

EDUCATION

Arizona State University, Tempe, AZ MS Information Technology, GPA: 4/4 Courses- Principles of Computer Information and Technology, Data in the Cloud, Analysing Big Data, Advanced Database Management Systems	Aug 2023 - Present
NMAM Institute of Technology, Nitte, India Bachelor of Engineering in Information Science and Engineering, CGPA: 8.04/10 Courses- Object Oriented Programming (OOP) using C++, Advanced Networking, Data Structures and Algorithms (DSA), Operating Systems, Unix Programming, Shell Scripting	Aug 2018 - June 2022

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Mesh Connect Inc., San Francisco, United States - Developed and optimized backend services and APIs using C#/.NET, improving response time by 10%. - Spearheaded the development of a sandbox environment for clients, increasing customer conversion by 15%. - Designed and implemented infrastructure as code (IaC) solutions using Terraform and Kubernetes for scalable cloud deployments. - Effectively collaborated in a globally distributed team using Agile methodologies, participating in cross-timezone sprint planning, stand-ups, and retrospectives to ensure timely feature delivery.	May 2024 - August 2024
Programmer Analyst, Cognizant Technology Solutions Corp, Bangalore, India - Designed and deployed cloud-based data pipelines using AWS Glue, Snowflake, and Apache Spark. - Developed ETL pipelines to process and analyze large datasets, improving data accuracy by 10%. - Optimized Linux-based environments for high-performance computing, implementing custom networking configurations and storage optimizations that improved system performance by 10%. - Automated data workflows using Python and SQL, reducing manual intervention by 30%.	Sept 2022 - June 2023
Cloud Data Intern, Cognizant Technology Solutions Corp, Bangalore, India - Built and managed Google Cloud infrastructure, provisioning VMs, storage solutions, and Kubernetes clusters. - Developed Python-based automation scripts to optimize cloud resource utilization, reducing costs by 5%. - Implemented CI/CD pipelines with Jenkins and Docker, accelerating deployment time.	Mar 2022 - Sept 2022

PROJECTS

Kubernetes-Based Cloud Infrastructure for Scalable Applications - Designed and deployed highly available Kubernetes clusters using AWS EKS and GCP GKE. - Architected and implemented distributed storage solutions using Ceph, handling data replication and recovery across geographically distributed clusters. - Automated infrastructure deployment with Terraform, Helm Charts, and Infrastructure as Code (IaC) principles. - Designed and implemented disaster recovery solutions for containerized applications in multi-cluster Kubernetes environments, achieving 99.9% availability and < 5-minute recovery time objectives".
Cloud-Based Monitoring & Alerting System - Developed a Prometheus-Grafana monitoring stack for real-time visualization of application metrics. - Used the monitoring tool Grafana to visualize various metrics like the load on the system, health, and the status of the pipelines and built interactive dashboards to display and monitor them. - Integrated Slack and PagerDuty alerts for critical system events. - Optimized resource allocation using PromQL and auto-scaling policies.

SKILLS AND CERTIFICATIONS

Languages: Python,C#/.NET, C/C++, SQL, Bash
Technical: SQL: PostgreSQL, OracleDB Cloud: GCP, AWS Linux: Ubuntu, Arch Data Warehousing: BigQuery, Snowflake Infrastructure as Code (IaC): Docker, Kubernetes, Terraform, Helm Monitoring: Prometheus & Grafana CI/CD: Jenkins, Git Data Pipelining: Kafka, Airflow Networking: TCP/IP, UDP, REST Dashboards: Tableau, PowerBI
Certifications: - Google Cloud Certified Associate Cloud Engineer (From Google) earned in August 2022 - Big Data Essentials: HDFS, MapReduce, and Spark RDD (With Honors from Coursera) earned in April 2021 Architecting with Google Compute Engine Specialization, a 5-course specialization by Google Cloud earned in April 2021
