

Nagireddy Revoori

Java Full Stack Developer

469-616-1426 | revoorinagireddy7@gmail.com | Grand Prairie, TX | LinkedIn

SUMMARY

Experienced Java Full Stack Developer with 3+ years of experience designing, developing, and deploying scalable web applications and microservices. Skilled in Java, Spring Boot, React.js, Node.js, and cloud platforms, with hands-on expertise in building responsive interfaces, secure APIs, and real-time data workflows. Adept at leveraging CI/CD pipelines, containerization, and monitoring tools to ensure high availability and performance. Collaborates effectively within Agile teams to translate business requirements into functional solutions, streamline workflows, and deliver impactful user experiences.

SKILLS

Programming Languages: Java 17, JavaScript (ES6+), TypeScript, Node.js

Backend Frameworks & Tools: Spring Boot, Spring Security, Spring Data JPA, Spring WebFlux, Express.js, RESTful APIs, GraphQL, OAuth 2.0, JWT

Frontend Frameworks & Tools: React.js, Redux, D3.js, HTML5, CSS3, Responsive UI Design

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, AWS RDS, Snowflake

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, EKS, Glue, API Gateway, Redshift), Docker, Kubernetes, Jenkins, AWS CodePipeline

Messaging & Streaming: Apache Kafka, RabbitMQ, AWS SNS

Testing & QA Tools: JUnit 5, Mockito, Selenium WebDriver, Jest, Mocha, Chai, Postman, Gatling

Monitoring & Analytics: Prometheus, Grafana, AWS CloudWatch

Other Tools & Skills : Microservices Architecture, CI/CD Pipelines, Containerization, Agile & Scrum Methodology

EDUCATION

Masters in Information Technology and Management

Dec 2024

Dallas Baptist University, USA

Bachelor of Technology in Computer science and Engineering

July 2022

Vaagdevi Engineering College, India

EXPERIENCE

Centene, USA

Jun 2024 – Present

Java Full Stack developer

- Engineered scalable microservices for member registration, claims processing, and eligibility verification, improving portal responsiveness by 55% while leveraging Java 17, Spring Boot, and Spring Data JPA.
- Designed interactive dashboards and reporting modules using React.js and D3.js, enabling real-time analytics that enhanced provider decision-making by 50%.
- Implemented secure authentication, role-based access, and compliance measures with Spring Security and OAuth 2.0, ensuring HIPAA-compliant protection of sensitive patient data.
- Integrated multiple healthcare systems and real-time data streams with Apache Kafka, automating claims routing and analytics workflows to reduce manual processing by 40%.
- Built and deployed containerized applications with Docker and Kubernetes, managed CI/CD pipelines with Jenkins and AWS CodePipeline, achieving 99.9% uptime and faster deployment cycles.
- Collaborated in Agile teams to translate business requirements into functional modules, driving 45% faster development of member management and analytics features, while monitoring performance using Prometheus and Grafana.

EncodeTesters, India

Oct 2020 – Dec 2022

Software Engineer

- Developed backend services and microservices for student, course, assignment, patient, and appointment management, enhancing overall system efficiency by 60% while leveraging Core Java, Node.js, and RESTful APIs.
- Engineered interactive dashboards and portals for students, teachers, administrators, and patients, enabling real-time tracking and improving access to critical information by 55% using React.js and dynamic UI frameworks.
- Implemented secure authentication, role-based access, and compliance mechanisms, ensuring protection of sensitive academic and medical data while streamlining user workflows.
- Integrated cloud storage and database solutions for structured and unstructured data, automating file handling and notifications to improve user engagement by 50%, utilizing AWS S3, RDS, and DynamoDB.
- Built and deployed containerized microservices with CI/CD pipelines, orchestrated deployments, and monitoring, achieving high availability and reduced downtime while accelerating delivery cycles, using Docker, Kubernetes, Jenkins, Prometheus, and Grafana.
- Collaborated in Agile teams to translate requirements into functional modules, executing end-to-end solutions that reduced manual workload by 45% and improved cross-functional collaboration, while managing real-time workflows with Apache Kafka and RabbitMQ.
