PROFESSIONAL SUMMARY

Project Manager with 12+ years of experience in developing and implementing software solutions for enterprise clients including **T-Mobile, DHL, and Allstate**. Specialized in scaling **telematics platforms, web and mobile applications** with large user bases. **Redesigned Agile development processes**, cutting delivery time by 40% while maintaining quality standards. Drove 30% annual revenue growth over two years through strategic feature prioritization and efficient resource management across multiple product lines. Implemented innovations in the products of companies such as:

- **Modus Telematics**, one of the fastest growing providers of **telematics** and **IoT** solutions, **serving more than 425,000 users**
- **XvsX Sports**, sports events and media company **with \$10M annual revenue** that brings localized competitive basketball experiences
- **Drivewise from Allstate**, driver behavior mobile app **with 150,000 active users**
- **T-mobile. management tool** for corporate customers with a **\$15M market potential**

KEY ACHIEVEMENTS

- **Integrated new ERP and Management tools** into the business process, **reducing delivery time by half**
- **Took on product management responsibilities and led the development and launch of 20+ key features for a telematics platform**, including real-time asset tracking, sensor monitoring tools, and advanced reporting capabilities resulting in a 30% revenue increase over two years and a 10% reduction in customer churn
- **Developed an community app MVP** in two months for a key customer, securing a new contract and **generating \$150K in profit**
- **Prototyped an ML-powered dashboard** solution for the platform's reporting feature, enabling customers to generate required reports efficiently and **reducing data processing time by over 60%**
- **Implemented KPI management frameworks and CapEx/OpEx tracking procedures**, enhancing company-wide reporting accuracy and financial oversight, reducing month-end closing time, and **improving budget forecast accuracy to over 90%**

Expertise in **UX/UI design, data analytics & business operations, problem-solving & risk management, agile methodologies & IoT technologies - hardware & software**. Authorized to work for any U.S. employer without visa sponsorship – U.S. citizenship.

PROFESSIONAL EXPERIENCE

SR. PROJECT MANAGER

Aug 2021 – Oct 2024

Radius Telematics | Huntington Beach, CA

- Led the strategic development of core telematics platform capabilities, generating 80% of company revenue and maintaining a market leadership position despite aggressive competition in the evolving telematics space
- Developed and executed a comprehensive roadmap for Telematics and SaaS platforms based on an in-depth analysis of customer needs and market trends, enabling five new integrations with key B2B clients and increasing average customer LTV by 20%
- Managed customer feature requests from concept to release, attracting new target users and contributing to a 30% growth of the platform over the last two years. Defined and prioritized the product and sprint backlog and lead refinement sessions
- Developed and launched new internal platforms that optimized processes for support and sales teams by 30%, reducing management time for specific tasks by 3x
- Collaborated with corporate partners to develop a SaaS product that contributed 10% to the company's revenue, with a focus on API integration, security, and data processing
- Led the Design team in developing new products and rebranding existing ones
- Managed the end-to-end integration of 10+ new IoT devices into the corporate telematics solution, from initial research to final testing, expanding the addressable market by 15%

PROJECT MANAGER

May 2019 - Aug 2021

Modus Group from Radius Telematics | Huntington Beach, CA

- Assumed full ownership of key company products within three weeks of joining, demonstrating rapid learning and adaptability in a fast-paced environment
- Established structured project lifecycle management processes from initiation to implementation, reducing time-to-market from 5 to 4 weeks for new feature releases
- Collaborated with the support team to gain in-depth product knowledge and reduced ticket processing time by 30%
- Managed transitions for 5+ companies to the corporate white-label product
- Drove UAT through sprint planning, reducing sprint delivery time by 25%, conducting system demos, and leading daily triage meetings with development, design, and QA teams
- Applied Hybrid Agile methodology for requirements gathering, writing User Stories and defining Acceptance Criteria in JIRA
- Managed project risks, action items and decisions, proactively mitigating risks and resolving issues

LEAD PROJECT MANAGER

Feb 2016 - Mar 2019

Highcore Games | Miami, FL

- Established the management structure for a newly-formed mobile game development company
- Led a cross-functional project team of 10, including marketing, developers, designers, and QA
- Conducted a comprehensive mobile gaming market analysis, identifying an underserved niche in the Battle Simulator and Action genres, which led to the launch of a successful product with 0.6 million monthly active users and a 5-day retention rate higher than the market average
- Analyzed large datasets using BI systems (Tableau) to identify trends, optimize UA strategies, and contribute to product and creative improvements

- Practiced agile-oriented management style, favoring Kanban boards and promoting high-level team involvement in the decision-making process

PROJECT MANAGER

Oct 2011 - Feb 2016

McCann Erickson | East Europe

- Directed 5 key advertising campaigns for McDonald's, Danone, and P&G with combined budgets of \$250K, resulting in brand awareness increase among 0.5 million new customers and \$800K in additional sales within the quarter post-launch
- Managed development and promotion of an advertising agency, specializing in digital strategy, focusing on expanding client base and increasing ROI for business
- Managed a team of 6 people, providing guidance, feedback, and mentoring
- Played a key role in CRM projects, supporting IT and sales in implementing and optimizing new systems, ensuring alignment with the overall digital strategy
