PROFESSIONAL SUMMARY

Over 8 years of experience as a Network Engineer specializing in complex routing and switching solutions, with extensive experience in administering Cisco and Palo Alto devices. Certified in CCNA, CCNP, AWS-SA and Azure-104. Proficient in designing, installing, configuring, maintaining, and troubleshooting network infrastructure to ensure robust performance and security.

Key Responsibilities and Achievements

- **Network Design and Implementation:**
 - Designed, installed, configured, and maintained network infrastructure, including routers, switches, firewalls, and access points, ensuring optimal network performance and reliability.
 - Configured and managed Cisco switches and Palo Alto firewalls, implementing advanced security features and policies to protect network integrity.
 - Set up and managed VLANs, NAT, VPNs (IPSec and SSL), and implemented secure remote access solutions.
- **Routing and Switching:**
 - Expertly configure and troubleshoot routing and switching protocols, including OSPF, EIGRP, BGP, RIP, VTP, and STP.
 - Utilized Wireshark for packet analysis, network troubleshooting, and performance optimization.
- **Network Security and Monitoring:**
 - Oversaw day-to-day network security operations, including user access management, system performance monitoring, and threat prevention.
 - Implemented and monitored security policies, conducted regular audits, and ensured compliance with industry standards.
- **System Administration:**
 - Experienced with Office 365 Admin Console, Microsoft Endpoint Manager, and SharePoint.
 - Managed Active Directory, including user and computer accounts, security groups, group policy objects, and Azure Active Directory.
 - Conducted system backups and recovery processes to ensure data integrity and operational continuity.
- **Technical Support and Troubleshooting:**
 - Provided comprehensive support and troubleshooting for network issues, including diagnosing and resolving problems with Cisco switches and Palo Alto firewalls.
 - Utilized Wireshark and other network analysis tools to identify and rectify network performance issues, ensuring minimal downtime and optimal efficiency.
 - Performed routine updates and patches on firewall systems to safeguard against vulnerabilities and threats.
 - Managed server installations and upgrades, ensuring seamless integration with existing

network infrastructure and minimal disruption to operations.

- **Cross-Platform Experience:**
 - Configured and maintained Windows Server, Linux/Unix Server environments, and applied patches to ensure system security and stability.
 - Coordinated system and server installations, ensuring compliance with company policies and industry best practices.
- **User and Application Support:**
 - Completed new user setups, including Outlook, OneDrive, MS Teams, and necessary software configurations for Windows and Mac OS environments.
 - Managed biometric access systems, generated reports, and coordinated with vendors for issue resolution.

TECHNICAL SKILLS

- **Network Technologies:** TCP/IP, DNS, DHCP, GPOs, Cisco Switches, HP Aruba, OSPF, EIGRP, BGP, VLAN, VTP, RPVST, RIP, STP
- **Security:** IPSec VPN, SSL VPN, ACLs, NAT, VLAN, threat prevention
- **Administration:** Active Directory, Azure AD, Office 365, Microsoft Endpoint Manager, SharePoint, Windows Server, Linux/Unix Server
- **Cloud Platforms:** AWS, Azure, O365 Administration
- **Firewall:** Palo Alto, Panorama
- **Operating Systems:** Windows Server, Linux, PowerShell, Yealink, Neat Bar AV System
- **Tools:** Wireshark, Autopilot (Intune), PowerShell

EDUCATION

BRAC University, Bangladesh

Bachelor's in Electronic and Communication Engineering

CERTIFICATIONS

1. **Cisco Certified Network Associate (CCNA Routing & Switching)**
2. **Cisco Certified Network Professional (CCNP ENCOR)**
3. **AWS Certified Solutions Architect – Associate (AWS SA C03)**
4. **Microsoft Azure Administrator (AZ-104)**

EXPERIENCE

Waltonen Engineering, Warren, MI – Network Engineer

September 2024 – Present

- Upgraded Cisco Catalyst 9200 and 9300 series switches, Palo Alto firewalls, Panorama, and Dell switches to the latest firmware versions to ensure compliance, security, and optimal performance.
- Performed regular backups for firewalls and switches, maintaining timely recovery processes and disaster-readiness.
- Designed and implemented isolated environments by creating new subnets, adding VLANs, and assigning them to the appropriate port channels, ensuring devices connect seamlessly and obtain desired IP addresses.
- Created and managed Palo Alto firewall policies, modified existing configurations, and blocked unauthorized access while troubleshooting connectivity and security issues.
- Adjusted public access and firewall configurations, enhancing network security by restricting unwanted traffic and securing external interfaces.
- Played an active role in preparing for CMMC (Cybersecurity Maturity Model Certification) and ISO 27001 audits by aligning network infrastructure and security policies with compliance standards, documenting practices, and remediating identified gaps.
- Conducted regular reviews of security controls, ensuring adherence to compliance requirements and continuous improvement of the network security posture.
- Spearheaded the migration of legacy network systems to modern architectures, integrating cloud solutions and enhancing scalability.
- Configured and optimized Cisco switches and Palo Alto firewalls, implementing security features and routing protocols (OSPF, STP).
- Designed and implemented VLAN configurations for sandbox environments, enabling isolated testing and development.
- Collaborated with cross-functional teams to troubleshoot and resolve critical network issues, reducing downtime.
- Enhanced remote access infrastructure using GlobalProtect VPN and managed endpoint configurations via Intune.

Nagarro Inc, NYC – *Network Engineer*

Dec 2021 – Aug 2024

- Provided technical support for Palo Alto firewalls, intrusion detection/prevention systems, and web application firewalls.
- Installed and configured Palo Alto firewalls, anti-malware, and intrusion prevention systems, including URL filtering to maintain network security efficiency.
- Configured and managed firewall rules, NAT, VLANs, and VPN connections, ensuring robust security and seamless connectivity.
- Installed and configured Cisco routers and switches, managed LAN resources, DNS records, and IP addresses.
- Integrated network infrastructure with cloud services and other IT components, administering DHCP and resolving IP conflict issues.
- Monitored network performance using various tools to ensure optimal application functionality and quickly resolved issues.
- Implemented and maintained network routing protocols such as OSPF, EIGRP, and BGP, and managed VLAN configurations.
- Configured and troubleshooted VLAN, VTP, RPVST, RIP, and STP to ensure efficient network operations.
- Configured and supported VPN services such as Global Protect for secure remote access.
- Utilized Wireshark and other network monitoring tools for traffic analysis and troubleshooting complex network issues.

- Developed and enforced security policies and access control lists (ACLs) to protect sensitive data and maintain network integrity.
- Implemented site-to-site VPNs and secure remote access solutions to support business operations and remote workforce.
- Proficient in Dynamic routing protocols such as EIGRP and iBGP.
- Conducted network performance assessments and optimizations.
- Collaborated with cross-functional teams to integrate new technologies and upgrade existing network infrastructure.
- Provided training and support to junior network engineers and IT staff on Palo Alto firewall management and best practices.
- Diagnose hardware performance and remove negative parts and maintain reporting for remediation.

Pro Unlimited, NYC – *Network Administrator*

Dec 2019 – Nov 2021

- Designed and implemented network security solutions using Palo Alto firewalls, enhancing security posture and reducing vulnerabilities.
- Configured and managed advanced firewall features including IPSec VPN, SSL VPN, threat prevention, and URL filtering.
- Performed routine maintenance and updates on Palo Alto firewalls to ensure optimal performance and security compliance.
- Designed and deployed projects, including VLAN configuration, network segmentation, and routing protocols (OSPF, EIGRP, BGP).
- Utilized Wireshark and other network monitoring tools for traffic analysis and troubleshooting complex network issues.
- Developed and enforced security policies and access control lists (ACLs) to protect sensitive data and maintain network integrity.
- Implemented site-to-site VPNs and secure remote access solutions to support business operations and remote workforce.
- Conducted network performance assessments and optimizations.
- Collaborated with cross-functional teams to integrate new technologies and upgrade existing network infrastructure.
- Diagnose hardware performance and remove negative parts and maintain reporting for remediation.
- Managed end-user accounts and permissions, overseeing correct provisioning of access rights in Active Directory in accordance with security best practices and policies.
- Monitor service now ticketing system and make sure with proper notes to resolve or escalate.
- Coordinate with Networking team and troubleshooting cabling, patching, racking and Layer one issues
- Documented all transactions and support interactions in the system for future reference and addition to knowledge.
- Maintain IT inventory ensure items are documented with service tag and ticket no.
- Enroll laptop and ensure devices are properly enrolled with all necessary information
- Configured hardware, devices and software to set up workstations for employees.
- Removed malware, ransomware and other threats from laptops and desktop systems.
- Assist in desktop imaging and moving projects in different locations and ensure data backup properly.

Northwell Health, NYC– *IT Support Administrator*

Sep 2017- Nov 2019

- Leveraged extensive IT support experience to seamlessly transition into a Network Engineer role, bringing a strong foundation in troubleshooting and user support.
- Applied in-depth knowledge of network fundamentals gained in IT support to design and implement robust network solutions, including the configuration and management of Cisco switches.
- Successfully managed and configured Palo Alto firewalls and Cisco switches, building on hands-on experience from previous IT support roles.
- Transitioned from supporting end-user issues to architecting and maintaining complex network infrastructures, ensuring high availability and performance of both Palo Alto firewalls and Cisco switches.
- Utilized expertise in IT support to develop detailed network documentation and standard operating procedures for network management, encompassing both firewall and switch configurations.
- Implemented network monitoring and alerting systems, drawing from skills in incident management and resolution, including monitoring Cisco switch performance.
- Enhanced network security by applying best practices learned in IT support, including firewall configurations, access control policies, and secure VLAN setups on Cisco switches.
- Participated in cross-functional teams, leveraging IT support background to communicate effectively with non-technical stakeholders during network projects involving both firewalls and switches.
- Advanced network troubleshooting capabilities by combining problem-solving skills from IT support with in-depth knowledge of networking protocols and technologies, particularly with Cisco switching and routing.
- Provided training and mentorship to IT support staff transitioning to network roles, sharing insights and best practices from both disciplines, including Cisco switch management.
- Provided end user support ensured proper maintenance of workstations, printers, scanner, and peripherals.
- Installing operating systems such as Windows 7, Windows 8, Windows 10, Linux, and Mac.
- Diagnose, troubleshoot, and resolve a wide range of software, hardware, and network issues
- Configuring and troubleshooting various iMac Hardware and software issues.
- Create desktop image, ensure data backup and data restore when replacing new PC
- Creating and updating network shares, adding permissions for software and groups through Active.
- Resetting password, enable, disable, and update information in Active Directory.
- Resetting email password, assigning license, block and unblock email accounts through office 365.
- Install office application and troubleshoot a wide range of word, excel and outlook issues.
- Troubleshooting, setting up Cisco IP Phone, Avaya and working with service providers for escalation.
- Troubleshoot layer one cabling issues and patching cable for data closet.
- Working with a networking team to troubleshoot and cabling switches, firewalls and servers in networking racks.

Al Arafah Bank Ltd, BD– *Desktop Administrator*

Sep 2015- August 2017

- Build, configure and deploy Windows 7, 10 Desktops and laptops.
- Setup complete connectivity to the office network for remote locations.
- Computer lab management and managing workgroup environment.
- Troubleshoot wide range phone, computer and printer hardware and software issues.
- Monitor and quickly respond to help desk requests and incidents through hotline calls and

ticketing systems.

- Setup conference room and troubleshoot AV issues including WebEx, zoom and skypes.
- Created, responded to, escalated, and closed tickets with notes and track all outstanding tickets with System Admin to ensure problems are resolved in a timely manner.
- Performed face-to-face and telephone support for software and hardware issues.
- Experience in installing various anti-virus software and handling computer security issues
- Serve as the first point of contact for customers seeking technical assistance.
- Walk the customer through the problem-solving process and escalate the next level with proper notes
- Reset password, unlock, and update user information in Active Directory
- Maintain communication with the user and procurement team.
