

A Senior Java Full Stack Developer
(AWS Certified & Oracle Cloud
Infrastructure (OCI) Certified)

targeting a challenging role to leverage
Java/J2EE, Spring Boot, Microservices,
Oracle JET, Angular, ReactJS-related
expertise and agile methodologies in
driving innovative solutions. Dedicated
to fostering collaborative team
environments and exceeding client
expectations through dynamic
leadership and cutting-edge
technologies.

TECHNICAL SKILLS

- Programming: Java
- UI Tools: Oracle JET, ExtJS,
Angular 17, React
- Scripting Languages:
JavaScript/jQuery, UNIX Shell
Script, HTML
- Database: Oracle, MySQL,
MongoDB(NoSQL)
- CI/CD: Jenkins
- Cloud: OCI, AWS
- Process: Agile, SDLC
- Paradigms: Object-Oriented
Programming (OOP), Model-
View-Controller (MVC), Model-
View-ViewModel(MVVM),
Virtual DOM(VDOM)
- Frameworks: Java/J2EE,
Spring, Spring boot, JPA,
Hibernate
- Testing: JUnit 4.0, Mockito,
JUnit
- Database: Oracle, MySql,
MongoDB
- Build: Maven
- Middleware: BC4j
- IDE:
Eclipse/IntelliJ/Netbeans/JDev
eloper/VSCode
- Messaging Queue: Kafka, Java
MQ, AWS SQS
- Container : Docker,Kubernetes

CERTIFICATIONS

- Oracle Cloud Infrastructure
Foundation Associate
- Amazon Web Service
Certified Developer

Mohammed Muzzamil Habibur Rahman

PROFESSIONAL SUMMARY

Full Stack Developer with 12+ years of experience in designing and developing scalable enterprise applications. Played a key role in building a **SaaS-based enterprise platform** widely adopted by **Fortune 500 companies**, delivering robust, secure, and high-performing solutions across the full technology stack. Proven expertise in **Java, Spring Boot, Angular, REST APIs, and cloud platforms**, with a strong focus on performance, usability, and enterprise integration.

KEY HIGHLIGHTS

- ▶ **Implemented agile methodologies** resulting in an increase in project delivery efficiency in Enterprise scale development.
- ▶ **Modernized legacy ADF applications** by migrating to **modern UI technologies and RESTful APIs**, resulting in **60% performance improvement**, enhanced **usability**, and **higher user satisfaction**.
- ▶ **Architected scalable and resilient solutions** on **Oracle Cloud Infrastructure (OCI)** by leveraging **OCI API Gateway, Oracle Kubernetes Engine (OKE), Object Storage, and Autonomous Databases**, ensuring high availability and performance under increased user load.
- ▶ **Enforced role-based user access controls**, enabling role-specific features and enhancing overall application security.
- ▶ Applied **security best practices** to mitigate vulnerabilities and prevent common attack vectors, enhancing application robustness.
- ▶ **Optimized cloud resource utilization**, reducing project costs without compromising on quality or performance.
- ▶ Complied with **WCAG 2.1 accessibility standards** and **internationalization requirements**, providing **multi-language support** for a global user base.
- ▶ Achieved consistently **high client satisfaction ratings** by delivering projects **on time and within budget**.
- ▶ **Implemented CI/CD pipelines** using **Jenkins and Git**, significantly reducing deployment times and improving delivery cycles.
- ▶ Established **robust QA processes**, leading to a **notable drop in post-release defects** and **customer-reported issues**.
- ▶ Improved **release management and time-to-market** through streamlined development workflows.
- ▶ Proactively **identified and mitigated project risks**, minimizing delays and ensuring smooth project execution.

SOFT SKILLS

- ▶ **Collaborated effectively with cross-functional teams** including **Product Management, QA, and UX**, gathering requirements, clarifying use cases, and ensuring alignment across the software development lifecycle. Ensured **timely delivery of high-quality features** through proactive and transparent communication.
- ▶ Demonstrated **strong teamwork** by working closely with internal development teams and the larger **EPM team**, ensuring **seamless data flow** and system interoperability across modules.
- ▶ **Handled escalated customer issues** efficiently, partnering with the support team to troubleshoot, resolve issues, and ensure **timely solutions**, maintaining high **customer satisfaction and trust**.
- ▶ **Mentored junior developers** and provided **technical guidance**, cultivating a culture of continuous learning, collaboration, and skill development within the team.
- ▶ **Adapted quickly to new concepts** and delivered results in **fast-paced environments**, consistently meeting project objectives with minimal supervision.

WORK EXPERIENCE- 12 Years and 8 Months

Bizcloud Analytics Inc. : Java FullStack Developer (February 2025 - present) 2 Months

Oracle India Private Limited : Lead Java Developer (October 2015 - February 2025) 9 years & 4 months

Sapient Publicis (July 2012 - October 2015) 3 years

PROJECT DETAILS

Company: Bizcloud Analytics Inc.

Project: Global Tax Application | Role: Full Stack Developer

Responsibilities:

- ▶ **Full Stack Java Developer** working on a **global tax application**, contributing to both **backend** (microservices) and **frontend** (UI) development within a **collaborative, cross-functional team**.

EDUCATION

- **M.Tech. in Information & Technology**, Delhi Technological University (June 2010 - May 2012)
- **B.Tech. in Information & Technology**, Kongu Engineering College ,Anna University (June 2006 - May 2010)

CORE COMPETENCIES

- Agile Methodologies
- Java/J2EE Development
- User Interface Development
- Continuous Integration/Continuous Deployment (CI/CD)
- Stakeholder Management
- Release Management
- Risk Mitigation
- Software Development Life Cycle
- Fast Learner
- Leadership
- Self-Motivated

SOFT SKILLS

- Change Agent
- Collaborator
- Communicator
- Innovator

PERSONAL DETAILS

Address: 1610, Larchmont Place, Mt. Laurel, NJ - 08054

Languages Known: English, Tamil, Hindi

- ▶ **Developing microservices** using **Spring Boot**, ensuring the application was **scalable, modular**, and easy to maintain.
- ▶ **Collaborating with the UX/UI team** to build **responsive user interfaces** using **Angular**, resulting in a seamless user experience.
- ▶ **Created and maintained RESTful APIs** to support various UI components, focusing on **debugging** and **performance tuning** to ensure optimal operation.
- ▶ **Wrote complex SQL queries** to aggregate data for **intercompany transaction summaries** and **financial adjustments**, ensuring accurate reporting.
- ▶ **Designing a comprehensive dashboard** displaying **daily reminders**, **upcoming tax submission deadlines**, and a summary of **key financial transactions**, improving user decision-making and operational efficiency.

Company: Oracle India Private Limited

Project# 1: EPM Development- Data Exchange| Role: Manager/Architect

Java Development

Responsibilities:

- ▶ **Spearheaded the end-to-end design and development** of a **scalable REST API application** using **Java** and **Jersey**, collaborating closely with **cross-functional teams** to ensure seamless integration and timely delivery.
 - ▶ Led the transition from a **monolithic architecture** to **microservices**, enabling **cloud readiness** and scalability as part of a key strategic migration initiative.
 - ▶ Actively participated in the **Oracle Cloud Infrastructure (OCI) migration**, utilizing cloud services such as **Object Storage** and **Autonomous Database** to modernize and optimize the application's architecture.
 - ▶ **Mentored and guided developers** in the creation of the revamped **FDMEE User Interface**, driving higher **user adoption**, improved **performance**, and a **cleaner design**.
 - ▶ **Integrated modern UI technologies**, including **React** and **Oracle JET**, with existing systems like **Oracle ADF**, ensuring seamless interoperability across multiple consumer applications.
 - ▶ Delivered **responsive UI designs** with **role-based access control**, improving **user experience** and enhancing system security.
 - ▶ Actively contributed to **design discussions**, **architecture reviews**, and **UI/UX finalization** to ensure high-quality, consistent delivery across the project.
 - ▶ **Standardized and optimized Git-based version control workflows**, reducing merge conflicts and improving team collaboration in large-scale projects.
 - ▶ Created a **dynamic pipeline UI** that enabled **stage-wise execution** of business jobs (both parallel and sequential), improving usability and attracting new customers through streamlined workflows.
 - ▶ Fostered a **collaborative, high-performing team environment**, ensuring alignment with project goals and objectives.
 - ▶ **Implemented Agile methodologies**, ensuring efficient sprint planning, execution, and delivery.
 - ▶ Developed comprehensive **project plans**, including timelines, milestones, and resource allocation, ensuring alignment with project objectives and timely delivery.
 - ▶ **Monitored project progress**, adjusting plans as needed to mitigate risks and ensure on-time delivery of high-quality outcomes.
 - ▶ Utilized **JIRA** for **efficient bug triaging** and **sprint tracking**, ensuring effective issue resolution and progress monitoring.
 - ▶ Maintained **design documents** and **TSAs on Confluence**, facilitating seamless team collaboration and knowledge sharing.

Project# 2: Data Exchange, Pipeline | Role: Principal Software Engineer

Responsibilities:

- ▶ **Re-engineered the legacy FDMEE UI** from scratch using **Oracle JET (MVVM & VDOM)** and **Jersey REST APIs**, resulting in a **scalable** and **user-friendly application** that improved overall usability and performance.
 - ▶ Designed and implemented a **pipeline UI** using **SVG diagrams**, enabling users to configure and schedule **complex job pipelines** with **parallel and sequential execution**, significantly improving usability and workflow management.
 - ▶ Delivered **location-based security features** in the **Data Exchange UI**, enhancing **access control** and ensuring **compliance** with security standards.
 - ▶ The **pipeline tool** became a **cross-functional asset**, adopted by multiple teams for creating, scheduling, and managing business jobs, driving **significant customer growth**.
 - ▶ **Integrated multiple frontend technologies**, including **React components** within **Oracle JET**, ensuring a seamless and modern user experience across the application.

- ▶ Led **modular and component-based UI development**, ensuring **maintainability** and **reusability** across the entire application, optimizing long-term development efforts.
- ▶ Worked closely with the **support team** to resolve customer issues, contributing to **higher customer satisfaction** and improving **product reliability**.
- ▶ Fostered a **collaborative and supportive team environment** by providing clear direction, coaching, and **technical mentorship** to junior developers, enabling a strong and effective development team.
- ▶ Promoted a culture of **accountability** and **ownership**, empowering team members to take initiative and consistently deliver **high-quality outcomes**.
- ▶ Identified **training and development opportunities** to upskill team members, driving **continuous improvement** and fostering ongoing team growth and skill development.

Project# 3: EPM Development- FDMEE | Role: Senior Member Technical Staff

Responsibilities:

- ▶ Gained **hands-on experience with Oracle ADF (Application Development Framework)**, contributing to **bug fixes** and **feature enhancements** for the **FDMEE (Financial Data Management Enterprise Edition)** platform.
- ▶ Worked on **FDMEE**, a **critical middleware solution** enabling **data transfer between ERP systems** (e.g., **NetSuite**, **PeopleSoft**) and **EPM applications** used for **planning, reconciliation, and budgeting**.
- ▶ Designed and developed product enhancements using **Oracle ADF, SQL, REST APIs, and BC4J**, integrating key ERP systems to ensure **seamless data translation and transformation**.
- ▶ Created a **dynamic UI from scratch** using **Oracle JET**, integrated with **RESTful services** and **ADF-based backend logic**, significantly improving usability and maintainability.
- ▶ Supported **integration efforts** with ERP platforms like **NetSuite** and **PeopleSoft**, ensuring **smooth data flow** and **robust middleware connectivity**.
- ▶ Championed **Agile practices**, actively participating in **Scrum ceremonies** and driving the creation of **clear, actionable User Stories** using **JIRA**.
- ▶ Collaborated directly with customers and internal stakeholders to **troubleshoot and resolve complex technical and functional queries**, improving customer satisfaction.
- ▶ Ensured **maintenance, integration, and scalability** of production technologies to support evolving project needs and align with business goals.
- ▶ Proactively identified opportunities for **process improvements** and **technological upgrades** to boost productivity, optimize operations, and maintain a **competitive edge**.

Company: Sapient Corporation

Project# 5: Asset Allocation Applications (1year) | Role: Java Developer

Responsibilities:

- ▶ Developed and enhanced multiple **financial applications** used by **investment banks**, including: **Asset Allocation Risk Tool, Risk Analyzer, Portfolio Manager, Cash Flow Allocator, Beta Association, and Allocation Analyzer**.
- ▶ Built **rich, Excel-like UI components** to streamline **data management** and **financial analysis**, improving productivity and decision-making for business users.
- ▶ Implemented **editable tree and grid structures** to effectively present complex financial datasets and enable **real-time editing and manipulation of instruments**.
- ▶ Contributed to the development of **highly interactive, data-intensive UIs**, significantly enhancing **user experience** and **operational efficiency** for **portfolio and risk management** teams.

Project# 4: Star Automation | Role: Java Developer

Responsibilities:

- ▶ Integrated **Selenium automation framework** with **JIRA** to streamline **test execution** and **defect tracking workflows**.
- ▶ Enabled **automatic updates of test results** in JIRA upon execution of Selenium test cases, enhancing **traceability** and **reporting efficiency**.
- ▶ Developed functionality to **capture and upload error screenshots** to corresponding JIRA issues, significantly improving **debugging** and cross-team **communication**.
- ▶ Established a **seamless bridge between automated testing and issue management**, reducing **manual effort** and increasing **test visibility** across QA and development teams.

Project# 3: TDS - TDML Recon Adapter | Role: Java Developer

Responsibilities:

- ▶ Developed a **Reconciliation Application** to ensure **Trade Data (TD) compliance** with **Part 23 of the Dodd-Frank Act**, with a focus on **OTC derivatives**.
- ▶ Reconciled **OTC derivative trade data** into standardized formats to meet **regulatory requirements**, improving **accuracy, consistency, and compliance** in reporting.
- ▶ Gained **in-depth knowledge of OTC derivatives**, including trade lifecycle, instrument types, and **key data elements** critical for compliance and transparency.
- ▶ Contributed to **regulatory reporting initiatives**, enhancing **transparency** and ensuring adherence to financial regulations through precise trade data reconciliation.

Project# 2: Associate Technology - Geneva, Transaction filter

Responsibilities:

- ▶ **Developed GTI (Geneva Transaction Interface)** as a middleware layer to ensure all transactions are routed through a centralized interface before reaching **Geneva**, enabling **consistent transaction tracking** and management.
- ▶ Worked extensively with **Core Java** and **EXT JS** to handle **session-level exceptions**, improving **application reliability** and robust **session management**.
- ▶ Leveraged **Maven plugins** to implement **build-time filtering** and other **automation tasks**, streamlining the **deployment pipeline** and improving build efficiency.
- ▶ Adhered to the **MVC architecture** and implemented **custom session filters** to manage **session-specific operations**, ensuring **application integrity** and maintainability.

Project# 1: Trainee Technology - Master Data Management, Equity Trading Application

Responsibilities:

- ▶ Developed and maintained a **Master Data Management (MDM) application** to support the **creation, modification, and search** of business entities in response to **market fluctuations** and **regulatory changes**.
- ▶ Contributed to a **mock project** in multiple roles—primarily as a **developer**—gaining **end-to-end development experience** and fostering strong **team collaboration** skills.
- ▶ Designed and implemented an **Equity Trading Application** for **portfolio managers**, streamlining **trade execution workflows** and improving **equity management** capabilities.
- ▶ Enabled the management of **multiple equities** and provided functionality for **real-time trading**, enhancing **portfolio performance tracking** and **data-driven decision-making**.
