

MADHUSUDAN KAKA

CAREER OBJECTIVE Passionate about leveraging **cutting-edge technologies** to optimize **business processes**, enhance **customer experience**, and drive **digital transformation**. Committed to **architecting intelligent systems**, integrating **cloud and AI technologies**, and leading **strategic initiatives** that accelerate innovation in **financial services and beyond**.

PROFESSIONAL SUMMARY

Strategic and results-driven **Lead System Architect** with over **16 years of expertise** in **Pega case management, AI-driven automation, and enterprise workflow solutions**. Proven ability to design, implement, and optimize large-scale Pega initiatives that drive digital transformation and operational efficiency, particularly in **financial services**.

Expert in architecting scalable, reusable solutions aligned with enterprise goals, leveraging the latest in **Pega Infinity, Constellation framework, and GenAI Blueprint** to deliver intelligent, user-centric applications. Adept at integrating **Pega Process Extender, Knowledge Buddy, Insights, and Emailbots** into automation ecosystems, with hands-on experience in proof-of-concept development and innovation enablement.

Experienced in designing robust data models using **Pega's Common Data Model for Financial Services**, enabling standardized, extensible data structures across enterprise applications. Familiar with **Customer Service Framework** to enhance service delivery and streamline case resolution.

Extensive experience in **Pega Reports**—including **dashboard reports, scheduled reports, and custom analytics**—to support data-driven decision-making. Deep understanding of **Job Schedulers** and **Queue Processors**, with integration into **Kafka streams** for high-throughput, event-driven processing.

Skilled in **Federated Case Management, Pega MashUp, and RESTful integrations** using **Connect-REST** and **Service REST**, enabling seamless cross-platform orchestration. Proficient in generating file outputs via **Pega repositories** and automating delivery through **FTP server rules**.

Strong background in **cloud-based solutions (Azure)**, with successful migration of multiple Pega applications to cloud platforms, including **database upgrades from DB2 to SQL Managed Instance (SQL MI)**. Experienced in **SAML SSO, File Listener, and Email Listener** integrations, ensuring secure and efficient enterprise connectivity.

Passionate about harnessing **AI, machine learning, and intelligent automation** to streamline workflows, enhance customer experience, and drive innovation. Recognized for mentoring engineering teams, establishing best practices, and delivering high-performance, scalable Pega applications.

KEY STRENGTHS

- **Leadership & Strategy:** Proven ability to lead teams, drive technology transformation, and align IT solutions with business goals.
- **Process Optimization:** Strong experience in enhancing operational efficiency through automation and AI.
- **Technical Expertise:** Deep knowledge of Pega Infinity, AI-driven automation, and cloud-based solutions.

WORK HISTORY

LEAD SYSTEM ARCHITECT 05/2018 to Current **Scotiabank**, Toronto

Leading Pega-driven enterprise solutions for financial services, pioneering AI-powered automation, and orchestrating strategic technology transformations. Spearheading large-scale implementations, mentoring teams, and ensuring seamless integration across financial workflows.

SENIOR ASSOCIATE 08/2016 to 03/2018 **Cognizant Technology Solutions**, Canada

Steered Pega-based innovations, optimizing case management systems and enhancing customer servicing platforms for a leading financial institution. Collaborated closely with business stakeholders to drive process automation and digital transformation initiatives.

SENIOR ASSOCIATE 01/2015 to 08/2016 **Cognizant Technology Solutions**, Hyderabad

Architected scalable, intelligent workflows, improving operational efficiencies for global clients across banking and telecom domains. Designed high-performance Pega solutions, ensuring a frictionless user experience.

SENIOR SOFTWARE ENGINEER 12/2010 to 01/2015 **Tech Mahindra**, Hyderabad

Led enterprise system integrations, delivering robust Pega implementations. Pioneered key process enhancements, reducing manual intervention and enhancing compliance.

SOFTWARE CONSULTANT 07/2010 to 12/2010 **Fiables IT Outsourcing**, Hyderabad

Developed customized enterprise solutions, tackling complex business challenges with scalable ATG framework. Delivered process-driven application designs to optimize business workflows.

SOFTWARE DEVELOPER 05/2009 to 07/2010 **Cachet Software Solutions Pvt. Ltd**, Hyderabad

Embarked on an exciting journey of designing and implementing core business applications, gaining hands-on expertise in systems architecture and enterprise application development.

CERTIFICATIONS

PROJECTS

Document Indexing (Apr 2025 – Present)

- Architected and implemented an intelligent document indexing solution using **Pega Infinity 23**, integrated with **Tesseract OCR** and **Google Document AI** for high-accuracy text extraction and classification.
- Designed end-to-end automation workflows leveraging **Pega Case Lifecycle Management**, enabling dynamic routing, exception handling, and metadata tagging.
- Utilized **Kafka-based Queue Processors** for asynchronous document ingestion and real-time stream processing.
- Configured **Job Schedulers** to orchestrate batch processing and periodic indexing of large document volumes, improving throughput and system responsiveness.
- Integrated **Email Listener** and **File Listener** components to support multi-channel document intake, including email attachments and FTP-based file drops.
- Developed custom **Pega Reports** and **Dashboard widgets** to monitor indexing performance, error rates, and processing SLAs.
- Reduced manual intervention by over 80%, significantly enhancing operational efficiency and accuracy in document classification and retrieval.
- Ensured scalability and maintainability by modularizing components using **Pega Constellation design principles** and reusable data objects.

Wealth Workflow Remediation (Jun 2025 – Present)

- Serving as **Lead System Architect** for a strategic enterprise initiative focused on automating wealth management workflows and enhancing customer experience across financial services.
- Designed and implemented a modular solution using **Pega Infinity 24**, leveraging **Pega's Common Data Model for Financial Services** to ensure standardized, extensible data structures across multiple case types and business domains.
- Integrated **Pega Process Extender** to deliver a unified, seamless experience for users accessing workflows via **Salesforce**, enabling cross-platform orchestration and contextual case handling.
- Architected the front-end using **Pega Constellation UI framework**, delivering responsive, component-driven interfaces that align with modern UX standards and reduce development overhead.
- Applied **Pega GenAI Blueprint** to accelerate design-time configuration, generate optimized case flows, and enhance decisioning logic with AI-assisted modeling.
- Enabled real-time processing through **Kafka-integrated Queue Processors** and **Job Schedulers**, supporting high-volume transaction handling and SLA-driven task execution.
- Configured **Pega Reports**, including **dashboard analytics** and **scheduled reports**, to provide actionable insights and performance tracking across remediation workflows.
- Collaborated with cross-functional teams to ensure compliance, scalability, and

maintainability, while mentoring developers on best practices in Pega architecture and Constellation-based design.

Wealth Upgrade (Jan 2024 – Mar 2025)

- Migrated Pega platform from v7.2 to Infinity 23 on Azure Cloud.
- Updated database from DB2 to SQL MI and resolved post-migration UI issues.

Wealth OCR (Mar 2020 – Jan 2024)

- Implemented document recognition and processing solutions using Pega v7.2.
- Automated decisions based on predefined rules and reduced manual intervention.

WealthOne Servicing (May 2018 – Mar 2020)

- Integrated Canada Post for address completion and E-Sign live for electronic signatures.
- Built on Pega FCM and CPM frameworks for holistic case management.

Agent Desktop (Jan 2018 – Mar 2018)

- Developed customer care application for TD MBNA customers using Pega v6.2 SP2.
- Integrated with bank's Identity Management system and customer information inventory.

Settlement Workflow Engine (May 2016 – Dec 2017)

- Consolidated near real-time deal information for settlement activities using Pega v7.1.9.
- Eliminated manual processes and improved customer relationship management.

Contact Handling and Tracking System (CHATS) (Jan 2015 – Apr 2016)

- Developed contact center application for Kaiser Permanente using Pega CPM framework.
- Automated processes for benefits, eligibility, billing, and claims inquiries.

Prospect to Enrollee (Aug 2014 – Dec 2014)

- Developed functionalities for Delta Dental's proposal and enrollment system using Pega7.
- Integrated with external systems and implemented business logic.

National Broadband Network Appointment Management (NBNAM) (Aug 2013 – Aug 2014)

- Managed telecom services and appointments for Telstra Corporation using Pega v6.2.
- Implemented reporting and notification functionalities.

Withholding Tax (WHT) (Jan 2011 – Apr 2013)

- Developed tax calculation modules for GE using Pega v6.2.
- Automated tax deduction processes for domestic and cross-border transactions.
