

Mateo Cooper

Senior Software Engineer (Ruby on Rails)

Austin, TX | (949) 505-9974 | mateocoopr@gmail.com

Skills

- **Full Stack Development:** Proficient in Ruby on Rails, JavaScript, HTML, and CSS, with extensive experience in frameworks such as Rails, and React.js. Skilled in building and maintaining robust frontend and backend solutions.
- **Backend Technologies:** Advanced skills in developing RESTful APIs, micro-services, and server-side applications using RoR and Node. Proficient in integrating with various databases such as PostgreSQL, MySQL, and MongoDB.
- **Frontend Technologies:** Expertise in modern frontend frameworks and libraries, including React.js and Vue.js. Strong knowledge of responsive design, cross-browser compatibility, and user interface optimization.
- **DevOps and Deployment:** Experienced in deploying applications using Docker, Kubernetes, and cloud platforms like AWS and Azure. Skilled in CI/CD pipeline implementation using Jenkins and GitHub Actions.
- **Performance Optimization:** Adept at optimizing application performance through caching, load balancing, and database query tuning. Experience with tools like Redis, Memcached, and Nginx.
- **Leadership and Collaboration:** Proven track record of leading cross-functional teams, providing technical mentorship, and collaborating with stakeholders to align project goals and deliver high-quality solutions.

Summary

Highly experienced Senior Software Engineer with over 10 years of expertise in developing end-to-end web solutions and applications. Adept at both frontend and backend development, with a strong focus on building scalable, high-performance systems and delivering exceptional user experiences. Proven ability to lead projects, mentor teams, and drive technical innovation in fast-paced environments.

Work Experience

Senior Software Engineer | Nearsure, Los Angeles, CA

03/2021 - Present

- Developed insurance system using RoR and Node backend and React frontend.
- Designed and implemented RESTful APIs using Ruby on Rails and Node.js, enabling seamless integration with third-party services and enhancing application functionality.
- Migrated legacy systems to a micro-services architecture, improving scalability and reducing system downtime by 20%.
- Managed cloud deployments on AWS, leveraging services such as EC2, S3, Lambda, and RDS for efficient, cost-effective solutions.
- Used Test driven approach (TDD) for developing services required for the application and implemented integration test cases and developing predictive analytic using RSpec.
- Used GitHub for Ruby source code version control, Jenkins for automating for build Docker containers, and deploying in AWS S3.
- Developed React Rails has API endpoints I can access from my SPA that can access API endpoints even while I run Node.js for front-end development.
- Collaborated with the design team to create responsive.
- Implemented CI/CD pipelines using Jenkins and Git, reducing deployment times and increasing development efficiency.

Senior Backend Developer | BitCot, San Diego, CA

06/2016 - 02/2021

- Design and development phases of the application using the Ruby on Rails (RoR) framework, which reduced development time by 20% through the effective use of Rails' built-in modules and libraries
- Consumed REST based Microservices with Rest template based on RESTful APIs and designed, developed and tested HTML, CSS, jQuery that meets accessibility and web browser standards for car insurance system.
- Developed and maintained web applications using React.js for frontend development and Node.js/Express.js for backend services.
- Created and optimized Ruby-based micro-services for data processing, resulting in a 40% improvement in processing speed.
- Implemented and enhanced CRUD operations for applications using RESTful architecture in Rails framework with Ruby code reviews, achieving 99% defect-free delivery in functional operations across multiple iterations.
- Built and maintained relational and NoSQL databases, including MySQL and MongoDB, to support dynamic web applications.
- Integrated third-party APIs with existing systems, ensuring consistent data flow and enhancing application performance.

Backend Developer | Walmart, Bentonville, AR

07/2013 - 05/2016

- Contributed to the development of dynamic e-commerce applications using Ruby on Rails, Node.js, and React.js, focusing on backend functionality and frontend interaction.
- Assisted in the creation of RESTful APIs and integrated them with React.js based client applications for seamless user experiences.
- Implemented Model View Control (MVC) architecture using Rails for developing web applications.
- Participated in the development and deployment of cloud-based solutions on Google Cloud Platform, optimizing resource usage and reducing costs.
- Collaborated with QA teams to identify and resolve issues, ensuring the delivery of high-quality software products.
- Optimized system performance and scalability using Ruby on Rails, Elasticsearch, GraphQL, Redis, Sidekiq, and PostgreSQL on AWS infrastructure, resulting in a 50% improvement in data retrieval speeds and supporting a 40% increase in concurrent users without performance degradation.

Education

2009 – 2013, B.S. COMPUTER SCIENCE

The University of Texas at Austin
