SUMMARY

Experienced **Java Backend Developer with 5 years** in developing microservices using **Spring Boot, RESTful APIs, and Java**. Skilled in backend optimization, database performance tuning, event-driven systems, and Kafka. Proficient in GCP, MongoDB, MySQL, and CI/CD pipelines, with a strong focus on scalability, automation, and **Agile development**.

PROFESSIONAL EXPERIENCE

Software Engineer II, JP Morgan Chase & Co

May 2022 - Feb 2024

Spring Boot, Spring Rest, Microservices, Java 8, React JS

- Developed and maintained **microservices-based backend RESTful APIs (80% of work)** using **Java 8 and Spring Boot**, supporting a **Supply Chain Management** web application.
- Designed APIs to fetch **demand, supply, and balance data** over past years, enabling supply-demand planners to analyze trends and optimize planning.
- Implemented **efficient database queries** to improve data retrieval performance, reducing response time for supply chain analytics.
- Led **API deployments** across development, UAT, and production environments, ensuring seamless integration and performance.
- Wrote **unit tests using JUnit and Mockito**, achieving **high test coverage** and ensuring robust API functionality.
- Conducted **API testing and debugging**, resolving performance bottlenecks and ensuring data consistency.
- Followed **Agile methodology**, actively participating in **Jira sprint management** tasks.
- **Frontend Work (20%)**: Contributed to the **React.js-based UI**, integrating backend APIs and assisting with data visualization for planners.

FTD India Pvt Ltd, Hyderabad, India

Apr 2020 - May 2022

Senior Software Engineer

Spring Boot, Spring Rest, Microservices, Java 8, GCP, MongoDB, IntelliJ

- Developed and maintained **Java 8-based microservices** for high-performance backend systems.
- Designed and implemented **webhooks** to facilitate seamless integration with third-party partners.
- Automated the **onboarding of thousands of florists** by providing APIs and scripts, reducing manual effort.
- Developed a **Pub/Sub-driven event mechanism** to streamline order fulfillment workflows.
- Optimized **REST API performance**, improving response time by **20%** through code enhancements.
- Led **production deployments, log monitoring, and issue resolution**, ensuring system stability.
- Diagnosed and debugged **complex applications** efficiently, minimizing downtime and improving reliability.

Software Engineer

Spring Boot, Microservices, Java 8, Spring MVC, MySQL, MongoDB, IntelliJ

- Developed **RESTful microservices** using **Spring Boot**, handling business logic and API interactions.
- Built and optimized **REST APIs** for an **e-commerce web application** used by florists to track daily activities.
- Implemented **caching strategies**, improving application performance and response times.
- Led the **migration of florist preferences** from a **legacy application to microservices**, automating data transformation via scripts.
- Made **enhancements to legacy applications** using **Spring MVC**, ensuring backward compatibility.
- Monitored and resolved **service alerts**, proactively handling incidents and improving system reliability.
- Involved in monitoring the alerts triggered in the services and taking the necessary actions.

Systems Engineer, Infosys India Pvt Ltd, Hyderabad, India

Aug 2019 - Apr 2020

Spring Boot, Java, MySQL, Spring Tool Suite

- Developed and maintained **backend REST APIs** for a customer support web application, enabling seamless issue resolution.
- Integrated **Apache Kafka** for real-time event streaming, improving system responsiveness and scalability.
- Wrote **efficient, reusable, and scalable code**, ensuring maintainability as functionalities expanded.
- Diagnosed and resolved **bugs and production issues**, improving system reliability and performance.
- Collaborated with the **QA team** to test features, ensuring high-quality releases through structured testing.

Intern, Infosys India Pvt Ltd, Mysore, India

Feb 2019 - May 2019

- Completed **four months of intensive training** in **Core Java and Python basics**.
- Gained hands-on experience with **J2EE technologies**, including **Spring Boot, Spring MVC, Spring REST, and Hibernate**, for building enterprise applications. Developed a **Garage Management System**, a web application that enables mechanics and customers to **track and manage garage activities** efficiently.

TECHNICAL SKILLSET

- **Programming Languages:** Java, SQL.
- **Web Technologies:** HTML, CSS, Bootstrap
- **J2EE Technologies:** Spring, Spring JPA, Spring Boot, Spring Rest, Spring Boot Microservices
- **Databases:** MySQL, MongoDB
- **Tools:** IntelliJ, Eclipse, Spring Tool Suite, PostMan, Git, BitBucket, JIRA, Visual Studio Code, Maven, Jenkins, GCP
- **ORM tools:** Hibernate, MyBatis
- **Operating Systems:** Windows, Linux
- **Others:** Tomcat, Redis, Kafka

EDUCATION

Bachelor's Degree in Information Technology

CGPA- 9.75

Sreenidhi Institute of Science and Technology, Hyderabad, India

May 2019

Courses: Object Oriented Programming Through JAVA, Operating Systems, Database Management Systems, Web Technologies

CERTIFICATION

- Certified as **AWS Cloud Practitioner** (2023)
