

MOLYA BAGDAT

molya.bagdat@gmail.com | <https://www.linkedin.com/in/molya-bagdat> | (267) 864-9679
Charlotte, NC

Profile

Machine Learning Engineer with 5 years of experience in designing, developing and optimizing scalable solutions and improving performance and 2 years in data analysis. Strong foundation in statistics, mathematical modeling, and optimization. Excited to join a dynamic team and work on impactful projects.

Technical Skills

Machine Learning:

- Supervised & Unsupervised Learning, Reinforcement learning
- Model Deployment, Transfer, Deep Learning, NLP, LLM, Model Optimization

MLOps & Deployment:

- Docker, CI/CD Pipelines (Jenkins, GitLab)
- Model Monitoring

ML Frameworks & Libraries:

- TensorFlow, PyTorch, Scikit-Learn, Pandas, NumPy

Programming languages:

- SQL, Python

Big Data & Cloud Tech:

- AWS (SageMaker, EC2, Lambda, S3, Step Functions, CloudWatch, DynamoDB, CloudFormation)

Mathematics & Statistics:

- Probability, Linear Algebra, Optimization, Statistical Analysis

Data Analysis & Visualization:

- Matplotlib, Seaborn, Power BI, Tableau

Professional Experience

Machine Learning Engineer
New York, NY

REVOLUT

01/2023 – Present

- Developed and deployed scalable machine learning and deep learning solutions, leveraging NLP techniques for personalized marketing and customer interactions.
- Optimized fraud detection models using CatBoost, Isolation Forest, and AWS SageMaker, reducing false positives and enhancing real-time fraud prevention.
- Designed personalized recommendation systems with collaborative filtering, TensorFlow, and PyTorch, increasing customer engagement.
- Developed predictive models for customer behavior analysis using XGBoost and Scikit-learn, driving 10% revenue growth.
- Built scalable ML pipelines with AWS Step Functions, Lambda, and S3, optimizing system efficiency and low-latency processing.
- Implemented ML models on AWS services (S3, EC2, SageMaker), ensuring efficient and reliable production pipelines.
- Optimized data workflows, reducing model training time by 30% with Pandas and NumPy.
- Built scalable data pipelines using Apache Spark on AWS, improving model accuracy and inference performance.
- Utilized Docker for containerization and deployment, ensuring scalability in production.
- Developed and managed CI/CD pipelines using Jenkins for automated deployment.
- Collaborated cross-functionally with data scientists, engineers, and stakeholders, leading to a 25% increase in customer engagement.

Data Scientist
London, UK

MADE.COM

02/2020 – 11/2022

- Developed and refined predictive models, improving demand forecasting and inventory management, reducing overstock and stockouts.
- Built and optimized recommendation systems using AWS SageMaker, Lambda, and Glue, enhancing product discovery and personalized shopping experiences.
- Created predictive analytics solutions for customer behavior modeling, optimizing pricing strategies and marketing campaigns, leading to higher conversion rates.
- Performed advanced data analysis using clustering, classification, and Topic Modeling, improving customer segmentation for targeted advertising and retention strategies.
- Consulted on statistics and machine learning for various projects, applying predictive analytics to optimize decision-making across marketing, sales, and supply chain.
- Utilized statistical techniques to analyze large datasets, uncovering insights that influenced strategic business decisions.

Data Analyst
Almaty, KZ

ALMATYTRADE

05/2017 – 12/2019

- Performed data cleaning, validation, and preprocessing, ensuring data accuracy and reliability for inventory management and sales forecasting.
- Analyzed customer and market data to support strategic planning, leading to a 25% improvement in demand forecasting accuracy and optimizing stock levels.
- Developed interactive dashboards using Tableau and Power BI, providing real-time insights into sales performance, distribution efficiency, and customer trends for stakeholders.
- Conducted data analysis using SQL and Python, identifying patterns in sales data to enhance product distribution strategies and optimize pricing models.
- Partnered with sales and logistics teams to analyze supply chain data, ensuring efficient inventory distribution and minimizing stockouts.

Research Assistant
Leeds, UK

UNIVERSITY OF LEEDS

02/2012 – 12/2013

- Conducted in-depth analysis and interpretation of mathematical data, results, and algorithms for academic research.
- Developed models and simulations to support the study of financial risk and optimization.

Education

- **MSc in Mathematics in Finance**
University of Leeds | UK, Leeds

09/2010 - 11/2011

- **BSc in Finance**
Kazakh-British Technical University | Kazakhstan, Almaty

09/2006 - 06/2010
