

Manokrishna Nenuganti | Software Engineer

IL | +1 (331) 529-1410 | nenuganti.mk123@gmail.com | LinkedIn

SUMMARY

Software Engineer with around 4 years of full-stack and backend experience across financial services, insurance, and web platforms. Skilled in designing scalable applications, automating workflows, and delivering measurable impact using Java, Spring Boot, AngularJS, C#, .NET Core, Python, and cloud platforms.

WORK EXPERIENCE

MetLife, IL | Software Engineer Intern

May 2025 – Jul 2025

- Contributed to developing an internal claims tracking module using C# and .NET Core, enabling faster case updates and reducing turnaround time for customer service requests by 20%.
- Created test automation scripts with Selenium and Postman to validate APIs and UI workflows, improving the accuracy and speed of regression testing cycles.
- Worked alongside data engineers to integrate structured policy data into AWS S3 and Athena, which streamlined analytics for the risk and compliance teams.
- Participated in Agile sprints by contributing to code reviews, daily stand-ups, and sprint retrospectives, gaining hands-on experience with Jira and Git-based version control.
- Documented technical workflows and troubleshooting steps in Confluence, simplifying knowledge sharing across teams and helping onboard two new interns smoothly.

Visualytes Limited, Southampton, UK | Software Engineer Intern

Mar 2021 – Aug 2021

- Assisted in developing backend infrastructure and RESTful APIs using Python and Django, supporting user authentication, session management, and dynamic content delivery.
- Contributed to backend features for the “Virtual Corporate Exhibition” platform, including event registration, automated notifications, and real-time data tracking, improving efficiency for attendees and organizers.
- Developed automation scripts to monitor user engagement and generate analytics, supporting data-driven decisions for featured products and event interactions.
- Participated in data modeling and schema design, collaborating with senior engineers to ensure data consistency, integrity, and optimized retrieval.
- Supported frontend integration by delivering backend logic and APIs for UI/UX features, while engaging in agile ceremonies and documenting workflows for team knowledge sharing.

Goldman Sachs, India | Software Developer

Jan 2017 – Dec 2019

- Built and enhanced internal portfolio management and client-servicing applications using Java Spring Boot on the backend and AngularJS on the frontend, improving user experience and data retrieval speeds by nearly 40%.
- Developed data-driven services that automated reconciliation and reporting for equity trades, reducing manual dependencies and minimizing operational errors across trading desks.
- Collaborated closely with business analysts and traders to integrate live market data APIs, ensuring real-time visibility for corporate finance teams and compliance officers.
- Introduced asynchronous data processing using RabbitMQ and PostgreSQL, optimizing transaction workflows and reducing message latency by 35% across distributed systems.
- Worked with the DevOps group to containerize services and set up automated deployments through Jenkins and Docker, leading to faster rollouts and more reliable build environments.
- Participated in system migration from legacy monolith applications to a modular microservice architecture, improving maintainability and allowing easier onboarding of new client features.

SKILLS

Programming Languages:	Java, C#, Python, JavaScript, TypeScript, SQL, Bash/Shell
Frameworks & Libraries:	Spring Boot, .NET Core, AngularJS, React, Flask, Node.js, Express.js
Databases & Data Management:	PostgreSQL, Oracle, MySQL, MongoDB, Redis, AWS S3, Athena, Snowflake, Data Integration, Data Pipelines
Web & API Development:	RESTful APIs, Microservices, API Integration, GraphQL, WebSockets, gRPC, RabbitMQ, JSON
DevOps & Cloud:	Docker, Jenkins, Kubernetes, CI/CD, AWS Cloud Integration, AWS Lambda, Terraform, Containerization, CloudFormation
Agile & Collaboration:	Agile/Scrum, Jira, Confluence, Code Reviews, Documentation, Cross-functional Collaboration, Problem Solving, Mentoring

EDUCATION

MBA in IT- Project Management, Indiana Wesleyan University, IN

Aug 2025

Master of Science in Computer Science, Solent University, UK

Nov 2021

Bachelors in Computer Science and Engineering, HITAM, Hyderabad, India

Jul 2017

CERTIFICATION

- Certified AWS Technical Essentials hosted by AWS training and certification
- Certified META Backend Developed by Coursera
- Certified Python Developer hosted by W3 Schools
- Certified AWS Cloud Technical Essentials Hosted by Coursera via AWS training and certification
