SUMMARY

Front-End Web Developer with 9 years of experience designing and developing scalable, high-performance web applications across healthcare, finance, and enterprise domains. Expert in Angular (6–15), JavaScript, TypeScript, HTML5, CSS3, and responsive design with a proven track record of building reusable UI libraries, optimizing application performance, and delivering mobile-first solutions that drive user engagement. Skilled in Agile/Scrum methodologies, collaborating across cross-functional teams, mentoring junior developers, and contributing to design systems that ensure scalability and consistency. Recognized for problem-solving, debugging complex UI issues, and improving system reliability.

TECHNICAL SKILLS

- **Frameworks & Libraries :** Angular, Bootstrap, MVC, Material UI, RxJS, NgRx, jQuery
- **Languages :** JavaScript (ES6), TypeScript & C# (basic)
- **Back-End & APIs:** RESTful APIs
- **Development Tools:** Git, GitHub, Bitbucket, VS Code
- **Build & Deployment:** NPM, Webpack, Angular CLI, Azure DevOps, Docker (basic)
- **Testing:** Jasmine, Karma, Jest & Selenium
- **Methodologies:** Agile/Scrum, CI/CD, Test-Driven Development (TDD)
- **Other Skills:** Performance optimization, Cross-browser compatibility, Responsive design

WORK EXPERIENCE

Sr. Software Engineer, KIPP Foundation
San Francisco, California, United States

Jan 2023 - Present

- Designed and delivered complex, user-friendly interfaces in Angular and TypeScript, ensuring cross-browser and mobile responsiveness.
- Worked on the web Application using by HTML5, CSS3, JavaScript, Angular material, Flex, Bootstrap, Angular v18
- Implemented advanced performance optimizations such as lazy loading and code splitting, reducing load time.
- Partnered with product managers and designers to translate business requirements into technical solutions.
- Ensured high code quality by writing comprehensive unit tests, achieving over 80% code coverage
- Reviewed pull requests, recommended best coding practices, and mentored junior developers to enhance code quality.
- Used POSTMAN to check the response of various API's, Swagger UI as a visual documentation for back-end contract.

Sr. Software Engineer, Cigna
New Jersey, United States

Mar 2021 - Dec 2022

- Created Single Page Application (SPA) using Angular2, 5 & 6 UI-Route, Dependency Injection design pattern on Controller and Services for shared data between controllers.
- Involved in requirement gathering, designing mockups, development, Code Reviews, and unit testing.
- Built and enhanced core application modules using Angular and REST APIs.
- Involved with designers and developers to execute creative, visually stunning, front-end Grids for web-based applications and web sites/portal.
- Work on CSS in building layouts and styling and animating HTML elements.
- Designed both template based and Reactive Forms with cross field custom form validations.
- Created Custom Pipes to filter data on template and using built-in Pipes along with them, also implemented filtering, sorting methods to display the ordered list based on status of order.
- Implemented HTTP requests using RxjsObservable library to handle multiple values over time with resolve decorators.
- Build high performance semantic web pages with full cross browser support to create top-notch websites.
- Contributed to documentation, ensuring clear knowledge transfer within the team.
- Used optimization techniques to reduce page size and load times to enhance user experience using sprites.
- Interacted with Testing, Team, Scrum master's and Business Analysis for fixing of issues. Provided training for new joiners.
- Performed the System Testing, Regression Testing for complete UI after fixing the issues which are reported by Testing Team.

Software Engineer, Komatsu America corporation
Chicago, IL, United States

May 2018 - Dec 2020

- Integrated third-party services and APIs, expanding application functionality.
- Conducted code reviews and provided technical guidance to junior engineers, improving code quality across the team
- Collaborated with QA teams to identify and resolve defects, reducing post-release bugs by 90%.
- Used REST client / POSTMAN to check the response of various API's, Swagger UI as a visual documentation for back-end implementation and client-side consumption. Handled various exceptions based on the response.
- Persisting Authorization status across page refresh, developing Granular Level Data Caching and bootstrapping the application.
- Utilized Angular Components like Providers, Directives, factories, and services used the application.
- Used Angular Components to control Page data and Models to bind in user interface with controller.

- Built filters and custom directives, factories, filters, services in Angular to provide better search.
- Develop the front-end components based on provided design.
- Designed CSS templates for use in all pages on the website working with CSS background, Margin, Padding.
- Daily meetings with backend engineering manager for UI integration, code review, testing plans and demos.
- Version controlled via GitHub, Jira for Issue tracking
- Used optimization techniques to reduce page size and load times to enhance user experience.
- Effectively participated in all the Agile ceremonies like daily standup, Iteration planning, Backlog grooming, Huddle and Retrospective meetings.

Jr Software Engineer, DWP Global Corp

Aug 2012 - Jan 2016

Hyderabad, Telangana, India

- Developed and maintained basic web application features using HTML, CSS, and JavaScript under close mentorship.
- Wrote clean, well-documented code following industry best practices.
- Participated in daily standups and sprint planning, gaining hands-on experience in Agile development processes.
- Assisted in debugging and fixing minor issues, improving application stability and user satisfaction.
- Build an custom HRMS using JavaScript and C#
- Coordinated with QA testers for end-to-end unit testing and postproduction testing.
- Extensively used debugging tools such as Firebug and IE Dev tools to investigate the issues and fix the bugs
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Developed the front-end components based on provided design
- Developed common UI components like Navigation Tab, Progress Bar, Menu and Search etc.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

June 2008 - May 2012

Guru Nanak Institute of Technology

ACCOLADES

- Received the "Above & Beyond Excellence" Award for outstanding contributions to project innovation, DWP Global Corp.
