Professional Summary

Proven Oracle DBA with 14+ years of experience in managing large-scale production databases, adept at proactive performance optimization, disaster recovery planning, and database consolidation initiatives across diverse environments. Oracle DBA with extensive expertise in administering complex database architectures, including Oracle Exadata, RAC and Data Guard, with a strong focus on ensuring high availability and data integrity. Experienced Oracle DBA skilled in database design, implementation, maintenance, and troubleshooting.

PROFESSIONAL SKILLS

- RDBMS: Oracle 10g to 19c (RAC/ASM), MSSQL, PostgreSQL,
- Data Migration Tools: AWS SCT/DMS, Ora2PG, EDB MTK,
- Data Replication: Oracle Golden gate, Data Pump, log shipping,
- Development and Monitoring: SQL Developer, TOAD, PgAdmin, SQL Workbench, OEM, PEM.
- Data Security & Backup: Oracle Advanced Security, RMAN, Data Guard, Flashback, NetBackup, TDE
- Tools & Platforms: Oracle RAC, Oracle Exadata, Azure, AWS, Google, OCI

CERTIFICATIONS

- Microsoft Azure Fundamentals - AZ-900 – July 2023
- AWS Certified Solutions Architect – Associate–July 2021
- GCP - Associate Cloud Engineer–Oct 2021

WORK EXPERIENCE

ORION INNOVATION – *Remote*

05/2023 - 12/2024

Senior Oracle Database Administrator

Responsible for pre-sales engagement to review customer requirements and provide solutions.

- Spearheaded the migration of 500+ instances from Oracle 11g/12c to 19c, ensuring seamless transition and zero downtime, optimizing system performance by 30%.
- Designed and implemented a new data warehousing solution with Oracle Exadata, enhancing analytics capabilities and improving query performance by 50%.
- Mentored a team of 10 DBAs, enhancing team productivity by 25% and reducing incident response times by 40%.
- Collaborated with cross-functional teams to establish a company-wide backup and disaster recovery plan, reducing potential data loss risk by 90%.
- Strong experience in Oracle Core Database administration and monitoring including · Exposure to Performance of Exadata.
- Managing and maintaining Oracle Exadata databases hosted on Exadata Cloud Infrastructure.
- Configured Goldengate downstream Mining and integrated components for Active-Passive and Active-Active replication.

Lead Database Administration

- Increased database availability to 99.9% uptime by implementing Advanced Replication with an automated failover strategy.
- Optimized PL/SQL scripts and storage procedures to improve application response time by 35%, significantly improving user satisfaction
- Worked with ServiceNow to evaluate ticket volumes to estimate workload and resource requirements.
- Conducted regular meetings with customers to understand challenges, requirements for onboarding and steady state support to develop action plans to improve adaptation and improve customer value.
- Collaborated with teams to develop build standards, analyze potential issues during migration and provided solutions to replicate data to prevent delays during migrations.
- Supported database upgrade processes, helping to reduce average execution time by 10% through efficient planning and execution.
- Integrated end to end backup and monitoring tool into operational acceptance state.
- Automated database maintenance tasks resulting in 25% productivity increase.
- Coordinated deployments of new software, feature updates and fixes to ensure client systems were up-to date.
- Proactively engaged with clients to address issues to minimize churn and mitigate risks.

Verizon Data Services – India

12/2010 – 08/2017

Consultant-Database Administrator

Responsible for physical database administration of over 100 databases for several external clients.

- Proactively monitored databases, supported db activities and resolved database issues.
- Increased system performance by 25% with database tuning and reorgs.
- Executed daily database administration tasks on 20+ client Oracle databases, contributing to a consistent performance across the company's IT infrastructure.
- Performed database installations, and setup new instances and databases.
- Applied database fixpacks and performed database upgrades to mitigate vulnerability.
- Created scripts and step by step documents for system integration and maintenance tasks.
- Setup High Availability Disaster Recovery and supported TSA for automated failovers.
- Analyzed database performance using tools and utilities to tune SQL queries, improve database backup duration for large databases.

Infinite Computer Solution – India

02/2010 – 12/2010

ORACLE DATABASE ADMINISTRATOR

Responsible for physical database administration of Oracle databases for external accounts.

- Installed and configured oracle database instances. Supported incidents, problems and changes for various customers. Provided 24X7 support for critical applications.

EDUCATION

Bharathidasan University – Tamil Nadu, India

Master of Computer Application (MCA), 04/2008
