

Nishad Main | Software Engineer

CO, USA | +1 (945) 249-1685 | mainnishad507@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Results-driven Software Engineer with 5+ years of experience in developing scalable web and cloud applications using Java, Python, and JavaScript, delivering solutions that improved performance by up to 30% across distributed systems. Proficient in Spring Boot, React.js, FastAPI, and microservices architecture, with expertise in RESTful APIs, CI/CD automation, and cloud platforms (AWS, Azure, GCP). Strong background in Docker, Kubernetes, and Jenkins, automating deployments that reduced release time by 40%. Skilled in database optimization for MySQL, PostgreSQL, and MongoDB, enhancing query efficiency by 25%, and adept at Agile development, system design, and delivering secure, high-performance applications.

Technical Skills

Programming Languages: Java, JavaScript (ES6+), C, C++, SQL, Python
Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, JSF, Node.js, React.js, Express.js, Keras, Spring Security, Microservices Architecture
J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC
Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML, RESTful APIs, Fast APIs, GraphQL
Cloud Platforms & Services: Amazon Web Services (AWS): EC2, S3, Lambda Microsoft Azure: App Services, Storage Google Cloud Platform (GCP), Containerization & Cloud Deployment, Scalable Microservice Architecture
Databases: MySQL, PostgreSQL, MongoDB, Redis, NoSQL, Data Modeling, API Lifecycle Management
DevOps, CI/CD & Infrastructure: Docker, Kubernetes, Jenkins, Ansible, Maven, Gradle, Gunicorn, Nginx, Apache Tomcat, WebSphere, CI/CD Pipeline Automation, Containerized Deployment, Infrastructure-as-Code (IaC)
Testing & Automation: JUnit, PyTest, Unittest, Selenium, Test-Driven Development (TDD)
Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Trello
Design & Architecture Tools: UML, MS Visio, System Design, API Design & Integration (REST, GraphQL)
Software Development Methodologies: Agile (Scrum), Waterfall, SDLC

Professional Experience

Software Engineer | Lumen Technologies, CO, USA Jan 2024 – Current

- Designed and implemented scalable, high-performance microservices using Spring Boot, FastAPI, and Node.js, enhancing modularity and reducing API latency by 30%, while increasing system uptime by 15%.
- Engineered and deployed cloud-native applications on AWS (EC2, Lambda, S3) and Azure App Services, achieving 99.9% availability through Docker and Kubernetes-based orchestration and automated scaling.
- Developed and maintained RESTful and GraphQL APIs supporting 500K+ daily requests, improving data exchange efficiency between frontend applications and microservice clusters.
- Automated CI/CD pipelines with Jenkins, GitHub Actions, and Docker, integrating static analysis and multi-environment testing to enable zero-downtime deployments and reduce release cycles by 40%.
- Collaborated with cross-functional teams across development, QA, and DevOps to enhance distributed system resilience; improved monitoring and observability metrics by 35% using Prometheus, ELK Stack, and Grafana.
- Spearheaded application performance tuning initiatives across Spring Boot, React.js, and Node.js layers, reducing server response times by 200ms on average and optimizing throughput by 20%.
- Partnered with data engineering teams to design secure data pipelines using PostgreSQL, MongoDB, and Redis, ensuring real-time synchronization and improving data retrieval performance.
- Authored API documentation, deployment guides, and architectural blueprints, improving onboarding time for new developers by 40% and maintaining consistent knowledge sharing across teams.

Jr. Software Engineer | Tech Mahindra LTD, India Apr 2018 - Jul 2022

- Designed, developed, and maintained enterprise-grade web applications using Java, Spring MVC, JSP, Hibernate, and Servlets, delivering 99% production stability for telecom and financial clients.
- Built scalable RESTful APIs processing 10K+ concurrent user requests, improving average response times by 30% and enhancing end-user experience.
- Collaborated with front-end teams to build responsive UI interfaces using HTML5, CSS3, Bootstrap, jQuery, and React.js, boosting client satisfaction scores by 15% due to improved usability.
- Engineered database schemas and optimized SQL queries in MySQL and PostgreSQL, improving query performance by 40% and reducing load times on data-heavy dashboards.
- Co-led the migration of legacy monolithic systems to Spring Boot microservice architecture, reducing maintenance overhead by 35% and enabling modular scalability.
- Integrated OAuth2 and JWT authentication mechanisms, ensuring 100% compliance with security standards and improving access control reliability.
- Automated CI/CD pipelines using Maven, Jenkins, and Docker, cutting build time from 30 minutes to 10 minutes and accelerating feature releases 2x faster.
- Implemented unit, integration, and regression testing with JUnit, Selenium, and Mockito, achieving 90%+ test coverage and reducing post-deployment defects by 25%.

Education

Master of Science in Computer Science May 2024
George Mason University, Virginia

Bachelors of Science in Computer Science May 2019
University of Mumbai, India
