What I Do Best

Strategic Leadership: Help organizations navigate technology changes and transformations | Focus on delivering real business value and ROI.

Client Relationships: Work well with large enterprise clients and executives | Strong at presentations and explaining complex concepts simply.

Program Delivery: End-to-end project implementation | Leading diverse technical teams | Managing risks and keeping things on track.

Technical Consulting: Understanding both the technical capabilities and business needs | Specializing in monitoring,

Additional Experience

Business Consulting: Enjoy working with different industries to understand their challenges and translate business requirements into technical practical solutions.

Data Projects: Led several large-scale data migration projects, including moving legacy healthcare systems to modern platforms that taught me the importance of careful planning.

Integration and Automation: Developed custom solutions to connect different enterprise applications and automate manual processes, to make operations more efficient.

Trainings: Regularly delivered corporate training sessions on databases, applications, and project management, helping me stay sharp and learn new perspectives.

Personal Projects: In my spare time, I work on AI/ML projects and mobile app development, which keeps me connected to emerging technologies and different development approaches.

Professional Summary

Experienced Project and Program Manager with over 20 years helping large organizations implement and adopt complex technology solutions. I've spent my career working directly with enterprise clients, guiding them through digital transformations and ensuring they get real value from their technology investments. My background spans both the technical and business sides — from database administration to strategic planning which helps me bridge the gap between what technology can do and what businesses actually need.

Key Technical Expertise

Program & Project Mng: Agile, Waterfall, hybrid approaches, planning & digital transformation.

Monitoring & Performance: Application Performance Mng, ITSM, infra monitoring solutions.

Project Tools: CA PPM, MS Project, Smartsheet, Jira and various project tracking platforms.

Databases: Oracle, SQL Server, MySQL; administration, tuning and backend development.

Enterprise Software: Experience SaaS solutions, ERP systems, security tools and Cyber security — such as: IDAM, PAM, DLP, Risk & MFA, Threat analytics and Automation.

Infrastructure: Data centers, Windows/Linux environments, middleware: IIS & WebSphere

Employment

IT Programs & Projects Manager | Broadcom Software (MBCOM) | Jun 2018 – Aug 2025

- Managed complex technology programs for major enterprise clients across CA, Automic, Symantec & VMware products, working closely with IT teams ensure successful implementation
- Led multi-million-dollar programs using various project methodologies (Agile, Waterfall, hybrid), coordinating teams of 50+ people across different time zones and departments.
- Regularly presented to C-level executives on project progress and strategic technology roadmaps, helping clients understand how these tools would improve their operations.
- Focused heavily on monitoring and observability solutions, helping clients better understand their application performance and infrastructure health.
- Built standardized processes for project delivery that significantly improved the company success rates and made implementations smoother for both our teams and clients.

IT Projects & Services Manager | CA Technologies – MENA Region | May 2015 – Jun 2018

- Managed large-scale implementations of CA's enterprise software suite including Service Management, Access Management, and Application Performance and Cyber Security tools.
- Worked directly with client IT teams and business stakeholders to understand their challenges and design solutions that actually worked for their specific environments.
- Created KPI frameworks to track both technical performance and business outcomes, presenting quarterly reviews to leadership teams
- Became the go-to person for helping clients maximize their software investments, which often led to additional projects and expanded relationships.
- Translating complex technical capabilities into business language.

Project Manager | Computer Network Systems (CNS) – UAE | Nov 2012 – Apr 2015

- Led infrastructure and data center projects from initial planning through go-live, including disaster recovery setups and network configurations.
- Managed relationships with clients, ensuring projects stayed on track and met requirements.
- Keeping stakeholders aligned when dealing with complex projects involving multiple vendors.
- Delivered comprehensive project documentation & status updates to sponsors/executive teams.
- These projects taught me the importance of thorough planning and clear communication, especially when dealing with mission-critical infrastructure

Team Leader & Database Administrator | Al Otaiba Enterprises– UAE | Nov 2010 – Oct 2012

- Set up and maintained Oracle, MySQL, and SQL Server databases for business operations, focusing on keeping everything running smoothly and performing well.
- Got involved in the sales, did demos and presentations for potential clients, which helped me understand how to communicate technical concepts to business audiences.

Implementation Specialist & DBA | Emirates Technologies– UAE | Feb 2003 – Oct 2010

- Implemented hospital information systems (Medicom, Cerner, Meditech) that directly impacted patient care and hospital operations.
- Managed the databases and applications that these critical systems ran on, ensuring healthcare providers could access patient information when needed.
