Dallas, TX, 75074

Data Analyst with extensive experience in statistical modeling, data analysis, and machine learning. Proven track record in academia and industry, with practical applications in health science, industrial engineering, and business administration. Expertise in R, Python, and data visualization tools. Innovative Data Scientist with over 5 years of experience in machine learning, data analysis, and statistical modeling.

- Adept at collaborating with cross-functional teams and communicating complex information to diverse stakeholders.
- Analyze complex datasets, identify patterns, and develop statistical models that provide accurate insights.
- Lectured on computer applications, operations research, data analysis, and statistics at undergraduate and graduate levels.
- Ten years of experience with the R programming language and its data analysis packages like ggplot2, dplyr, tidyverse, rMarkdown, knitr, tinytex, RPostgreSQL, RPostgres, DBI etc.
- Creating complex charts, dashboards and databases.
- Perform statistical analysis, develop graphics and tables for publication and presentation.
- Design and customize reproducible reports via using R Markdown based on data in the database.
- Solving heuristic optimization and Multi-Criteria Decision-Making problems.
- Developing machine learning models for data.

EDUCATION

Istanbul University, School of Business (AACSB Accredited –Top Ranked Business School in Turkey)

Ph.D. in Quantitative Methods 2013 - 2018

M.S. in Quantitative Methods 2011 – 2013

Selcuk University

B.B.A. in Business Administration 2005 – 2009

WORK EXPERIENCE

Vuoksi - Write and review AI generated instructions November 2024 - Present

Write instruction commands, review and edit responses generated by a large language model (LLM) (an artificial intelligence algorithm that uses deep learning techniques to analyze and understand human language). This project requires a great deal of creativity, as the objective is to gather a wide range of prompts that people might enter into an open domain chatbot.

Gazi University, Faculty of Sciences, Department of Statistics

Assoc. Prof. Dr. January 2022 - July 2024

Assistant Prof. Dr. March 2021 – January 2022

I served in the Department of Statistics at Gazi University's Faculty of Science, where I focused on teaching applied statistics, data science, and programming courses, including Database Management Systems, Python and R Applications in Data Science, and Spreadsheets.

During this time, I conducted research in multi-criteria decision-making and machine learning, developing practical tools and R packages for statistical analysis. My role also included supervising student projects and fostering interdisciplinary collaborations to apply statistical methods to complex real-world challenges.

Gumushane University, Faculty of Economic and Administrative Sciences

Assistant Prof. Dr. July 2018 – March 2021

Research Assistant, Ph. D. January 2018 – July 2018

I taught a range of courses including Spreadsheet Applications in Business, Computer Applications in Business, Introduction to Programming with R, Quantitative Methods in Health Sciences, Statistics, Operations Research, and Data Analysis with R Programming.

These courses focused on practical applications and equipped students with essential skills in quantitative methods and data analysis, fostering a strong analytical foundation for future careers.

Istanbul University, School of Business

Research Assistant, May 2011 – January 2018

I contributed to teaching courses in statistical analysis, operations research, and data science applications. My role involved supporting both undergraduate and graduate students in developing a solid foundation in quantitative methods, and I conducted research focusing on multi-criteria decision-making and optimization techniques. This experience allowed me to gain in-depth expertise in applied statistics and analytical methodologies essential for data-driven decision-making.

EXPERTISE

Machine Learning, Data Visualization, R Programming Language, Python, Tableau, PostgreSQL, SPSS, Matlab, Microsoft Excel, RMarkdown, Optimization, Quantitative Methods, Teaching, Operations Research, ETL, Business Analysis

BOOKS

Ozdemir, M. (2020). **Programming with R and Machine Learning**. NOBEL Academic Publication

Celikbilek, Y., & Ozdemir, M. (2020). **Multi-Criteria Decision-Making Methods with Annotated and Comparative Health Sciences Practices**. NOBEL Academic Publication

PROJECTS

ShinyApp Developer

<https://muhlisoz.shinyapps.io/dematel/>

R Package Developer

dematel : Developed to Solve the Multi- Criteria Decision-Making Problems with Decision Making Trial and Evaluation Laboratory Technique in R.

cccm : Calculates the credit debt for the next period based on the available data using the Cross-Classification Credibility Model.
