

PROFESSIONAL SUMMARY

Full Stack Java Developer with 4+ years of experience designing, developing, and deploying secure, scalable, and high-performance enterprise applications across finance, healthcare, and technology domains. Proficient in Java 21, Spring Boot 3, Angular 17, React.js, and micro services architecture. Experienced in building cloud-native systems using AWS and Azure, containerization, and CI/CD automation. Skilled in optimizing database performance, implementing distributed caching, and developing reactive APIs for low-latency systems. Strong expertise in OAuth2.1, OpenID Connect, JWT, and compliance with PCI-DSS, SOX, and HIPAA standards. Adept at Agile/SAFe methodologies, mentoring developers, and translating complex business requirements into scalable technical solutions.

- TECHNICAL SKILLS**
- **Programming Languages:** Java 21/17/11, TypeScript, JavaScript, SQL, PL/SQL
 - **Frameworks & Libraries:** Spring Boot 3, Spring Cloud, Spring Security, Hibernate/JPA, Spring Batch, RxJS, React.js, Angular 17
 - **Microservices & APIs:** RESTful APIs, Reactive APIs, Domain-Driven Design (DDD), Event-Driven Architecture, Kafka, OAuth2.1, OpenID Connect, JWT
 - **Cloud & DevOps:** AWS (EKS, ECS, RDS, Lambda, S3, DynamoDB, CloudFront), Azure (App Services, AKS, Blob Storage, Cosmos DB), Kubernetes, Docker, ArgoCD, Jenkins, GitHub Actions, GitOps, Istio, Linkerd
 - **CI/CD & Release Management:** GitHub Actions, Jenkins, ArgoCD, Blue-Green Deployments, Canary Deployments, GitOps
 - **Databases:** PostgreSQL, Oracle, MongoDB, Redis, DynamoDB
 - **Caching & Performance:** Redis, Spring Cache, Caffeine, Query Optimization, Indexing, Profiling
 - **Monitoring & Observability:** Micrometer, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Logging & Tracing
 - **Testing & Quality:** JUnit 5, Mockito, Testcontainers, JMeter, SonarQube
 - **Security & Compliance:** OAuth2.1, OpenID Connect, JWT, Keycloak, RBAC, PCI-DSS, SOX, HIPAA
 - **Agile & Collaboration:** Scrum, SAFe, Sprint Planning, Backlog Refinement, Code Reviews, Pair Programming
 - **Other Tools:** Apache Kafka, FHIR, HL7 APIs, Data Visualization, Documentation

- PROFESSIONAL EXPERIENCE**
- Purevisitx, Austin, TX | Java Full Stack Developer | July 2024 – Present**
- Designed RESTful and reactive APIs using **Java 21**, **Spring Boot 3**, and **Spring Cloud** with secure authentication via OAuth2.1, OpenID Connect, and JWT (Keycloak).
 - Architected and deployed microservices leveraging **AWS cloud services** including **EKS, ECS, RDS, S3, Lambda, DynamoDB, and CloudFront**, achieving high availability and cost optimization.
 - Executed distributed caching with **Redis** and **Spring Cache**, reducing API response latency by 60% during peak load.
 - Optimized **PostgreSQL** performance using query tuning, indexing, and ORM optimization, cutting report generation time by 80%.
 - Computerized CI/CD pipelines using **GitHub Actions**, **ArgoCD**, **Docker**, and **Kubernetes**, enabling blue-green and canary deployments with zero downtime.
 - Expanded Angular 17 front-end modules with RxJS and reusable UI components, reducing UI defects by 30%.
 - Incorporated **Micrometer**, **Prometheus**, and **Grafana** dashboards with **ELK Stack** for monitoring and tracing, improving incident response by 45%.
 - Ensured 90%+ unit and integration test coverage using **JUnit 5**, **Mockito**, and **Testcontainers** validated via **SonarQube** gates.
 - Mentored junior developers through pair programming and PR reviews, improving code quality and team efficiency.
 - Collaborated with architects and business stakeholders to implement **DDD-based models**, reducing requirement ambiguity by 35%.

- Citibank, New York, NY | Java Full Stack Developer | July 2023 – June 2024**
- Improved secure, scalable, and high-performance banking applications using **Spring Boot**, **Angular/React**, and REST APIs on **Microsoft Azure Cloud (AKS, App Services, Cosmos DB)** ensuring compliance with **PCI-DSS** and **SOX**.
 - Applied **micro services-based architecture** for core modules like loans, payments, and onboarding, increasing scalability and reducing downtime by 30%.
 - Blended third-party APIs for payments, KYC verification, and credit scoring using resilient retry and circuit breaker patterns.
 - Created responsive UI dashboards with **Angular/React** for account management and fraud analytics used by 100K+ customers.
 - Optimized **Oracle**, **PostgreSQL**, and **Mongo DB** queries for high-transaction workloads, reducing response time by 40%.
 - Implemented secure identity and session management via **Spring Security**, **JWT**, and **OAuth2.1**.
 - Systematized CI/CD pipelines with **Jenkins**, **Docker**, and **Azure DevOps**, achieving zero-downtime production deployments.
 - Built **Spring Batch** pipelines for settlements, reconciliation, and report automation integrated with **Apache Kafka**.
 - Monitoring with **ELK Stack**, **Prometheus**, and **Azure Monitor** to proactively detect and resolve issues.
 - Reviewed code, mentored team members, and enforced best practices in security and performance optimization.

- GE HealthCare India, Bangalore, Karnataka | Java Full Stack Developer | October 2019 – December 2021**
- Developed healthcare systems on **Microsoft Azure** leveraging **App Services**, **Azure SQL**, and **Blob Storage** for patient data management and analytics.
 - Built Spring Boot and React.js modules for appointment scheduling, improving operational efficiency by 35%.
 - Merged **FHIR and HL7 APIs** for interoperability between internal systems and third-party EHRs.
 - Migrated legacy monolithic systems to **Azure-based microservices**, improving scalability and deployment reliability.
 - Enforced **RBAC (Role-Based Access Control)** for HIPAA-compliant access to sensitive medical data.
 - Enhanced real-time dashboards in **React.js** with data visualization components for clinicians, reducing report generation time by 40%.
 - Built batch pipelines using **Spring Batch** for large-scale data ingestion, reducing manual entry by 60%.
 - Automated CI/CD workflows using **Jenkins**, **Docker**, and **Azure Pipelines** for continuous deployment.
 - Collaborated with QA teams to implement automated testing frameworks, cutting post-release issues by 30%.
 - Participated in Agile ceremonies including sprint planning, retrospectives, and daily stand-ups ensuring timely deliverables.

EDUCATION

Master of Information Technology - **Hood College**
