

Natalya Budnik

Software QA Engineer

North Miami Beach, FL | (305) 218-2726 | qa.nataw@gmail.com | linkedin.com/in/natalya-budnik

Software QA Engineer with **4+ years of experience** in quality assurance, manual & automated testing, across various testing types and multiple platforms. Managed comprehensive test cases in **TestRail** and tracked defects efficiently using **Jira**. Proven ability to improve product quality, reduce production bugs and accelerate delivery in **Agile** teams.

TECHNICAL SKILLS

- **Testing Types:** Functional, Regression, Usability, Compatibility, Cross-browser, UX/UI, User Acceptance (UAT), Smoke, Sanity, End-to-end (E2E), API testing
- **Test Management & Defect Tracking:** Jira, TestRail
- **Methodologies:** Agile (Scrum, Kanban), SDLC, STLC
- **Testing Tools & Frameworks:** Selenium WebDriver, PyCharm, PyTest, Behave (Cucumber), Gherkin, Allure, Charles Proxy, BrowserStack, DevTools
- **Programming Languages & VCS:** Python, HTML/CSS, Git, GitHub
- **API & Database Testing:** Postman, REST API, SQL, Oracle
- **Platforms:** Windows, macOS, Linux, iOS, Android

WORK EXPERIENCE

QA Automation Engineer

Reelly.io | Remote

October 2024 – Present

- Developed and maintained **100+ automated test scripts** using **Selenium WebDriver**, **Python**, and **Behave (BDD)** to ensure the reliability of Reelly's platform, which connects over 30,000 agents with 1,350+ real estate projects
- Executed **cross-browser, multi-platform testing** using **BrowserStack** ensuring stable performance on Chrome, Firefox
- Managed version control with **Git/GitHub**, overseeing 3+ repositories and supporting daily workflows across feature branches
- **Evaluated software usability** using exploratory testing, identifying areas for improvement from an end-user perspective
- Researched customer issues by analyzing Jira tickets and support feedback, performed user acceptance testing (UAT) based on real-user scenarios, resulting in improved product quality
- Collaborated with **4+ cross-functional Agile teams** to review requirements and resolve issues prior to QA handoff
- **Increased team efficiency** by mentoring junior QA engineers and accelerating onboarding by 2 weeks

Software QA Engineer

Spirit Airlines | Miramar, FL

November 2020 – October 2024

- Performed manual **UI and functional testing** for web booking systems, creating test cases based on acceptance criteria and minimizing production bugs
- Led **REST API testing** with **Postman**, validating 150+ key endpoints for booking and flight management
- Queried and verified backend data using **SQL** in **Oracle**, checking the accuracy of flight records, customer profiles and booking confirmations for **1M+ of active user accounts**
- Participated in all Agile Scrum ceremonies to align QA activities with sprint objectives
- Coordinated **end-to-end** bug lifecycle in **Jira** and supported the team in resolving high-priority issues
- Enhanced user experience by running usability tests and collaborating with designers to improve UX in **5+ high-traffic workflows**, including flight search, seat selection and checkout for **20K+ daily users**
- Authored and maintained a structured QA documentation library with **800+ test cases**, test data sets and scenarios, lowering onboarding time for new QA team members by **30%**

EDUCATION

Bachelor's Degree in Management Organization, Karaganda State Industrial University
