➤ 10 years experience into DevOps, Automation & Infrastructure

SKILLSET

- AWS | Python | [Kubernetes](#) | [CI/CD](#) | Linux | CCNP | CCNA
- [Terraform](#) | Ansible | [Slackbot Automation](#) | Prometheus/Grafana | GIT/GITLAB
- Network Protocols – [In-Depth TCP/IP](#), BGP, OSPF, MPLS, Multicast, STP, RSTP, DHCP, NAT
- DDoS Network Attacks support experience. Multivendor - Cisco, Juniper, Arista, A10
- Traffic Tools - Ixia, Spirent, Wireshark, Tcpdump, Curl, H-ping

Senior DevOps Engineer, WellFargo, San Francisco (Contract)

Jan 2024 – Present

- [Microservices deployment in AWS Kubernetes](#) & provide support/observability
- Design, implement, and optimize - [CI/CD](#) pipelines
- Automation using [Jenkins/groovy](#)
- Develop [SlackBots](#) to automate workflows.
- Used [Terraform/Ansible](#) to automate the infra/Server-configs
- Perform Security & Compliance tests including IAM policies, vulnerability scanning, encryption
- Docker/Containerization of applications using Dockerfiles, with build automation process on Jenkins for docker image creation & hosting them in ECR
- Deployed and maintain [On-Prem](#) applications

Senior DevOps Engineer, Viasat, San Francisco

Dec 2021 – Jan 2024

- Design, implement, and optimize - [CI/CD](#) pipelines
- Deployed [Microservices in AWS Kubernetes](#) & provide support/observability
- Perform Security & Compliance tests including IAM policies, vulnerability scanning, encryption
- Used [Terraform/Ansible](#) to automate the infra/Server-configs
- Automation using Jenkins/groovy
- Deployed [NGINX ingress controller](#) using [HELM](#) chart.
- Docker/Containerization of applications using Dockerfiles, with build automation process on Jenkins for docker image creation & hosting them in ECR
- Deployed and maintained [On-Prem](#) applications on clients Network

DevOps Engineer, Juniper Networks, San Francisco

Sept 2019 – Oct 2021

- Set up, maintain, and optimize - [CI/CD](#) pipelines
- Use Terraform & Ansible to automate infrastructure provisioning.
- Deploy & Manage microservices applications on AWS K8s
- Implement Security & Compliance best practices for applications and infrastructure.
- Perform [QA Testing of Network protocols](#) - for BGP/OSPF/MPLS/Multicast features
- [Automate feature testing](#) - functional/scale/load/system-level testing
- Recreate Customer Found Defects for RCA
- Worked on Juniper routers MX/PTX/QFX

Network Reliability Engineer, Microsoft, USA (Contract)

Aug 2018 - Sept 2019

- Own P0/P1 - Network DDoS Attack cases. Perform Deep Network packet inspection for anomalies
- Perform DDoS Attack analysis, detection, and mitigation based on Volumetric attacks, TCP/UDP attacks (Amplification/Reflection/Application Layer attacks).
- Help customers in Service deployments & Configuration recommendations
- Recreate customer issues and perform RCA
- Tools used – Wireshark, Ix-load, Ix-explorer, Tcpdump, Curl, Dig, and Hping

Network Reliability Engineer, eBay, San Francisco

Mar 2017 – Aug 2018

- Responsible for developing & maintaining eBay's Network infra
- Automated Data gathering task from routers (use-case during on-call incidents)
- Automated Software Upgrades for multivendor routers/platforms using Ansible
- Automated ACL's on Border routers using Ansible to regulate incoming traffic
- Mentored & trained 5 new hires. Participate in Oncall support periodically.
- Work on Network projects like Capacity planning, Code Upgrades, MPLS project, Decommissioning Routers/RACKs. Develop & Maintain Technical SOP's
- Planning & implementing annual Datacenter/Backbone Network capacity demands
- New network infrastructure builds as per need of eBay/internal customers
- Multivendor experience with – Cisco/Juniper/Arista

Software QA Engineer, A10 Networks, San Francisco

June 2015 – Mar 2017

- Perform QA Testing (Solution/Feature testing) for - DDoS Detection & Mitigation product
- Feature Testing includes functional/scale/load/system-level testing
- Implement and execute detailed Test plans, testing and finding software bugs
- Hardware platforms: Cisco, Arista, A10
- Tools used: Ixia-Explorer, Ix-Load, Wireshark, Tcpdump, Curl, Dig, and H-ping

Application Support Engineer, Kezzler, Mumbai, India

June 2011 - July 2013

- Performed Application deployment & Support
- Provided Client trainings & presentations

EDUCATION

- Master's in Computer Networks, Southern Methodist University (Texas USA), 2015
- Bachelors in Electronics, India, Grade - First Class, 2010
