

Neelam Reddy

Full Stack .Net Developer

neelam.reddy656@gmail.com

+1 405-223-8754

<https://www.linkedin.com/in/neelam-reddy-marella-8ba6a2228>

Summary:

- Over 4+ years of experience in designing, developing, integrating, and implementing web applications using Microsoft .NET Technologies.
- Proficient in N-Tier application architecture, covering backend, middle tier, and frontend development.
- Expertise in ASP.NET MVC, Web API, Entity Framework (Code First), and SQL Server 2019 for building scalable, high-performance applications.
- Strong knowledge of WCF (Windows Communication Foundation) for service-oriented applications.
- Designed and developed Web Forms and Web Pages using various ASP.NET controls.
- Extensive experience with JavaScript, jQuery, AJAX, and client-side validations for enhanced UI/UX.
- Developed complex SQL queries, stored procedures, triggers, and cursors in SQL Server 2019.
- Worked with XML, XSLT, XPATH, HTML, DHTML, CSS, and AngularJS for Single Page Applications (SPA).
- Knowledge of HIPAA compliance, ensuring privacy and security of Protected Health Information (PHI) in healthcare applications.
- Hands-on experience in RESTful APIs and Web API development.
- Experienced in Microsoft Azure, including Virtual Machine (VM) setup, management, and troubleshooting.
- Strong experience in AJAX implementation to enhance application interactivity and performance.
- Customized and implemented Microsoft Application Blocks (Validation, Logging, Exception Handling, Data, and Security).
- Proficient in LINQ and ADO.NET Entity Data Model Framework.
- Hands-on experience in ETL and reporting using SQL Server Integration Services (SSIS) and SQL Server Reporting Services (SSRS).
- Designed and developed complex user interfaces (GUI) using ASP.NET MVC.
- Strong understanding of Object-Oriented Analysis and Design (OOAD), Model-View-Controller (MVC) architecture, and Agile (Scrum) development methodology.
- Expertise in ASP.NET MVC 6.2, including state management, security, action methods, and performance optimization.
- Experienced with version control and configuration management tools, including Git, TFS, SVN, and VSS.
- Proven ability to identify and resolve performance bottlenecks in web applications.
- Experience in mentoring development teams and assisting in software/hardware requirements for Development, UAT, and Production environments.
- Highly organized, detail-oriented, and capable of working independently or as part of a team to meet project deadlines.
- Excellent knowledge in Object Oriented analysis and design (OOAD), Agile Development Methodology and Model- View-Controller Architectures (MVC).
- Highly Knowledgeable in ASP.NET MVC 6.2 in implementing Model, View and Controllers with State Management, Security, Action methods etc.
- Experience in using Configuration Management tools like Visual Source Safe (VSS), SVN, Team Foundation Server (TFS), Git hub.
- Highly organized with the ability to meet deadlines and ability to work as a team player as

well as an individual.

- Work experience of Agile/Scrum methodology.
- Identify and correct performance issues in web applications.

Technical Skills

IDE	Visual Studio 2019/2017/2015/2013/2012/2010
Web server	Microsoft Internet Information Services – IIS (5.0/6.0/7.5/8.0)
Programming Languages	C#, VB.NET, JavaScript
.Net Technologies	.Net Framework 4.5.1/4.5/3.5/3.0 Asp.net (4.5/4.0/3.5/2.0/1.1/1.0), Web Forms, WinForms, Web Controls, Custom Controls, User Controls, Telerik Controls, Web Services, RESTful Web Services, Ajax, ADO.net, LINQ, WCF, EF code first & db. first, C# - OOP, C# - SOLID, C# - ORM, C# - Design Patterns, C# - Testing
Internet Programming	HTML5, Angular 1/2+, Node.js, ReactJS, XML, CSS3, XML, XSL, XSLT, WSDL, SOAP, JSON, jQuery, Bootstrap CSS, Typescript cocepts.
IDE	Visual Studio 2019/2017/2015/2013/2010
UI Frameworks	HTML5, CSS3, Angular JS, Angular 2/4/5/6/7/8/9/10/12, Node.js, RxJS, Redux
Version Control Tools	Team Foundation Server 2010, SVN, GIT

Professional Experience:

Client: Pomelo Care, New York, NY

Date: Oct 2023 – Present

Role: Full Stack .Net Developer

Responsibilities:

- Participated in various Software Development Life Cycle (SDLC) phases, including Requirement Analysis, Design, Development, Testing, and Documentation.
- Designed and developed abstract classes, interfaces, and business logic components using C# and ADO.NET.
- Utilized ASP.NET Core Dependency Injection to enhance application performance and reliability.
- Developed web applications using ASP.NET MVC, HTML, CSS, JavaScript, and Angular.
- Designed and built secure cloud & web applications using .NET and Azure PaaS technologies.
- Created and managed Azure API Apps for building RESTful APIs.
- Developed UI screens based on client specifications, ensuring alignment with business requirements.
- Built reusable Angular components such as headers, footers, alerts, and communication modules.
- Upgraded Single Page Application (SPA) from Angular 13 to Angular 14.
- Integrated front-end with back-end RESTful APIs using Angular and HTTP client services.

- Created Web API controllers in ASP.NET MVC to develop and maintain RESTful APIs, consuming them with Angular data binding.
- Implemented AJAX calls for seamless UI interactions, fetching JSON responses from backend services.
- Developed microservices-based Web APIs using ASP.NET Core, integrating them with front-end applications.
- Designed and implemented Azure Logic Apps, Azure Functions, Azure Storage, and Service Bus Queues for enterprise ERP integration.
- Created Docker images for .NET applications to optimize performance, reduce build times, and streamline deployments.
- Validated XML documents against XML schemas to ensure data integrity and compliance.
- Worked with Kafka messaging system, configuring partitioning and replication factors in Kafka clusters.
- Extracted and processed large datasets using Azure Data Factory (ADF).
- Managed Azure DevOps pipelines, creating tasks, pull requests, and Git repositories.
- Deployed and managed Azure Kubernetes Service (AKS) for container orchestration.
- Implemented CI/CD pipelines in Azure DevOps, automating build, deployment, and testing.
- Configured Azure DevOps build pipelines for compiling, packaging, and generating artifacts for .NET applications.
- Wrote complex SQL queries for data extraction, transforming, and loading (ETL) using SSIS.
- Created and optimized Stored Procedures, Views, User-Defined Functions, Triggers, Cursors, and Joins using SQL Server & T-SQL.
- Developed SQL Server Reporting Services (SSRS) reports and ETL packages using SSIS.
- Collaborated with business analysts to align development efforts with business goals.
- Tracked, analyzed, and resolved defects throughout the development lifecycle.
- Ensured external resource dependencies were properly allocated, used, and released during testing.
- Debugged issues using Firebug, Chrome Developer Tools, and Firefox Developer Tools.
- Implemented Unit Testing, Integration Testing, and System Testing using NUnit.
- Utilized Git for version control and JIRA for project tracking.

Environment: Visual Studio, .Net Framework 4.5/4.7, C#, ASP.NET MVC, ADO.NET, Entity Framework, LINQ, Angular, JavaScript, Ajax.Net, OpenShift, SharePoint, jQuery, Azure, SQL, Web-API, Kafka, SOAP, WCF, SOA, SSIS, Docker, Kubernetes, HTML, CSS, SQL Server 2018/2019, Web Services, TFS, MS Excel.

Client: CGL, India

Date: Mar 2020- Dec 2022

Role: .Net Developer

Responsibilities:

- Developed custom user controls for searching consumers and providers using ASP.NET.
- Designed web forms and .NET assemblies using ASP.NET for seamless UI interactions.
- Utilized ASP.NET User Controls to create submission and modification steps for events and evaluation forms.
- Implemented ASP.NET MVC Grid Controls, including GridView, Repeater, and reusable user controls.

- Developed business logic components and data access layers using C#.NET in an N-tier architecture.
- Created various web services using WCF in C#.NET and integrated them into web applications.
- Implemented Azure Storage, Azure SQL, and Azure Web roles to enhance application scalability and performance.
- Utilized serialization in C#.NET to efficiently convert XML data to objects and vice versa.
- Developed and integrated WCF services to enable communication between distributed components.
- Worked with WPF to develop graphical representations of filtered bugs, improving debugging efficiency.
- Maintained and enhanced applications based on evolving business requirements.
- Implemented authentication and authorization protocols to ensure secure application access.
- Analyzed IIS logs and monitored application errors using Event Viewer to troubleshoot performance issues.
- Designed and developed RESTful Web APIs using ASP.NET Web API, integrating JSON-based services for internal and external use.
- Leveraged Angular 6 and ASP.NET MVC frameworks for building dynamic web applications.
- Developed SSRS reports using SQL Server Data Tools (SSDT) with VB.NET.
- Built ETL processes using SSIS and C#.NET for data integration and transformation.
- Developed RESTful services using ASP.NET Core Web API, ensuring interoperability and reusability.
- Designed distributed computing solutions based on SOA principles, utilizing Windows Communication Foundation (WCF).
- Used TFS for version control, project management, and source code tracking.
- Diagnosed and resolved bugs and issues during testing, optimizing ASP.NET web pages.
- Optimized C#.NET and SQL Server 2014 stored procedures, functions, and application performance.

Environment: C#, Vb.Net, ASP.NET, TDD, SQL 2014, SQL Server Integration Services (SSIS), SQL server Reporting Services (SSRS), Visual Studio2019, MVC, AWS, XML, OOP, REST, HTML 5, ASP.NET, Web API, N-Tier Architecture, TFS.

Client: Star Health Insurance, India

Date: Mar 2019 – Feb 2020

Role: Software Engineer

Responsibilities:

- Developed Web API Controllers in ASP.NET MVC to build and maintain RESTful APIs and consumed APIs on the client side using Angular 6 data binding.
- Designed and implemented web pages using data-bound controls like DataGrid, Data List, and Data Repeater, leveraging data binding and data templating techniques.
- Worked with Microsoft Azure (IaaS, PaaS, SaaS) for cloud deployment, strategy, and planning, utilizing Visual Studio 2019 with Azure.
- Optimized the notification system by consolidating multiple email notifications, significantly reducing the number of outgoing messages.
- Developed and executed test cases and performed extensive manual testing to validate application enhancements.

- Followed Agile Scrum methodology, actively participating in daily stand-up meetings (via Trello Board) to track project progress and resolve issues.
- Enhanced application performance by implementing Azure Search and SQL query optimizations for faster and more efficient data retrieval.
- Developed and maintained database models, created tables, stored procedures, and queries using PL/SQL for optimized data handling.
- Utilized JIRA for tracking bugs and project tasks, improving collaboration, productivity, and issue resolution.

Environment: NET Framework 4.5, C#, ASP.NET MVC5, VB.NET, Web API, WCF Services, AngularJS, Bootstrap, Visual Studio 2019, Microsoft Azure, N-Unit, JSON, SQL Server 2012, Telerik Rad Controls, Bootstrap, Agile Methodology, Jira, Angular 6.

Education: Masters from Oklahoma Christian University, OK
