SUMMARY

Project Manager with 8+ years of experience delivering complex initiatives on time and within budget by owning scope, schedule, and cost baselines, aligning stakeholders, and enforcing PMO-grade governance. Led cross-functional teams of 15+ and managed budgets up to \$1,500,000, applying risk/RAID management, change control, and stage-gate reviews to improve on-time delivery, customer satisfaction, and funding outcomes.

PROFESSIONAL EXPERIENCE

Senior Project Manager

Mar 2023 – Present

DAPCEP | Detroit, MI

- Delivered 100+ STEM program projects by building project charters, work breakdown structures, and integrated schedules, increasing participation of underrepresented students by 37%, exceeding engagement goals by 15%.
- Controlled a \$1,500,000 budget by running rolling forecasts, variance analysis, and change control boards, which reduced spend by \$200,000 annually while maintaining SLA adherence and quality.
- Cut reporting cycle time by 40% by implementing a centralized program database with data governance and acceptance criteria, which improved data accuracy and unlocked \$500,000 in new grant funding.
- Reduced supplier costs by \$150,000 by running competitive sourcing, refreshing SOWs, and using vendor scorecards and SLAs, which improved on-time delivery and quality.
- Raised team productivity by 20% and lowered turnover by 15% by resourcing 15+ FTEs, clarifying RACI, and instituting sprint cadences, retrospectives, and SOPs within an Agile operating rhythm.
- Expanded access for 1,000+ students by aligning capacity plans and demand forecasts with university, corporate, and district partners, which increased class fill rates by 80%.
- Increased executive decision speed by deploying KPI/OKR and budget-burn dashboards in Power BI and Excel and standardizing weekly status reports and risk heatmaps, which cut escalations by 75%.
- Reduced schedule risk by instituting stage-gate reviews, issue/risk logs, and dependency tracking, which improved milestone predictability and stakeholder confidence.

Senior Project Manager

Apr 2022 – Present

Swain Solutions Services | Remote, US

- Achieved 98% on-time delivery across a multi-project portfolio by running Scrum ceremonies, enforcing stage-gate governance, and managing RAID logs, which reduced blockers and rework.
- Improved revenue predictability by 20% by building capacity models and pipeline forecasts in Excel and Power BI, which optimized resource allocation and increased utilization by 30%.
- Drove \$253,000 in repeat business by instituting stakeholder maps, communication plans, and quarterly business reviews, which raised alignment and lifted NPS and retention 20% above target.
- Reached 99% operational data accuracy by configuring Salesforce data models and flows and integrating Jira and Asana via APIs, which created a single source of truth for KPIs and SLAs.
- Reduced operational overhead by \$75,000 annually by mapping processes, eliminating handoffs, and automating intake, billing, and reporting with low-code tools and SOPs, which shortened cycle time.
- Shortened quote-to-cash by standardizing SOW templates, change request forms, and contract intake checklists, which improved compliance and cycle predictability by 90 days.
- Increased portfolio visibility by publishing program roadmaps, dependency matrices, and monthly status dashboards, which improved forecast accuracy and executive stakeholder trust.
- Mitigated delivery risk by maintaining risk registers with probability/impact scoring and contingency plans, which decreased high-severity incidents by 40%.

Regional Project Manager

Jan 2019 – Mar 2024

BuildON Inc. | Detroit, MI

- Delivered 8 major initiatives on time by managing \$350,000 in budgets, establishing portfolio governance and milestone tracking, and running cross-functional operating reviews, which accelerated decisions by 60%.
- Secured \$1,110,000 in funding by leading proposals and program plans with scope, timelines, and measurable outcomes, which scaled capacity and geographic coverage.

- Improved operational efficiency by 34% by re-engineering workflows using Lean methods and change management, which reduced cycle time and rework.
- Reduced project delays by 15% by deploying standardized project templates, risk/issue logs, and stage-gates, which improved handoffs and accountability.
- Increased transparency by launching KPI dashboards for enrollment, attendance, and cost per participant and instituting monthly status reporting, which informed quarterly planning and variance control.
- Strengthened vendor performance by renegotiating terms and scorecarding suppliers, which improved on-time delivery and defect rates.

Project Manager

Jan 2017 – Dec 2018

BuildON Inc. | Detroit, MI

- Hit 100% on-time delivery by developing resource-loaded schedules in Asana and Excel, sequencing critical-path tasks, and coordinating cross-team dependencies, which removed bottlenecks.
- Raised program quality by implementing a performance measurement system and surveying 300+ participants, which fed a quarterly roadmap and increased satisfaction by 90%.
- Drove consistent execution by writing SOPs and training seven cross-functional teams on project standards and change control, which increased standard adherence and reduced rework.
- Saved \$50,000 annually by optimizing workforce allocation and vendor utilization while meeting service-level and satisfaction targets.
- Improved stakeholder engagement by publishing weekly status updates, RAID summaries, and action registers, which increased clarity and reduced follow-ups.
