

Manoj Reddy Kurra

Full Stack Developer

Jersey City, NJ | kurramanojreddy@gmail.com | (201) 589-4440 | [LinkedIn](#)

Summary

Full Stack Developer with 4+ years of experience delivering **secure, scalable and high-performance web applications** using **Java, Spring Boot, React, Angular and Node.js**. Proven impact in **accelerating delivery by 60%** through CI/CD automation with **Jenkins, Docker and Kubernetes** and reducing onboarding time by 35% via end to end solutions. Refactored legacy systems into resilient microservices, improving performance by 40% and lowering maintenance costs by 30%. Deployed **AI powered features** using **Python, Flask** and **AWS** to enhance user engagement. Skilled in building **RESTful APIs**, integrating **SQL/MongoDB** and ensuring **95% + test coverage** for reliable releases. Thrive in **Agile teams**, driving business outcomes through **cloud native development**, cross functional collaboration and compliance with **HIPAA/SOX standards**.

Skills

Languages:	Java, C, C#, SQL, Python, Go, Kotlin
Web Technologies:	HTML5, CSS3, JavaScript (ES6+), TypeScript, AJAX, JSON, REST, Web Sockets, Bootstrap, SASS/SCSS, GraphQL, Webpack
Frameworks & Libraries:	Spring Boot, Spring MVC, React.js, Node.js, Express.js, Hibernate, jQuery, Angular, .NET, Flask, ML.NET
API Development & Security:	RESTful API Design, WCF (Windows Communication Foundation), JWT (JSON Web Token) Authentication, OAuth 2.0, Swagger/OpenAPI , Compliance Standards (HIPAA, SOX)
Databases:	MySQL, PostgreSQL, MongoDB, Azure SQL Database, AWS RDS, Oracle
Cloud & DevOps:	AWS (EC2, RDS, S3, Lambda, IAM), Azure, PCF , Jenkins, Docker, Kubernetes, GitHub Actions, Azure DevOps
Collaboration & Development Tools:	Jira, Confluence, Git, Eclipse, IntelliJ IDEA, Visual Studio Code, Visual Studio
Testing Tools:	JUnit, Mockito, Selenium, Appium, Postman, Pytest, xUnit, Jest
Methodologies:	Agile (Scrum), CI/CD, TDD, SDLC

Professional Experience

Full Stack Developer | *ACL Digital*

Jan 2025 – Present

- Reduced onboarding time by 35% by leading full stack development of a cloud native app using React.js and Spring Boot, backed by secure JWT auth and modular microservices.
- Improved system performance by 40% and cut maintenance by 30% by refactoring legacy monoliths and .NET services into resilient Spring Boot microservices.
- Accelerated feature delivery by 60% through CI/CD automation using Jenkins, Docker, GitHub Actions and implemented container security with audit compliance.
- Delivered scalable web apps for 10K+ users with 99.95% uptime using React.js, Node.js, Express, MongoDB and built secure, compliant APIs aligned with HIPAA/SOX standards.
- Launched AI powered features including personalized recommendations and NLP search by deploying Python ML models via Flask, Docker and AWS ECS.
- Introduced backend modules using Go and Kotlin for performance critical services, reducing API response time by 25% and improving concurrent request handling by 40% across distributed systems.
- Cut defect leakage by 50% and maintained 95% + test coverage using Jest, Pytest, Postman, ensuring high release quality and test reliability.
- Boosted team velocity and code quality through agile collaboration, mentoring and peer reviews while leveraging Jira, Confluence, Git, IntelliJ IDEA, VS Code, Eclipse and Visual Studio to streamline development workflows and cloud migration on AWS/Azure.

Associate Software Engineer | CueTech Systems

Dec 2019 – Jul 2023

- Developed and deployed financial analytics dashboards using Java, Spring MVC, Angular, .NET and Bootstrap, enabling real time KPI tracking and reducing manual processes by 40%.
- Built RESTful APIs, WCF services and GraphQL endpoints, along with reusable UI components using TypeScript, JSON and Webpack, cutting feature delivery time by 25% and streamlining hybrid cloud/on prem integrations.
- Architected microservices with Spring Boot on AWS (EC2, S3, RDS, IAM) and PCF, boosting scalability and reducing infrastructure costs by 25% through containerization and optimized resource management.
- Designed responsive, accessible front-end interfaces using HTML5, CSS3, SASS/SCSS, JavaScript (ES6+) and AJAX improving UI performance by 20% and ensuring cross browser compatibility and ARIA accessibility.
- Enhanced application reliability by implementing unit and integration tests with xUnit, Selenium, Postman, achieving 95%+ test coverage and reducing production bugs by 70%.
- Delivered high impact AI features using Python, TensorFlow, Scikit Learn and ML.NET, improving recommendation accuracy by 30% and boosting user engagement through real time personalization.
- Developed performance critical backend modules in C and C#, optimized memory intensive processes and leveraged Web Sockets and Service Workers to enable real time updates and improve system responsiveness by 30%.
- Spearheaded Agile collaboration and peer mentoring to uplift team performance, improve code quality and accelerate delivery timelines enabling faster turnaround on critical features and boosting overall sprint efficiency by 35%.

Education

Master’s degree in Computer Science | University of Bridgeport, Connecticut

May – 2025

Certification

- Microsoft Azure Fundamentals
