Professional Experience

CVS Health, Senior Business Analyst, Tampa, FL

March 2024 - December 2024

Product Owner, Underwriter for Coalition, a web-based underwriting platform designed for daily operations such as underwriting, quoting, sales, compliance with local regulations. Worked with business stakeholders to define project objectives and understand business needs.

- Spearheaded the development of Coalition, a web-based underwriting platform, by analyzing business problems, translating them into functional requirements, and defining user stories, resulting in streamlined daily operations for underwriting, quoting, and sales processes.
- Led cross-functional teams in defining product roadmaps, prioritizing backlogs, and driving various project stages from planning to post-go-live support, ensuring timely delivery of strategic solutions while balancing short-term needs.
- Implemented Agile methodologies and promoted transparent project management processes, resulting in improved project delivery timelines and enhanced stakeholder satisfaction.
- Orchestrated comprehensive requirement walkthrough sessions, user demos, and training programs, facilitating seamless adoption of new applications and providing ongoing SME support to business users.
- Collaborated with cross-functional teams to optimize product value, resulting in a 10% increase in user adoption and a 15% reduction in support tickets.

Cognizant Technology Solutions Pvt Ltd., Insurance Consultant and Business Analyst, Tampa, FL

August 2021 - September 2023

Provided consulting services for the Cognizant Consulting Insurance Group (CCI).

Project 1: Led the implementation of Navin, a comprehensive web-based solution for AIG UAE and Kenya, streamlining policy administration, claims, underwriting, and compliance processes across multiple insurance lines.

- Collaborated with stakeholders to define project objectives, analyze business problems, and translate requirements into user stories, resulting in a prioritized product roadmap that aligned with strategic goals.
- Drove product development by managing the backlog, conducting requirement walkthroughs, and organizing user demos and training sessions, ensuring timely delivery of features and improved user experience.
- Spearheaded project management activities, including risk identification, stakeholder management, and milestone tracking, while following Agile practices to promote transparency and disciplined project execution.

Project 2: Insight Implementation for AIG Ireland Led the development of Insight, a web-based portal replacing the legacy C-Qual system for AIG Ireland's internal operations. Key responsibilities included:

- Defined project objectives and translated business needs into functional specifications and user stories through stakeholder collaboration.
- Defined data requirements for ISO forms, ensuring the accurate configuration of insurance policies, endorsement schedules, and template corrections according to ISO standards.
- Collaborated with underwriters and technical assistants to implement ISO-compliant policy forms and endorsements that would support the pricing, binding, and management of casualty insurance products.
- Wrote feature files using Gherkin language to define automated test cases and acceptance criteria, ensuring a seamless implementation of ISO-compliant forms.

ICICI Lombard General Insurance Company Private Limited, Business Analyst, Mumbai, India

January 2016 - April 2021

Project 1: The Myra application streamlined policy administration for commercial insurance policies and endorsements across Property, Health, and Marine LOBs, achieving TAT of 48 hours and reducing operational risks by eliminating manual touchpoints. This project integrated multiple systems for seamless straight-through processing across Direct and Broker channels in India operations.

- Collected and framed requirements, aligned product vision, and documented functional specifications.
- Presented document walkthroughs to business and internal teams.
- Documented reporting requirements as per regulatory standards and mapped fields from various systems.
- Collaborated with cross-functional teams to define the product roadmap, gather feedback and optimize product value, resulting in a 15% increase in user adoption and a 20% reduction in support tickets.

Project 2: Sphinx provided policy administration for all-risk and burglary products, achieving TAT of 48 hours, while automating processes and reducing manual intervention.

- Collaborated with underwriters and operations teams to define the product roadmap and gather feedback.
- Documented requirements and prepared functional specifications, presented walkthroughs to business and internal teams.
- Supported internal teams with implementation and addressed customer concerns.
- Conducted detailed research on customer needs to tailor the application.

ICICI Lombard General Insurance Company Private Limited, Sales Manager, Mumbai, India

June 2012 - December 2015

- Managed a business portfolio of INR 630 MM, consistently exceeding sales targets by 20% year-over-year.
- Developed and implemented process improvements that reduced operational costs by 15% while maintaining high-quality service standards.
- Crafted compelling proposals and presentations for over 20 large corporate clients, resulting in a 30% increase in client retention rate.

Magma Fincorp Ltd, Sales Manager, Hyderabad, India

April 2011 – April 2012

- Analyzed SME market for Unsecured Business Loans products, identifying key growth opportunities that led to a 25% increase in market penetration.
- Recruited and managed a network of corporate direct source agents, resulting in a 40% boost in lead generation and conversion rates.

Education

- Master of Business Administration (MBA), General Management, ICFAI Business School
- Bachelor of Engineering (BE), Electronics and Telecommunications, SSCET Bhilai
