sets and Eclipse IDE.
- Enabled Aura Framework, by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in Lightning Applications.
- Experienced in large data deduplication project.
- Experience in working with Eclipse IDE with Force.com Plug-in environment for writing Business logic in Apex Programming Language.
- Experience in working with Force.com Standard Objects like Accounts, Contacts, Leads, Cases, Opportunities and Campaigns.
- Used different data tools like Apex Data Loader, Import Wizard, SFDC Data Export, and Mass Delete.
- Worked on various Salesforce integrations with Oracle, and other third-party systems to support Order Management module.
- Worked on complete life cycle of SFDC Implementation.

- Experience working with Salesforce.com sandbox, Service Max field service and Production Environments.
- Experience with Apttus, CPQ and built AppExchange applications with AngularJS and Bootstrap.
- Experience with GITHUB, integrating with Oracle CPQ.
- Experience in performing data migration from Legacy Systems using Data Loader.
- Experience in using Workbench tool for SOQL Queries, SOSL and REST Explorer.
- Experience in using Force.com Explorer to browse data model schema, custom objects, fields, build and test SOQL queries.
- Experience in web technologies like HTML, XML, and JavaScript, and experience working with Data Structures to manage large amounts of data efficiently.
- Automated testing of Salesforce components using UTAM, enhancing reliability and efficiency in testing Lightning Web Components (LWC) and customizations.
- Implemented JUnit-based unit tests for Apex code and integration layers, ensuring seamless functionality and adherence to Salesforce best practices.
- Experienced in salesforce Release Management using Copado, Flosom, Autorabbit and Azure DevOps.
- Hands-on expertise on Toolset in CI/CD pipeline.
- Knowledge in Marketing Cloud.
- Experienced in Heroku.
- Deep understanding of DevOps best practices
- Experienced in Salesforce CLI and SFDX.
- Experience with Agile Methodology Development (Scrum Methodology).
- Good communication and interpersonal skills.

Technical Skills:

Salesforce technologies	Apex, visual force , SOQL, SOSL, Email template, formula, Validation rules, apex trigger , workflow and approvals, App exchange, Eclipse , sales force.com IDE, Apex data loader, web services. Dashboards , Analytic Snapshots, Custom Objects, Lightning , REST and SOAP Web Services .
Salesforce Tools	Visual Studio Code, Eclipse, Force.com , Eclipse IDE plug-in , Force.com Explorer, Force.com Data Loader, Force.com Excel connector, Force.com Platform (Sandbox, and Production) QTP and Sandbox Testing , GitLab , Figma – UX .
Lightning Experience Development:	Salesforce Lightning Design System and Lightning Components, LWC, Aura Framework, JavaScript Controllers, Server-side Controllers.
Data Migration Tools	Data Analysis, Data Cleansing, Data Normalization, Data Migration , Data Loader
Databases	SQL Server ,Oracle, MS Access
Programming Languages	Java, Apex , DL/SQL , Java Script , XML , HTML , CSS .
Configuration Skills	Workflow : time-dependent actions, field updates, email alerts, Field Level and Object level security, role hierarchies , sharing models, SFDC Standard Object Configuration: Campaigns, Reports, Dashboards, Formula Fields and Cross Object Formula Fields Configuration Skills, Overall User Management, Security and Sharing Model, Translation Workbench, Documentation Templates, Salesforce Lighting .
Project Management	Agility VersionOne , Jira

Professional Experience:

` - Miami, FL

Feb 2024 – Present

Role: Sr. Salesforce Developer

Responsibilities:

- Used Agile Scrum methodology to reach our business team goal by gathering day-to-day requirements and building them using Force.com platform.
- Revised, modularized, and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Involved in analyzing the requirements, preparing the Design Documents based on the specifications, configuring, and maintaining the application.
- Worked on various standard objects including Accounts, Contacts, Cases, Reports and Dashboards.
- Managed Salesforce application user profiles, roles, permissions, generating security tokens, validation rules.
- Designed, implemented, and deployed the Custom objects, Page layouts, Custom tabs, Components to suit to the needs of the application.
- Defined Lookups and Master-Detail relationships on the objects. Created Workflow rules and defined related tasks, time-triggered tasks, email alerts and field updates to implement business logic.
- Worked with Force.com developer toolkit including Visualforce pages, Apex classes, Apex controllers and Apex triggers to develop custom business logic.
- Developed enrolment console and integrated it with Salesforce.com using the Force.com, REST based web services API.
- Worked with SOQL & SOSL queries with Governor Limitations to store and download the data from Salesforce.com platform database.
- Worked with creating Batch classes for automating the quotes through Apex class.
- Creating the Quotes through automation process by using Apttus CPQ functionalities.
- Creating Product setup, mentioning pricing rules, using Assets to create the Quotes.
- Designing product categories and grouping the products based on the requirement.
- Using Apttus Api's to create cart, Quote, repricing, Attribute creation.
- Worked on Apex classes for generating envelope Id in DocuSign for making Customers to make the deal fast.
- Documented software development methodologies in technical manuals to be used by IT personnel in future projects.
- Managed numerous successful release cycles following Agile methodology principles throughout project lifecycles.
- Monitored and maintained backup and recovery plans, best practices and versioning processes.
- Configured security settings and access controls within Salesforce orgs, safeguarding sensitive data from unauthorized access.
- Contributed to increased sales team efficiency with streamlined lead assignment rules within Salesforce CRM.
- Collaborated with cross-functional teams to gather requirements and deliver tailored Salesforce solutions.
- Reduced manual data entry for the sales team by automating processes using Apex Triggers and Classes.
- Created various custom Reports and Dashboards as per customer requirements.

- Experience with Managing complex data Experience in Integrating App Exchange Applications with Salesforce, Informatica on Demand, Mass E-Mail Management, and Application management using Force.com Plug-in & Eclipse IDE in Sandbox and Production Environments, Working with different aspects of Web Services (XML, WSDL, SOAP, REST) & web integration with SDFC.
- Provided support for Salesforce maintenance by reviewing trace logs, developing action plans, and other administrative services including periodic data cleansing, workflows, and approvals.
- Extensive experience in lead case management (Web-to-Lead, Email-to-Case).
- Designed Junction Objects and implemented various advanced fields like Pick lists, Custom Formula Fields, Field Dependencies, Validation Rules, Workflows, and Approval Processes for automated alerts, field updates, and Email generation leading to effective Web-to-Lead communication with customers and partner portals
- Developed Custom Objects, Custom Reports and configured the Analytic Snapshots to dump the data on regular basis for the sales performance and lead generation statistics
- Created users, roles, and public groups and implemented role hierarchies, Sharing Rules, and record-level permissions to provide shared access among different users
- Used the sandbox for testing and migrated code to the sandbox for testing and migrated code to the deployment instance after testing.
- Integrated automated testing within Salesforce DevOps processes using tools like Copado, improving deployment quality and reducing post-release defects.
- Executed JavaScript-based testing using JEST to validate Lightning Web Components and ensure dynamic behavior consistency.
- Collaborated with development teams to implement test-driven development (TDD) and continuous testing practices within Salesforce projects.
- Requirement gathering from client regarding service cloud.

Sumitomo Mitsui Banking Corporation- New York, NY

Oct 2022 – Feb 2024

Role: Sr. Salesforce Developer

Responsibilities:

- Working on a Large-scale complex Salesforce development projects along with integrating data from other systems/Repositories.
- Salesforce Configurations across all the Standard objects like Accounts Contacts Cases etc.
- Managed Salesforce platform for 1300 end-users
- Worked on configuring standard Salesforce Chatter and customizing it by including custom logics on chatter objects using triggers and Classes and VF Pages.
- Good understanding of standard Chatter objects and their limitations.
- Designed Implemented and deployed the Service Cloud with various custom built Page layouts Custom tabs Custom Apps to suit to the needs of the application also created various Profiles to enable the Service Cloud specific to them.
- Designed and developed various Visualforce Pages Apex Classes Controller Classes Extensions and Apex Triggers for functional needs in the various applications.
- Created Various Validation Rules Workflows specific to limited user groups by filtering out through their Profiles while working on **Service Cloud**.
- Developed Marketing Cloud implementation project that included Email, SMS, and Push channels.
- Designed Reports and worked with Business users to make them understand the functioning of Reports better.
- Led and managed the implementation of **CPQ** system for streamlining the sales process and ensuring accurate pricing and quoting.

- Collaborated with cross-functional teams to gather business requirements and configure the CPQ system to meet specific needs.
- Developed custom rules and pricing logic within the CPQ system to cater to complex pricing models and discount structures.
- Conducted multiple rounds of testing to ensure the CPQ system's accuracy and seamless integration with the CRM and ERP systems.
- Backend development - Lightning Web Components and Built custom solutions on the platform using Apex, Lightning (LWC, Aura), Visualforce.
- Designed very complex Visual force pages and LWC using JavaScript, CSS, HTML, jQuery, and Controllers.
- Involved in **User Management** - Creating users Roles Profiles.
- Created various Record Types Support Processes Assignment Rules Public Groups Queues Custom Settings Sites Time-Based Workflows etc.
- Used complex SOQL Queries in the Codes and in the tools like Data Loader to Extract Insert or Update vast data millions of records from/into custom objects Standard objects.
- Used HTTP Callout using JSON to fetch records/data from other system and display them on the fly in the Visualforce Page each time the page opens.
- Designed System Configuration Enhancements Dashboards Reporting Page Layouts Sharing Rules Role Hierarchy etc.
- Worked with Salesforce **Commerce Cloud's API** to build custom integrations with external systems.
- Developed custom scripts and extensions for Salesforce Commerce Cloud using JavaScript, jQuery, and other front-end technologies.
- Understand Commerce Cloud technologies and troubleshooting practices to ensure successful resolution of Commerce Cloud product issues
- Well maintained Test Code Coverage Unit Testing for all the codes in the system following the Salesforce limits.

Tokio Marine HCC- Houston, TX.

Jan 2021 – Sep 2022

Role: Sr. Salesforce Developer

Responsibilities:

- Attended daily scrum calls to give the status of ongoing issues in the project.
- Participated in Customers discussions and provided necessary clarifications to the client.
- Worked mainly on Sales Cloud-Selling of Geico policies like Auto, Cycle, Boat and Moat.
- Developed customized solutions within the Salesforce platform to support critical business functions and meet project requirements
- Code refactoring, new implementation based on the requirement, implemented POCs for new requirements.
- Technical and functional documentation, refreshing new environments/sandboxes as per need.
- Worked on Migrating classic version to Lightning Version by using Aura components.
- Worked on Aura Components to develop different Lightning Components like detail pages, buttons and popups etc.
- Used Programming skills like Apex, Visualforce, Aura, LWC and APIs extensively to meet the requirement of the client.
- Created custom Aura components for insurance agents and underwriters to streamline policy quoting and renewal processes.
- Integrated Aura components with Salesforce data models, enabling efficient access to policy details, customer information, and claims data
- Implemented data visualization components using LWC, allowing insurance professionals to analyze trends and make informed decisions.

- Ensured high-performance LWCs, capable of handling large datasets and complex calculations to support critical insurance operations.
- Implemented robust unit tests for LWC components and effectively debugged issues to maintain application stability and data accuracy.
- Collaborated with cross-functional teams, including underwriters, actuaries, and claims adjusters, to develop LWC solutions that met insurance project requirements
- Experienced with triggers by using in different S-objects of Salesforce.
- Exposure into PII/sensitive data masking.
- Experienced in Batch Apex and Schedule Apex on different s-objects.
- Worked on writing SOQL and SOSL queries using Force.com Explorer to retrieve the data from different s-objects.
- Worked on Partner Communities.
- Worked on CMS to get the information from external system.
- Worked on REST API to integrate salesforce system to external system.
- Experienced in writing test classes to test the code before moving into the production environment.
- Worked on Workflows, Process Builder, Visual Flows and Approval Process to meet the client requirement
- Created Public Groups, Queues, Permission Sets, Profiles, Users and Security Settings based on role hierarchy
- Setup MFA(Multifactor Authentication) for all administrators in the organization.
- Worked on Reports and Dashboards, process builder, validation Rules and Data Loader for data migration.
- Experienced in deployments throughout SDLC using Change sets and Azure DEVOPS.
- Performed unit testing on developed functionalities, worked closely with testing team.

Department of Corrections – Orlando, FL.

Mar 2017 – Dec 2020

Role: Salesforce Developer

Responsibilities:

- Created modern Enterprise Lightning Apps combining Lightning Design System, Lightning App Builder and Lightning Component features.
- Upgraded some Apps from Salesforce Classic to Lightning Experience to develop rich user interface and better interaction of pages.
- Worked on Salesforce1 Platform to build Mobile App by enabling Lightning Components for use in Salesforce1 mobile platform to make Lightning Application mobile.
- Retrieved some data and its functionality from Third-Party API's and displayed within the lightning component.
- Created multiple Lightning Components, added CSS and Design Parameters that makes the Lightning component look and feel better.
- Leveraged APEX Controller to make a call for external requests to retrieve data from various API's and displayed them on to the component.
- Enabled Aura Framework, by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in Lightning Applications.
- Custom coded - Apex, force.com, Visualforce, LWC, Aura
- Built custom solutions on the platform using Apex, Lightning (LWC, Aura), Visualforce
- Minimized code in JavaScript Controllers by adding reusable functions in Helper Component.
- Updated the APEX Controller and Helper functions regularly making the Component Context Aware as per business requirement.
- Created Visual force pages that could be rendered as PDF s build dashboard components and define email templates.
- Maintained an E-mail to Case system with auto-notifications sent to users when a case is created for their respective departments.

- Created modern Enterprise Lightning Apps combining Lightning Design System, Lightning App Builder and Lightning Component features.
- Tested apps by appending multiple components to a Lightning Application thereby deployed Applications from Sandbox to Production.
- Used refined global search in Lightning by developing Apex classes and Controllers.
- Experienced using Force.com IDE for creating, modifying, testing, and deploying Force.com Applications.
- Used SOQL and SOSL statements within Governor Limits for data manipulation needs of the application using platform database objects.
- Maintenance of installed Managed Packages in Lightning using Apex. Experienced in using Data Migration tool called Data Loader.
- Visualforce Pages for Lightning Experience, Alternates for Java Script Codes, Sharing Visualforce pages between Classic and Lightning.
- Worked on Lightning Process builder flows, Connect API, Chatter, and quick Action.
- Built Lightning Component Tab for Salesforce 1 Navigation and Custom Applications in Lightning Experience.
- Used field level security along with page layouts in Lightning to manage access to certain fields.
- Implemented the Web Services through WSDL in the Salesforce.com for outbound messaging.
- Implemented use cases for Health cloud using lightning components.
- Developed custom functionality using Apex classes, Triggers, visualforce pages for different business requirements for Health cloud.
- Hands on experience of Salesforce Health cloud for web services API like REST, Bulk & SOAP.
- Experience in working with Eclipse Ability to write SOQL, SOSL queries across multiple objects within SFDC database in Health Cloud
- Involved in daily stand-up meetings, Scrum. This resulted to bring good solution to the business requirement.

Archies Ltd- Chennai, India.

Aug 2014 – Jan 2017

Role: Software Engineer

Responsibilities:

- Experienced in writing triggers for various scenarios in different S objects.
- Worked on Administrative activities like creating Users, Profiles, Roles.
- Worked on Salesforce ETL tools like Data Loader and Workbench.
- Worked on Security Model of Salesforce.
- Using controllers and **embedded JavaScript** and **HTML** as needed.
- Implemented web-based case management automation - Web to Case (on Case Object) to track and solve customer's issues.
- Designed various Web Pages in **Visual Force** for capturing various customer enquiries and Implemented logic for migrating cases to different queues based on the type of customer enquiry.
- Involved in **data mapping** and **data Integration** from JD Edwards ERP to **Salesforce.com**.
- Installed Pervasive **Data Integrator** from the AppExchange for two-way integration with a JD Edwards ERP system.
- Designed, and developed **Apex Classes, Controller Classes, and extensions for various functional needs in the application.**
- Wrote **SOQL** and **SOSL** statements within custom controllers, extensions.
- Customized the **Dashboards** to the track usage for productivity and performance of business centers and their sales teams.
- Developed and configured various Reports and Report Folders for different user profiles based on the need in the organization.
- Worked on Salesforce Triggers to run automated actions based on criteria.
- Worked on salesforce support activities.
