SUMMARY

Software Engineer with 3+ years of experience designing and deploying scalable enterprise applications, APIs, and microservices across finance and technology domains. Proficient in Java, Spring Boot, React.js, Angular, and cloud-native solutions on AWS and Azure. Skilled in building secure, distributed systems, CI/CD automation, and real-time data processing with PostgreSQL and SQL Server. Demonstrated ability to optimize workflows, strengthen system observability, and deliver intuitive user experiences that enhance performance, compliance, and customer trust.

TECHNICAL SKILLS

- **Back-end Technologies:** Java, Spring Boot, Spring Cloud, Microservices, WebFlux, Hibernate, J2EE, JDBC, Spring Security, JDK, Micronaut, Node.js, Express.js, Python, ASP.NET, Flask, MVC Framework, SOAP, RESTful APIs, Maven, Bash Script, GraphQL, gRPC, WebSockets, API Gateway, OpenAPI, Event-Driven
- **Front-end Technologies:** React.js, Angular, TypeScript, Redux Toolkit, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, AJAX
- **Database Technologies:** MySQL, MongoDB, PostgreSQL, SQL Server, Oracle, Firebase, Cassandra
- **Tools and Technologies:** Git, Visual Studio Code, Docker, Kubernetes, Jenkins, Apache Tomcat, Nginx, Swagger, Postman, GitLab, Eclipse, IntelliJ IDEA, JUnit, Mockito, Log4j, Splunk, JIRA, Tableau, Gradle, OAuth
- **Cloud and DevOps:** AWS (Lambda, ECS, EKS, API Gateway, S3, RDS, DynamoDB, CloudFormation), Microsoft Azure (AKS, Functions), Docker, Kubernetes, Helm, Terraform, ArgoCD, GitHub Actions, GitLab, CI/CD, Jenkins, ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, OpenTelemetry, Jaeger
- **Security and Testing:** OAuth2, JWT, Keycloak, OpenID Connect, SAML, Spring Security, SonarQube, Zero Trust Security, JUnit 5, TestNG, Mockito, Cucumber, Pact (Contract Testing), Selenium, Cypress, Postman, REST Assured

PROFESSIONAL EXPERIENCE

Software Engineer, Citigroup

Sep 2024 – Present | Remote, USA

- Developed a secure transaction management system using Java, Spring Boot, and microservices, enabling reliable, low-latency payment workflows while ensuring compliance with stringent financial industry standards.
- Built RESTful APIs with Spring MVC and Spring Security, integrating OAuth2 and JWT to enforce secure authentication, encrypted communications, and robust authorization for critical banking operations.
- Designed PostgreSQL and Oracle database schemas with Hibernate ORM, optimizing complex queries, guaranteeing ACID compliance, and supporting scalable transaction processing for millions of records daily across systems.
- Deployed backend applications on AWS cloud services including EC2, RDS, and S3, achieving autoscaling, disaster recovery readiness, and improved uptime reliability for continuous business operations.
- Automated CI/CD pipelines using Jenkins, Docker, and Kubernetes, enabling faster deployments, streamlined release processes, and consistent delivery across staging, testing, and production banking environments.
- Built an interactive user dashboard using Angular and TypeScript, integrating APIs for real-time transaction visibility, ensuring intuitive design, seamless navigation, and improved user experience across devices.

Software Engineer, Dell Technologies

Jun 2021 – Jul 2023 | Remote, India

- Spearheaded development of distributed enterprise solutions with Java, Spring Boot, and microservices, enhancing modular scalability, system fault tolerance, and interoperability across diverse organizational platforms.
- Implemented robust API services using Spring MVC and Spring Security, embedding OAuth2 and JWT standards to strengthen backend authentication, encrypted communication, and secure role-based access.
- Modeled and maintained PostgreSQL databases integrated with Hibernate ORM, optimizing queries and ensuring ACID compliance for stable, high-throughput transaction handling across mission-critical applications.
- Orchestrated deployment of backend systems on AWS (EC2, S3, RDS), optimizing infrastructure scalability, reducing downtime risks, and enabling resilient operations for high-demand enterprise environments.
- Streamlined CI/CD processes by designing automated pipelines with Jenkins, Docker, and Kubernetes, accelerating deployments, minimizing manual intervention, and ensuring reliable software delivery across environments.
- Designed dynamic UI components with React.js and ES6 JavaScript, integrating APIs for real-time data visualization, improving usability, and delivering seamless user interactions across devices.
- Strengthened system observability by implementing ELK Stack and Prometheus dashboards, enabling centralized monitoring, proactive performance tuning, and rapid root-cause analysis of distributed Java microservices.

EDUCATION

Master of Science, Missouri University of Science and Technology

Aug 2023 – May 2025 | Missouri, USA

Information science and technology

Bachelors of Science, DVR & DR HS MIC College of Technology

Jun 2018 – May 2022 | AP, India

Information Technology
