(Open to Relocate)

Experienced **Full Stack Developer** in building scalable web applications and sophisticated AI models. Proficient in **Python, Django, SQL, React**, JavaScript, and cloud platforms (**AWS**) for building and deploying full-stack applications. Skilled in designing RESTful APIs, building **CI/CD** pipelines for seamless deployment. **Actively seeking opportunities** to leverage technical expertise and innovation in AI and software engineering to drive impactful solutions.

PROFESSIONAL EXPERIENCE

SYRACUSE UNIVERSITY

Syracuse, USA

Software Engineer - AI

Jun 2024 - Present

PDF Chat Application with Claude, AWS Bedrock

- Developed an AI-powered sales document analyzer using **Amazon Bedrock** and Claude model, enabling automated processing of customer contracts, proposals, and sales reports with 90% accuracy in key information extraction.
- Implemented a scalable document management system using AWS S3 and **LangChain** for intelligent retrieval of sales collateral and historical deal documentation, reducing search time by 75% for sales representatives.
- Built a **RAG-based** query system for sales knowledge base, integrating **FAISS** for efficient similarity search across product specifications and pricing documents, improving sales team response time to customer inquiries.
- Integrated **multimodal session handling** to maintain a coherent history of client interactions, enabling sales teams to reference past queries and responses for improved client engagement and personalized follow-ups.
- Engineered a user-friendly interface using **Streamlit** for sales teams to access and analyze customer interaction history, featuring real-time chat capabilities for collaborative deal discussions.

BLUE OCEAN STEELS

Remote

Software Engineer Intern

Feb 2023 - Jun 2024

Contributed in developing an automated fish video analysis system to streamline species identification and measurement, cutting manual workload for Fish & Wildlife Service.

- Processed over 20,000 fish videos for species identification and length measurement using **OpenCV**, achieving a 94% accuracy rate and reducing manual analysis time by over 80%.
- Built a scalable **Django** web application with Celery for concurrent video processing and real-time updates via AJAX, reducing processing time by up to 70% and enhancing user experience.
- Designed and integrated a **REST API** with **Swagger** documentation for seamless frontend-backend interaction, coupled with role-based access control to ensure data security and efficient user management.
- Utilized Docker for containerization, enabling cross-environment deployment and optimized database interactions using **ORM** techniques, improving data retrieval times by 50%.

FIDELITY NATIONAL INFORMATION SERVICES GLOBAL (FIS GLOBAL)

India

Software Engineer

July 2021 - July 2022

Develop and maintain robust code for corporate leasing solutions, enhancing system efficiency, data handling, and automation for global clients.

- Maintained and enhanced the Ambit Asset Finance product, achieving code excellence with 80% code coverage using **NUnit tests**, and collaborating closely with **cross-functional teams** to ensure high-quality **Python code** through rigorous reviews.
- Resolved complex **SQL** queries on large datasets and high-priority JIRA tickets, ensuring efficient data handling for clients like Toyota and BMW while gaining expertise in financial concepts and contributing to **fintech** software development.
- Utilized FIS Code Connect **API gateway** to enhance integration and management of financial services, improving system connectivity and streamlining API utilization across **banking and payment platforms**.

BLUE OCEAN STEELS

India

Software Developer Intern

Feb 2021 - May 2021

Contributed to streamlining React/API build process.

- Developed a feature-rich SPA using **React and JavaScript**, reducing runtime errors by 30% through rigorous ESLint integration and unit testing (Jest).
- Architected reusable React components and modular JavaScript utilities, improving codebase scalability and maintainability by 25%.
- Built **RESTful APIs** with Node.js and Express, implementing data validation middleware to ensure consistent request/response handling and reduce backend bugs.
- Optimized the Webpack build process with code splitting and minification, reducing bundle size by 15% and **improving page load times**.

PROJECTS

Personal Portfolio Website | *Next.js* | *TypeScript* | *Three.js* | *React* | *Tailwind CSS*

- Architected and deployed a high-performance portfolio website with Next.js and TypeScript, integrating server-side rendering and site generation, following SOLID principles for global content delivery.
- Built advanced UI components featuring WebGL 3D animations and GPU transitions, optimized with 5+ custom React hooks and lazy loading to reduce load times.
- Optimized application performance through Chrome DevTools and Google Analytics integration, achieving a 92 Lighthouse score and implementing responsive design patterns that enhanced user engagement across desktop and mobile platforms.

AI-Powered Cold Email Generator | *Llama* | *Groq* | *ChromaDB* | *Streamlit*

- Engineered an intelligent cold email generation system integrating Llama 3.1 with Groq Cloud for high-performance inference, achieving 3x faster response times and enhanced output quality
- Implemented a robust data management system using ChromaDB for vector storage and retrieval, enabling efficient storage of email templates, recipient data, and company research for contextual generation

- Engineered a responsive web interface using Streamlit and FastAPI, which offers users real-time customization of email tone, content, and template selection, providing an intuitive platform for managing and sending cold emails

Jobstat | *Typescript* | *Next* | *React* | *Prisma* | *Tailwind*

- Orchestrated the development of JobStat with Next.js, integrating OAuth security, and introduced live updates and an interactive dashboard to efficiently track 100s of daily job applications.
- Elevated user experience with a responsive design featuring a dark mode option, crafted with Tailwind CSS for a modern aesthetic, all seamlessly integrated with a PostgreSQL database backend for robust data handling.

SKILLS

- **Databases:** MySQL, SQLite, MongoDB, Oracle, Firebase Realtime Database, DynamoDB, PostgreSQL
- **Programming Languages:** Python, JavaScript, TypeScript, HTML, CSS, SQL
- **Tools & Frameworks:** Angular, ReactJS, Express.js, React Native, Flask, Django, Git, CI/CD Processes, Unit Testing.
- **Backend Technologies:** Spring Framework, RESTful Web Services, .NET
- **Cloud Computing:** AWS, Azure, Firebase, Docker, Kubernetes.
- **AI/Machine Learning:** Supervised ML, Unsupervised ML, NLP, Classification techniques (binary classification, multi-class classification), A/B testing, LLMs, OpenCV, Ollama.
- **Other Skills:** Distributed Systems, Software Development, Cloud Technologies, Caching Technologies.

AWARDS, RECOGNITION, CERTIFICATIONS

- Awarded a 30% Tuition Scholarship by Syracuse University.
- Research Paper: Published research paper in IRJET publications, Vol. 4, Issue 8
- [Oracle Cloud Infrastructure 2024 Generative AI Certified Professional](#)
- [Hackerrank : Problem Solving \(Intermediate\)](#)
- [Python Project : Pillow, Tesseract, and OpenCV](#)
- [Hackerrank : Software Engineer](#)
- [IBM : Python for Data Science, AI & Development](#)
- Delivered lectures for 60 Codigo Madrid members (Student Coding Club) having 100+ freshmen and sophomores.

EDUCATION

SYRACUSE UNIVERSITY

MS in Computer Science (GPA: 3.73)

SAVITRI BAI PHULE PUNE UNIVERSITY

BE in Computer Science (GPA: 8.82)

New York, US

Aug 2022 - May 2024

Pune, India

Aug 2017 - May 2021
