sectionSummary **Senior .NET Full Stack Developer** with over 14 years of experience designing and delivering robust, scalable web applications using **C#, .NET Core, Angular, and Azure**.

At ThoughtWorks, reduced deployment errors by 40% through automated pipelines and improved data handling by 25% with optimized Azure Service Bus integration. Skilled in microservices architecture and secure API development, successfully led migrations to cloud platforms, cutting infrastructure costs by 20%. Dedicated to creating intuitive user experiences, bringing expertise in clean coding practices, performance optimization, and team mentorship to achieve impactful results.

Education

Bachelor of Science in Computer Science

Michigan State University

Major: Computer Science

May 2008

East Lansing, MI

Technical Skills

Programming	C#, TypeScript, JavaScript, Node.js, SQL, PowerShell, Bash, C
Frontend	Angular, React.js, Blazor, Vue.js, jQuery, AJAX, JSON, SPAs, HTML5, CSS3
Backend	.NET Core, .NET Framework, ASP.NET MVC, WCF, ADO.NET, RESTful Services
Cloud & DevOps	Azure, GCP, AWS Lambda, Docker, Kubernetes, Terraform, YAML Pipelines
Database	Microsoft SQL Server, Azure SQL, MongoDB, Cosmos DB, NoSQL, SSRS, SSIS
Testing	NUnit, Jasmine, Selenium WebDriver, Application Insights, CI/CD Pipelines
Architecture	Microservices, Service Fabric, Event-Driven Architecture, SOLID Design Principles
Security	JWT, OAuth 2.0, Role-Based Access Control, Secure Web Services
Agile	Scrum, Sprint Planning, Cross-functional Team Collaboration
Version Control	Git, TFS, SharePoint, Silverlight, Swagger, Microsoft Graph

Professional Experience

ThoughtWorks

Senior .NET Full Stack Developer

Sep 2021 – Present

San Francisco, CA

- Built responsive apps using **React, Angular, and C#** to improve healthcare user experiences.
- Created secure APIs with **ASP.NET Core**, using **JWT** for safe patient data access.
- Managed **SQL Server 2022** and linked it with **Google Cloud** for scalable healthcare apps.
- Designed **microservices** with **ASP.NET Core** for reliable and scalable healthcare solutions.
- Built and deployed secure **Azure Web APIs** to handle all **CRUD operations** with optimized performance.
- Automated deployment pipelines using **YAML scripts** in **Azure DevOps**, ensuring error-free rollouts.
- Leveraged **Cosmos DB** to manage large volumes of unstructured **JSON data** in the cloud.
- Developed full-stack features with **React.js**, incorporating **Redux** and **Context API** for state management.
- Supported **build and deployment processes**, ensuring seamless transitions to testing and production environments.
- Assisted in designing and building **ASP.NET Core applications** and web services, leveraging **Swagger** for API testing.
- Integrated **WCF services** with **Silverlight applications**, enhancing system features and user experience.
- Collaborated in **Agile teams**, attending daily stand-ups and tracking progress on user stories.

Skills: C#, ASP.NET, React.js, Redux, WCF, Silverlight, Google Cloud, microservices, JSON, Azure, Azure Functions, Azure DevOps, YAML, Cosmos DB.

Wavemaker

Senior Software Engineer

Aug 2017 – Jul 2021

Chicago, IL

- Developed, deployed, and managed **Azure Web APIs** with full **CRUD operations**, ensuring scalability and security.
- Set up **microservice architecture** with **Docker**, enhancing development and deployment efficiency.
- Leveraged **Azure Service Bus, Topics, and Queues** for reliable enterprise messaging in a distributed environment.
- Streamlined deployments by automating **Azure DevOps pipelines** using **YAML scripts**.
- Integrated API authentication, configuration, and routing with **Azure API Management, Developer Portal, and Gateway**.
- Created a web application using **ASP.NET Core, Angular 4**, and **Bootstrap** for the frontend.
- Developed **microservices** with **C#**, deployed across **Azure Functions, Durable Functions**, and **Kubernetes**.
- Enhanced performance by redesigning views in **Snowflake** and optimizing data migration from **SQL Server**.
- Used **Azure Service Bus** and web jobs to manage messages between APIs, improving scalability and reliability.

Skills: Azure, Azure Functions, Durable Functions, Kubernetes, C#, ASP.NET Core, Angular, Snowflake, SQL Server, YAML, Swagger, Docker.

Softtek

May 2014 – Jun 2017

.NET Full Stack Developer

Dallas, TX

- Built and maintained full-stack web applications with **.NET Core, C#, SQL Server, SSRS**, and **AngularJS**.
- Combined **Angular frontend** with **.NET backend** to deliver complete full-stack applications.
- Integrated **RESTful APIs** and business logic for scalable and dependable applications.
- Managed **Azure environments**, setting up **Linux servers** and services for efficient cloud management.
- Used **C#** and **Azure Application Insights** for logging and monitoring, improving system reliability.
- Developed complete web applications by linking **frontend UI** with **backend APIs** and services.
- Deployed applications on **Azure DevOps Pipelines** using **YAML scripts** for efficient CI/CD workflows.
- Used best design patterns in **Web API development** to eliminate code duplication and ensure reusability.

Skills: .NET Core, AngularJS, SQL Server, Azure DevOps, YAML, RESTful APIs, C#, SSRS, Application Insights.

CapTech Consulting

Apr 2009 – Mar 2014

.NET Developer

Richmond, VA

- Designed and developed web applications using **C#, ADO.NET**, and **ASP.NET**, ensuring robust performance.
- Built **WCF services** with **SOAP/HTTP** to integrate seamlessly with legacy systems.
- Created **Web Roles** and **Worker Roles** in **Azure**, utilizing **Azure Service Bus Queues**.
- Addressed **SQL Injection** vulnerabilities using **Fortify**, significantly enhancing application security.
- Developed a secure document retrieval system using **WCF** for **SQL Server** data access.
- Employed **LINQ to SQL** for data mapping, adding validation and business rules.

Skills: C#, ASP.NET, WCF, Azure, LINQ to SQL, SQL Server, Fortify, SOAP/HTTP, ADO.NET, Web Services.

Project

Sales Lead Provider & Professional Business Development

Sep 2017 – Aug 2020

Software Development

Team Size: 9

Platform/OS Used: Microsoft .Net, Java / Windows 8, Linux

Tools Used: VS 2013, MS SQL Server 2012, NetBeans 8.1, MySQL

Solution Environment: .Net Framework 4.5, C#, Java
