

LEANDRE WALLACE

SENIOR SOFTWARE ENGINEER

Riverview, MI | 269-425-1408 | leandre9699@gmail.com | [LinkedIn](#)

Senior software engineer with 10 years of experience building scalable applications using Go, Ruby, Python and JavaScript/TypeScript stacks. Migrated monolithic systems to microservices architectures, implementing performance optimizations and modern development practices. Actively collaborated in cross-functional teams to deliver enterprise-scale solutions in various industries. Proven record of accomplishment of building efficient, user-focused solutions that serve millions of users.

Skills & abilities

- Programming Languages: C/C++, Go, Ruby, Python, JavaScript, TypeScript
- Backend: Gin-Gonic, Go Echo, Gorilla-Mux, Ruby on Rails, Python (FastAPI, Django, Flask)
- Frontend: Angular, NgRx, React, Next.js, Tailwind CSS, Storybook, Figma, Three.js
- Mobile: React Native, Ionic, Flutter, Android, iOS
- Database: SQL Server, Cosmos DB, DynamoDB, Azure SQL, PostgreSQL, MongoDB, T-SQL, SSIS, LINQ, Sqlx, Pq
- Cloud: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), Heroku, Vercel
- DevOps: BizTalk, Docker, Kubernetes, Terraform, Jenkins, Apache Kafka, RabbitMQ, MSMQ, Github, Terraform, Logrus, Sarama
- Testing: Jest, Jasmine, Karma, Mocha, Pytest, Selenium
- AI: OpenAI, Whisper, LangChain, LlamaIndex, TensorFlow, NLP, RAG, Machine Learning
- Other: Postman, Swagger, GraphQL, gqlgen, gPRC, Stripe, Socket.io, Elasticsearch, Redis, Microservices, Agile, Scrum, SDLC

Experience

GothubAI Senior Software Engineer Emeryville, CA	Sep 2021 – Feb 2025
• Architected healthcare and membership management systems processing 1M+ monthly records utilizing Go, Mux, Angular and React with TypeScript. • Engineered a microservices architecture using Go, Gin, Python and FastAPI, interconnected with RESTful APIs and Apache Kafka for scalable and robust service communication. • Leveraged Goroutines and channels to achieve high concurrency and handle thousands of requests per second. • Developed a RAG-based MultiAgent Framework with OpenAI and Llama2, delivering 95% accuracy and 50% faster processing. • Designed a Golang API with a GraphQL schema, adhering to best practices such as clean modular code, dependency injection, and comprehensive testing. Key technologies included GQLgen, GORM, and PostgreSQL. • Optimized database interactions with Sqlx and Pq, achieving a 35% increase in query performance for PostgreSQL. • Constructed responsive UI components leveraging TypeScript, React and Angular with Tailwind CSS, improving mobile usage by 25% • Engineered cross-platform mobile applications with React Native and Ionic, reaching 200K+ users. • Built AI solutions utilizing Python and Django, processing 50K+ daily requests. • Applied comprehensive testing strategy using Go Testing, Pytest, Jest, and Karma, achieving 90% test coverage. • Managed AWS infrastructure and CI/CD pipelines utilizing Terraform and Github actions, reducing deployment times by 40% and increasing system reliability. • Containerized and orchestrated microservices using Docker and Kubernetes, leveraging Apache Kafka for message queuing. • Integrated event-driven architecture with Sarama for Kafka-based message processing, enabling real-time data streaming. • Executed Agile SDLC, Scrum Methodology to practice-based methodology for modeling and documentation of software-based systems.	
Skills: Golang, Gin, Python, FastAPI, Django, JavaScript, TypeScript, Tailwind CSS, Angular, NgRx, React, Next.js, React Native, Ionic, Goroutines, GQLgen, GORM, Sqlx, Pq, Sarama, Amazon Web Services (AWS), PostgreSQL, GraphQL, Selenium, Jest, Jasmine, Karma, OpenAI, LangChain, LlamaIndex, NLP, Artificial Intelligence, Apache Kafka, RabbitMQ, Microservices, Jenkins, Docker, Kubernetes, Redis, GitLab, CI/CD pipelines, Agile SDLC, Scrum Methodology	

SurveyMonkey | Senior Full Stack Engineer | San Mateo, CA**February 2019 – August 2021**

- Spearheaded the development of user-friendly survey management systems that allowed advertisers to create and share / analyze surveys, leading to a 25% increase in survey engagement and data analysis capabilities.
- Utilized Golang and Echo to build a robust backend.
- Launched survey management platform using React/Next.js/TypeScript, increasing user engagement by 25%.
- Developed high-performance REST APIs with Go/Gin, handling 50K+ daily requests.
- Constructed a consult booking system-using Ruby on Rails, React and PostgreSQL.
- Created mobile application using Flutter, gaining 100K+ downloads with 4.5+ star rating.
- Optimized PostgreSQL database on AWS RDS, reducing query time by 50% and supporting 2x user growth
- Deployed AWS infrastructure (ECS, API Gateway, RDS, and Lambda) and orchestrated container deployment using Docker and Kubernetes.
- Employed Terraform and AWS CloudFormation for infrastructure as code, streamlining the provisioning and management of cloud resources.
- Configured monitoring and logging with Prometheus, Grafana, and the ELK Stack to maintain operational visibility and troubleshoot issues effectively.
- Initiated Git workflows and JIRA processes.

Skills: Golang, Echo, Ruby on Rails, Gem, JavaScript, TypeScript, Angular, Flutter, SQL Server, Prometheus, Grafana, GraphQL, REST API, Amazon Web Services (AWS), Microservices, Git, Jira, Jenkins, Docker, Jest, PostgreSQL, Apache Kafka

TextRanch | Full Stack Engineer | San Diego, CA**June 2017 – January 2019**

- Launched English proofreading platform using Golang/React/Angular, serving 50K+ daily users.
- Integrated TensorFlow and OpenAI models, delivering 92% accuracy in content analysis.
- Carried out Redis caching layer, reducing database load by 60% and response time to 50ms
- Migrated frontend from Angular to React, improving page load time by 28%
- Architected serverless solutions using AWS Lambda, EC2, ECS, EKS, RDS, and CloudFront

Skills: Golang, Python, Flask, FastAPI, Ruby on Rails, JavaScript, TypeScript, React, Angular, Jasmine, Ionic, React Native, Gin, Echo, Amazon Web Services (AWS), Git, Docker, Kubernetes, Selenium, Terraform, End-to-End Encryption, CI/CD, Redis, Agile

Upwork | Paid Freelancer | Riverview, MI**December 2014 – October 2016**

- Managed full-stack development projects, from initial client consultation to deployment and maintenance, delivering tailored solutions that meet specific client needs.

Education

Andrews University, BS Computer Science**May 2018**

Bachelor's Degree in Computer Science
