Full Stack Developer with over 6+ years of experience in developing and maintaining web and mobile applications using Java/J2EE, Spring Boot, Node.js, React, Redux, Hooks and React Native for banking projects. Skilled in front-end and back-end development, integrating third-party plugins, resolving bugs, and optimizing code. Proficient in Typescript, JavaScript, HTML/CSS, SQL, and database management. Experienced in deploying and managing applications on AWS cloud services. Hands-on with CI/CD tools like Maven, Jenkins, and SonarQube for code quality checks. Experience leading teams, managing Jira tasks, and collaborating with cross-functional teams to gather requirements and deliver high-quality solutions.

SKILLS

Programming Languages: Java/J2EE, Node.js, Next.js, Spring Boot, JavaScript, TypeScript, HTML/CSS, Tailwind CSS

Frameworks/Libraries: Bootstrap, React, Redux, React Native, React Hooks, Redux-saga, Material UI, SCSS/SASS/LESS

Databases: MySQL, PL/SQL, NoSQL, MongoDB, PostgreSQL, Oracle, GraphQL, Hibernate (ORM)

Web/App Servers: Apache Tomcat

Cloud Platforms: AWS (EC2, ECS, S3, RDS, DynamoDB, Lambda, SNS, IMS, and SQS)

Other Tools/Tech: Maven, NPM, OAuth2, JWT, OIDC, Jira, Jenkins, OpenShift, GitHub, Bitbucket, Jest, React Testing Library, JUnit, Mockito, Jasmine, Karma, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Full Stack Developer

Fidelity Information Services – March 2021 to Present

Project Description:

FIS operated in the banking sector, offering both proprietary products and tailored solutions to financial institutions. I contributed to the development of a customer facing D1 consumer application, which handled real-time transactions for services like Zelle while ensuring the detection and prevention of fraudulent activities.

Responsibilities:

- Designed and developed intuitive user interfaces using **React.js**, **JavaScript**, **TypeScript**, **HTML**, **Next.js**, and **Tailwind CSS**, ensuring cross-browser compatibility and responsiveness.
- Built reusable UI components and implemented **React Hooks** and **Redux** for state management, improving maintainability and reducing complexity.
- Developed **Single Page Applications (SPAs)** and responsive mobile apps using **React Native**, **Bootstrap**, and **Material UI** for consistent and implemented **SCSS/SASS/LESS** for scalable UI components
- Enhanced web application performance by optimizing **CSS** and reducing render times with efficient DOM updates.
- Managed project dependencies using **NPM** and automated build processes.
- Developed and maintained middleware layers with **Java**, **J2EE**, **Spring Boot**, and **Spring MVC**, ensuring seamless integration between microservices and APIs.
- Built and maintained **RESTful APIs** with **Node.js** and **Express**, and integrated **GraphQL** APIs for efficient querying of data from **PostgreSQL**.
- Designed and managed databases using **Oracle**, **PostgreSQL**, and **MongoDB**, writing efficient JDBC queries and **PL/SQL** procedures.
- Configured **IAM roles** for secure access management and automated infrastructure deployment with **CloudFormation**.
- Managed build automation using **Maven** and ensured continuous integration and delivery (CI/CD) with **Jenkins**. Installed and administered **SonarQube** for code quality checks.
- Built secure authentication with **JWT**, **OAuth2**, and **OIDC**.
- Performed testing using **Jest**, **React Testing Library**, **Jasmine**, and **Karma**, ensuring high-quality software.

- Worked with **AWS** services such as **EC2**, **ECS**, **S3**, **RDS**, **DynamoDB**, **Lambda**, **SNS**, and **SQS**, setting up **IAM roles** and leveraging **CloudFormation** and **Terraform** for automated infrastructure deployment (IaC).
- Configured **Kafka** messaging, integrated **REST APIs**, and managed CI/CD pipelines with **Jenkins** and **Maven**.
- Led teams of developers, gathered requirements, conducted scrum meetings, and followed **Agile** and **Waterfall** development methodologies.
- Followed **SOLID**, **DRY**, and **YAGNI** principles to design clean, modular, and maintainable code, improving scalability and testability.
- Developed responsive UI components following **UI/UX** best practices, ensuring cross-browser compatibility, accessibility (WCAG compliance), and user-centered design principles to improve user engagement and usability.
- Applied **TDD (Test-Driven Development)** practices to enhance software quality and maintainability.
- Used **GitHub** and **Bitbucket** for version control and tracked tasks in **Jira**.

Full Stack Developer

Novartis – March 2018 to December 2019

Project Description:

Novartis is a pharmaceutical management system that streamlined clinical data management and improved overall operational efficiency. As a Full Stack Developer, I built and enhanced application to track clinical trials, manage drug development workflows and ensure compliance with industry regulations.

Responsibilities:

- Developed and managed **RESTful APIs** using **Java**, **J2EE** and **Node.js** enabling fast and reliable data sharing between microservices and external systems.
- Created customer-facing and internal platforms using **React** and **Redux-saga**, improving the experience for users.
- Contributed to full-stack development by integrating business logic into backend systems using **Java**, **Spring Boot**, and **Node.js**, ensuring high performance and scalability.
- Utilized **Hibernate** for database operations in **MySQL** and **Oracle** improving data retrieval efficiency.
- Automated build and deployment processes using **Jenkins**, improving efficiency and reducing manual errors.
- Wrote unit tests with **JUnit** and **Mockito** to ensure the reliability of code and reduce bugs in production.
- Followed Agile methodologies, working with teams in Jira to stay on track with deadlines and deliver key features on time,
- Extensively used **GitHub** to manage code repositories, tracking changes, collaborating with team members and maintaining the integrity of codebases.

EDUCATION

Master of Science in Computer Science | Southern Arkansas University | Magnolia, AR | **January 2020- May 2021**

Relevant Coursework: Advance Programming Programs, Computer Networking, Software Engineering, Network Security, Database Management Systems, Data Structures, User interface applications.
