## SUMMARY

Over 3 years of experience as a Software Engineer developed, deployed, and maintained projects using Java/J2EE and related technologies. Skills include Agile process for effective project delivery, Software engineering with emphasis on Spring Boot and React, and front-end technologies. Skills include creating effective UIs using HTML, CSS, and JavaScript, and handling RDBMS such as MySQL and PostgreSQL. Led the enhancement of project delivery efficiency by 20%, reduction of system vulnerability by 25%, and improvement of application performance by 30%.

## SKILL

- **Methodologies:** SDLC, Agile, Waterfall
- **Web Technologies:** TypeScript, React, Node/Express, MySQL
- **Programming Languages:** Java, JavaScript, Python, HTML5, CSS, SQL, C++, XML
- **Frameworks:** React.js, Node.js, Spring, JSF, Hibernate, Flutter
- **IDEs:** NetBeans, IntelliJ IDEA, Eclipse, Visual Studio Code
- **J2EE Technologies:** Servlets, JSP, JSTL, JavaBeans
- **Web Technologies:** HTML, CSS, jQuery, JSON, Bootstrap, OOP, Spring Boot, MVC
- **Cloud Technologies:** AWS (DynamoDB, EMR, EC2, IAM), Google Cloud Platform (GCP), CI/CD Pipelines
- **Application Servers:** Apache Tomcat, WebSphere, Docker
- **Databases:** MySQL, PostgreSQL, Cassandra, MongoDB
- **Build/Other Tools:** Maven, Gradle, Kubernetes, Jenkins, Junit, Mockito, Git, GitHub, Jira, Selenium, Cucumber
- **Operating Systems:** Windows, Linux, MacOS
- **Additional Skills:** Strong product sense, Ability to adjust approach, Comfort with ambiguity

## PROFESSIONAL EXPERIENCE

### CGI Inc. — Full Stack Java Developer

Aug 2024 – Present

- Integrated 15+ user-facing features using React.js within an MVVM/MVP architecture, enhancing platform functionality.
- Engineered APIs for seamless data flow, handling 10,000+ daily transactions between databases and front-end applications, testing endpoints with Postman for reliability.
- Optimized front-end performance using code splitting and lazy loading, resulting in a 50% reduction in load times.
- Engineered a data anonymization process for user privacy protection, ensuring compliance with privacy laws and building user trust.
- Automated database backup and recovery processes, achieving a 99.99% success rate in data recovery and minimizing potential data loss.
- Established a comprehensive testing suite including unit, integration, and end-to-end tests, improving code reliability by 90%.
- Integrated AI-powered chatbot functionality, handling 50% of customer inquiries and reducing support ticket volume by 30%.
- Settled a sleek and responsive user interface utilizing HTML, CSS, JavaScript, and Bootstrap to enhance user experience and accessibility.
- Designed a content management system (CMS) from scratch, enabling non-technical users to easily update website content.
- Orchestrated a CI/CD pipeline with Docker and Jenkins, employing server virtualization through Docker for streamlined Dev and Test environments, and configuring automation via containerization, which reduced deployment time by 40%.

### Accenture, Bangalore, India — Application Development Associate

Feb 2021 – Sep 2022

- Executed Agile methodologies and Behavior-Driven Development (BDD) practices, resulting in a 30% reduction in project development time, and fostering enhanced teamwork in a high-paced software environment.
- Incorporated Java-based microservices architecture to enhance application scalability and flexibility, reducing server response time by 15%.
- Implemented a comprehensive user feedback system, driving product improvements and increasing user retention by 15%.
- Established a multi-tenant SaaS application architecture, enabling efficient resource use and scalability for growing user bases.
- Plotted a user interface customization feature, allowing users to personalize the application experience and improve satisfaction.
- Developed a single sign-on (SSO) solution, simplifying user access across applications and improving security.
- Built a custom plugin for a web application, enhancing functionality and user satisfaction without impacting core system stability.
- Developed and maintained Java applications using Spring Boot and Hibernate, resulting in a 20% increase in application performance and reliability.
- Automated resource provisioning and scaling in cloud environments, achieving a 99.95% uptime and improving application reliability.

## Intex Technologies, India — Software Developer

Jun 2019 – Jan 2021

- Designed, developed, and tested web applications using J2EE, Servlets, JSP, and Spring Framework, adhering to SDLC best practices.
- Enhanced system performance by implementing caching strategies and optimizing database queries.
- Built and executed comprehensive test procedures for software components, improving overall system reliability.
- Supported the migration of applications to AWS, leveraging cloud-based DevOps tools for automation and deployment.

---

## EDUCATION

### Master of Science in Computer Science

Sep 2022 – Jun 2024

Pace University, New York, NY

### Bachelor of Technology in Electronics and Telecommunication Engineering

Aug 2016 – Jun 2020

MIT Academy of Engineering, Savitribai Phule Pune University, India

---

## PROJECTS

### API Integration and Modernization

- Designed and developed APIs using Spring web to integrate legacy systems with modern web applications.
- Built a CI/CD pipeline with Jenkins and AWS DevOps to enable automated deployment and continuous delivery.
- Migrated monolithic applications to microservices architecture, improving scalability and fault tolerance.

### Real-Time Monitoring and Alerting System

- Implemented a real-time monitoring system using Prometheus and Grafana for tracking application performance.
- Developed custom metrics and alerting mechanisms to identify and resolve performance bottlenecks proactively.
- Enhanced system availability by 40% through optimized load balancing and autoscaling strategies.
- Leveraged ELK (Elasticsearch, Logstash, Kibana) stack to analyze system logs data and implemented automated alert notifications for error patterns, reducing incident response time by 35%.
