Professional Summary

Experienced Product Owner and Technical Business Analyst with over 10 years of experience in tech, retail, and banking industries. Adept at bridging business needs with technical solutions through root cause analysis, stakeholder communication, and SDLC methodologies. Skilled in end-to-end project management, user story creation, and testing, including manual, performance, and regression testing. Proficient in SQL, Agile and Waterfall environments, and technical documentation. Proven track record of enhancing operational efficiency, ensuring high-quality deliverables, and driving continuous improvement through collaboration and adherence to quality standards.

Professional Experience

Joy International Market & Asian-Oriental Food Market

Business Operation Manager

Feb '21 - Present

- Oversaw daily operations of a grocery store, including sales, customer service, inventory management, vendor management and accounting. Developed and executed marketing campaigns to increase foot traffic and promote the business.

Love, Bonito Pte Ltd

Junior Product Manager

Jun '19 - Oct '20

- Led product ownership for key internal tools, including AirTable, SAP, Amazon S3, Magento, and WMS, utilizing advanced MS Excel capabilities to optimize and enhance daily business operations.
- Conducted in-depth data analysis using Tableau, Metabase, and other visualization tools, delivering tailored reports to support strategic decision-making and generating automated reports to proactively monitor and address unusual process behaviors.
- Collaborated with stakeholders to gather and analyze feedback, proactively researching emerging technologies to recommend innovative tools that improve organizational systems.
- Developed and documented user stories, test cases, and backlog priorities while overseeing SIT/UAT processes, including defect tracking and exit criteria management to ensure flawless product delivery.
- Addressed recurring operational challenges, such as returned orders, by designing and implementing automated solutions to reduce manual workload and human errors.
- Created an internal feedback and requirement collection system, enabling employees to transparently monitor progress and follow up on action items.

DBS Bank

Business Analyst/Product Owner/ QA Analyst

May '18 - May '19

- Directed the validation and verification of test procedures, enhancements, and modifications across multiple subsystems, ensuring flawless functionality and compliance with technical specifications.
- Conducted comprehensive requirement analysis, reviewed Business Requirement Documents (BRDs), and developed Functional Specification Documents to align with project objectives.
- Collaborated with cross-functional teams on Agile and Waterfall SDLC projects, managing tasks such as UAT, defect and ticket tracking, and securing approvals to deliver timely, high-quality outcomes.
- Authored detailed test strategies, plans, and scenarios, performing rigorous system, API, and usability testing, troubleshooting issues, and conducting root cause analysis to resolve defects.
- Executed performance testing and defect management using tools like Jira, ALM, and SQL, while maintaining thorough documentation and facilitating training sessions to align teams with project goals.
- Developed and implemented test plans, serving as a UAT tester for high-impact projects, ensuring data integrity and functionality through meticulous validation processes.

The HourGlass Pte Ltd

Web Developer

Oct '17 - May '18

- Designed, developed, and maintained multiple brand websites ensuring alignment with organizational goals and standards.
- Acted as a liaison between internal and external stakeholders to identify requirements, document meeting outcomes, and maintain project roadmaps effectively.
- Created customized email templates and managed eDM campaigns to support new product launches and marketing initiatives, meeting the needs of marketing, brand, and customer management teams.
- Successfully launched new brand websites and facilitated the migration of legacy websites to a modern e-commerce platform, enhancing functionality and user experience.

DBS Bank Singapore

Webmaster/Analyst

Aug '14 - Sep '17

- Facilitated new product launches and marketing campaigns by creating webpages, landing pages, and updating the company's public websites using the SharePoint ECM system.
- Enhanced user experience by updating frontend interfaces for major banking applications, websites, and branch locator pages while performing Unit, System Integration, and User Acceptance Testing for backend systems.
- Designed and developed microsites, email templates, eDM schedules, and customer registration forms to support strategic business objectives and improve the customer journey.
- Streamlined Business-as-Usual (BAU) operations by managing the company's internal ticketing system, setting SLAs to ensure efficient resource allocation and timely issue resolution.

Nanyang Optical Pte Ltd

Web Developer

May '12 - Aug '14

- Designed, developed, and maintained static and CMS-based websites, ensuring alignment with business goals.

iclick Media

Web Developer
