

MUHAMMAD AKIF BILAL
Email: algaffaru@gmail.com
Phone: +1 3016536751

Summary:

Principal Software Engineer and Senior iOS Developer with over 12 years of experience in developing and managing sophisticated iPhone and iPad applications, contributing to high profile projects featured on the App Store. Proven ability to lead teams and deliver high quality software solutions in both independent and collaborative settings. Currently serving as a Technical Project Manager, leveraging expertise in agile methodologies, advanced coding practices, and architectural design. Skilled in optimizing performance, troubleshooting complex issues, and implementing secure, efficient iOS applications. Adept in managing the product lifecycle from ideation to deployment, including App Store Optimization, third party service integration, and leveraging the latest iOS technologies.

Skills:

Languages & Tools: ObjectiveC, Swift, SwiftUI, Xcode, JSON, XML, HTML, JavaScript, CSS
Databases: SQLite, Core Data, MySQL, Oracle, SQL Server

Frameworks & Design Patterns: MVC, MVVM, Git, Agile, Push Notifications, In App-Purchases, RESTful Web Services

Development: UI/UX Implementation, Unit Testing, App Store Management, Memory Leak Analysis, Encryption, Code Optimization

Employment History:

AION Digital Private Limited | Technical Project Manager & Senior iOS Developer
Oct 2020 – Present

Project Summary:

AION Digital's flagship mobile banking apps for Kuwait Finance House (KFH Jazeel Banking), Boubyan Bank, and Kuwait Finance House were developed to offer secure, high performance financial services. These apps feature advanced security measures, real time transaction processing, and modern UI/UX elements, ensuring a seamless customer experience. The focus was on scalable architecture and the use of encryption technologies to safeguard sensitive financial data, while maintaining optimal app performance.

Key Responsibilities:

- Spearhead iOS, Android, and web application projects, ensuring the architectural design aligns with business goals and industry best practices.

- Design comprehensive project roadmaps and manage the execution of milestones to ensure timely and efficient project delivery.
- Oversee cross functional teams, fostering collaboration between developers, designers, and product managers to ensure cohesive project execution.
- Implement cutting edge security measures and optimize application performance to deliver a secure and seamless user experience.
- Drive the refinement of UI/UX, ensuring that design enhancements improve user interaction and align with modern accessibility standards.
- Integrate third party services to enhance app features, ensuring seamless interaction and data exchange with external systems.
- Ensure compliance with mobile platform guidelines and manage deployment processes for successful app submissions to the App Store.
- Monitor app performance using profiling tools, proactively resolving issues and optimizing resource consumption.
- Provide mentorship to junior developers, fostering best coding practices and maintaining high team morale.

Synapse Synergy Solutions | Technical Project Manager & Technical Lead
Oct 2018 – Oct 2020

Project Summary:

At Synapse Synergy, I managed multiple iOS projects, including banking and e-commerce apps. The focus was on enhancing app functionality, integrating third party APIs, and optimizing user experiences. Additionally, I collaborated with cross functional teams to ensure apps met both business objectives and user expectations. Key projects include leading mobile banking initiatives that require secure handling of sensitive user data and ensuring compliance with financial regulations.

Key Responsibilities:

- Led the strategic direction and execution of iOS application development, ensuring alignment with project goals and client specifications.
- Coordinated with third party vendors and partners, ensuring seamless integration of external services while maintaining optimal app performance.
- Gathered and analyzed business requirements, translating them into technical specifications for app development and implementation.
- Facilitated collaboration between design and development teams, ensuring that user centric design improvements were met with efficient development cycles.
- Conducted rigorous performance analysis and resolved issues related to speed, functionality, and scalability, ensuring high quality app releases.
- Oversaw the integration of payment systems, ensuring secure and compliant financial transactions within the apps.
- Managed version control and CI/CD processes, improving code deployment workflows and ensuring smoother releases.

- Provided regular updates to stakeholders and led sprint planning to align team efforts with client expectations.
- Ensured the timely and successful delivery of apps, meeting the highest standards for security, functionality, and user experience.

Techlogix Private Limited | Principal Software Engineer & Senior iOS Developer
Apr 2015 – Oct 2018

Project Summary:

During my tenure at Techlogix, I contributed to the development of secure and scalable financial apps, including JazzCash and StriveOn. These apps featured complex transaction systems and integrated push notifications for real time updates. My role included overseeing the full app lifecycle, ensuring security protocols were in place, and optimizing app performance for smooth, consistent user experiences across different devices.

Key Responsibilities:

- Led the design and implementation of iOS applications, ensuring high quality coding standards and seamless integration with backend systems.
- Managed the full app lifecycle, from conceptualization and design to testing and deployment, ensuring each phase adhered to strict deadlines and quality benchmarks.
- Implemented secure financial systems and optimized app functionality for apps like JazzCash, ensuring robust data encryption and secure transaction handling.
- Worked closely with backend teams to integrate complex data flows and ensure smooth, realtime app functionality.
- Mentored and guided junior developers, fostering a collaborative environment for knowledge sharing and maintaining code consistency.
- Performed extensive performance optimization, reducing app load times and improving memory management to enhance user experience.
- Conducted user testing and gathered feedback to refine app features and UI/UX, ensuring the apps met both user and business needs.
- Collaborated with stakeholders to define the roadmap for new app features, ensuring continuous improvement and feature scalability.
- Delivered apps with industry leading encryption standards, protecting sensitive user data in realtime financial transactions.

mobiworld | Principal Software Engineer & iOS Developer
Jan 2014 – Apr 2015

Project Summary:

At mobiworld, I was responsible for the development and optimization of various iOS applications, including the Dove Smile Alarm Clock and Nespresso e-commerce apps. I integrated multiple features, from alarm management to secure online payments. These apps

required tight integration with APIs, smooth user interfaces, and high performance standards to ensure a seamless user experience.

Key Responsibilities:

- Directed the development and optimization of iOS applications using both ObjectiveC and Swift, ensuring high performance and code maintainability.
- Managed the end to end development process, ensuring all app components functioned seamlessly across multiple devices.
- Developed advanced e-commerce features for the Nespresso app, streamlining payment systems and optimizing the user experience for online shoppers.
- Collaborated with design teams to refine the user interface, ensuring visual appeal and smooth interaction across various user touch points.
- Focused on optimizing app performance, troubleshooting any issues, and ensuring all features functioned correctly under different load conditions.
- Worked with backend developers to integrate API services and ensure real time updates for users.
- Contributed to testing and debugging efforts, ensuring all apps were free of critical bugs before launch.
- Conducted performance tuning and memory management optimization, ensuring faster app loading and smoother user interaction.
- Developed scalable solutions to ensure smooth app performance as the user base grew.

SDSOL Tech | iOS Developer Sep 2010 – Dec 2013

Project Summary:

At SDSOL Tech, I contributed to a range of iOS apps, including State Trust, Zwaped, and Kontractor. These apps featured secure transaction systems, in app purchases, and contract management functionalities. My primary role involved integrating third party services, enhancing app security, and ensuring that the apps met business requirements, with a focus on scalability and smooth performance.

Key Responsibilities:

- Developed secure and robust iOS applications using Xcode, Core Data, and integrated third party APIs to enhance functionality and reliability.
- Delivered key features for financial apps, ensuring compliance with industry security standards and optimizing data protection measures for users.
- Enhanced app functionality with in app purchases and trade features for the Zwaped app, improving user engagement and monetization capabilities.

- Managed the integration of contract management features in Kontractor, focusing on digital contract storage, signing, and tracking.
- Worked collaboratively with backend teams to integrate real time data services, improving app performance and ensuring smooth interactions.
- Created custom APIs to handle sensitive user data securely and ensure consistent app performance.
- Optimized app architecture for scalability, ensuring the apps could handle growing user bases without compromising performance.
- Ensured rigorous unit testing and debugging, maintaining the integrity of apps and ensuring they met all requirements before launch.
- Provided post launch support, troubleshooting and resolving bugs as needed.

Certifications:

- Certified ScrumMaster (CSM)
- Apple Certified iOS Developer
- PMP (Project Management Professional)
- SAFe 6.0 Agile Certification
- App Store Optimization Expert

Education:

Bachelor of Computer Science
University of Technology Lahore, Pakistan | 2010
