SUMMARY

Software Test Engineer with expertise in test automation, API testing, and database validation. Skilled in Selenium WebDriver, REST Assured, TestNG, SQL, and CI/CD pipelines to ensure system reliability. Experienced in functional, regression, and backend testing, achieving 95% test coverage, reducing post-release defects by 40%, and automating regression testing for a 30% efficiency improvement. Worked closely with cross-functional teams to streamline testing processes and enhance software quality. Proficient in Agile workflows, API automation, cloud technologies, and performance testing, delivering high-quality software solutions.

EDUCATION

Indiana University Purdue University Indianapolis

Master of Science - Computer & Information Science

Indianapolis, IN

Jan. 2023 – Dec 2024

CVR College of Engineering

Bachelor of Technology - Electronics & Communication Engineering

Hyderabad, India

Aug. 2016 – Aug. 2020

EXPERIENCE

Test Engineering Analyst

Jun 2022 – Dec 2022

Accenture

Hyderabad, India

- Automated UI & API testing with Selenium WebDriver, REST Assured, and TestNG, achieving 95% test coverage
- Wrote SQL queries to verify backend data consistency and compared UI vs. API vs. Database values for e-commerce transactions and financial records.
- Validated RESTful APIs using Postman & REST Assured, ensuring correct request/response structures.
- Integrated automation tests into CI/CD pipelines using Jenkins, Git, and Maven, improving deployment efficiency by 30%.
- Managed defect tracking and resolution using ServiceNow ticketing system, collaborating with developers to ensure timely fixes and Conducted functional, regression, and integration testing on web and mobile applications, ensuring cross-platform compatibility.

Test Engineering Associate

Sep 2020 – May 2022

Accenture

Hyderabad, India

- Achieved 98% test coverage by designing and executing manual & automated test cases using Selenium, Java, TestNG, and BDD (Cucumber with Gherkin)
- Reduced post-release defects by 95% through regression and sanity testing and optimized CI/CD pipelines with Jenkins and Maven.
- Implemented cross-browser testing using Selenium Grid.
- Facilitated team collaboration using Git for version control, Jira for task management, and TFS for project tracking, ensuring seamless development and timely deliveries.

TECHNICAL SKILLS

Languages: Java, Python, SQL, C, Gherkin, JavaScript, HTML/CSS, JSON

Frameworks: Selenium, Cucumber, React, Node.js, JUnit, TestNG, Jira, ServiceNow Ticketing System

Developer Tools: Eclipse, Git, TFS, Visual Studio, Unix, Jenkins, Jira, PyCharm, Maven, Jenkins, Postman, MySQL, MacOS, Windows, Spring, Maven, AWS Cloud, MongoDB

PROJECTS

Student Course Enrollment System | *Java (Spring Boot), MySQL, React.js*

- Developed a Course Enrollment System with Spring Boot and React.js.
- Implemented student authentication, enrollment tracking, and RESTful APIs.
- Used MySQL database for managing students and courses.

Movie Search App | *React.js, JavaScript, CSS, API Integration (TMDb API)*

- Built a Movie Search App using React.js and TMDb API to fetch real-time movie data
- Implemented search functionality with API integration and local storage for favorites
- Designed a fully responsive UI using CSS
