

Naveen Reddy Kunam

Software Engineer

Boca Raton, FL | kunam.naveenreddy@gmail.com | +1(561) 817-6884 | [LinkedIn](#) | [GitHub](#)

SUMMARY

A highly skilled software engineer with **4+ years** of experience, specializing in **Python, Java, C++, JavaScript**, and **C#**, with expertise in **Spring Boot, Django/Flask, Angular**, and **React.js** for web development. Proficient in cloud platforms like **AWS and Azure**, and skilled in DevOps tools (**Docker, Kubernetes, Jenkins, Terraform**) for seamless **CI/CD pipelines**. Experienced in designing scalable systems using **Microservices, RESTful APIs**, and GraphQL, and adept at working with **SQL, NoSQL databases**. Strong advocate of **Agile methodologies**, with a proven track record of delivering robust, high-quality software solutions in collaborative environments.

TECHNICAL SKILLS

Core Languages: Python, Java, C++, JavaScript

Web Development Frameworks: Spring Boot, Django/Flask, Angular, React.js, HTML5, CSS3

Cloud Platforms & Services: AWS (EC2, S3, Lambda, RDS, DynamoDB), Microsoft Azure (Azure App Services, Azure Functions, Azure Kubernetes Service (AKS))

DevOps & CI/CD: Docker, Kubernetes, Jenkins, Git, Terraform

Databases: SQL (MySQL, PostgreSQL, SQL Server), NoSQL (MongoDB, Cassandra, DynamoDB)

Software Design & Architecture: Microservices, RESTful APIs, GraphQL, Message Queues (RabbitMQ, AWS SQS)

Testing & Quality Assurance: Unit Testing (JUnit, pytest), Test-Driven Development (TDD), Selenium, Jest/Mocha

Agile & Collaboration Tools: Agile/Scrum Methodologies, JIRA, Trello/Asana

Operating Systems & Development Environments: Linux/Unix, Windows, Virtualization (VMware, VirtualBox)

PROFESSIONAL EXPERIENCE

Uber | FL | Software Engineer

April 2024 – Present

- Designed scalable solutions using **AWS RDS** for relational databases and **DynamoDB** for **NoSQL** storage, optimizing efficiency and reducing query latency by **40%** for real-time applications.
- Produced and developed enterprise-grade applications using **Java** and **Spring MVC**, enhancing system scalability and reducing server response time by **20%**.
- Built dynamic, responsive user interfaces using **React.js**, **CSS3**, and **JavaScript**, enhancing user experience and improving front-end performance by **30%**.
- Implemented automated testing frameworks with **TestNG** and **Core Java**, improving test coverage by **35%** and ensuring robust, bug-free software releases.
- Created robust **ETL pipelines** using **Informatica PowerCenter** and **Talend**, streamlining data integration and improving processing efficiency for large-scale datasets.
- Engineered robust **CI/CD pipelines** using **Jenkins** and **Git**, streamlining **DevOps workflows** to accelerate software delivery by **40%** and enhance deployment efficiency.
- Enhanced code quality and reliability by implementing **Test-Driven Development (TDD)** with **JUnit**, resulting in a **25%** reduction in defects and improved test coverage.
- Facilitated and implemented Java-based **microservices architecture**, enhancing system scalability and performance, while developing **RESTful APIs** to ensure seamless communication between services.

Infosys | India | Software Engineer

November 2019 - April 2023

- Streamlined **DevOps pipelines** by implementing **CI/CD practices** with **Docker**, improving deployment efficiency by **30%** and ensuring seamless application delivery.
- Established a scalable web application leveraging **Django** for backend architecture, **Python** for robust scripting, and **MongoDB** for efficient data management, improving query performance by **35%**.
- Generated interactive and responsive web applications using **Angular**, **HTML5**, **CSS3**, and **JavaScript**, delivering seamless user experiences across devices.
- Implemented **Agile methodologies** and **Test-Driven Development (TDD)** across the **SDLC**, ensuring high-quality software delivery and reducing production bugs by **25%**.
- Configured and managed cloud-based solutions on **Microsoft Azure**, leveraging **Azure App Services** and **Azure Functions** to build scalable, serverless applications with reduced operational costs.
- Optimized data processing workflows with **Apache Spark** and designed scalable **Data Warehousing** solutions, enabling faster analytics and supporting business intelligence initiatives.
- Architected and implemented distributed systems using **ZooKeeper** for coordination and **Kafka Streams** for real-time data processing, enabling seamless event-driven workflows and improving data pipeline efficiency by **30%**.

EDUCATION

Master's in Computer Information Sciences,
Florida Atlantic University, Boca Raton, FL, USA.

Bachelors in Computer Science & Engineering,
CMR Engineering College, Hyderabad, Telangana, India.
