PROFESSIONAL SUMMARY

Seasoned Project Manager with over 12 years of progressive experience leading large-scale **federal IT modernization projects** and digital transformation initiatives. Proven success in managing multi-million-dollar programs for the **U.S. General Services Administration (GSA)**, driving modernization of legacy systems into cloud-ready, scalable platforms. Skilled in **Agile, Waterfall, and hybrid delivery models**, with hands-on experience directing cross-functional teams, managing scope, risks, budgets, and stakeholder expectations. Adept at ensuring compliance with **federal IT standards**. Recognized for strong leadership, problem-solving, and communication skills that consistently deliver high-quality outcomes in complex environments.

Certified Project Management Professional (PMP) and **Professional Scrum Master (PSM I)** with a solid foundation in governance, risk management, and process optimization to ensure on-time, within-budget delivery of mission-critical systems.

KEY SKILLS & COMPETENCIES

- **Project Management & Delivery:** End-to-end project lifecycle management, scope and schedule control, budget tracking, milestone planning, stakeholder communication, risk mitigation, issue resolution.
- **Agile & SDLC Methodologies:** Agile/Scrum, Waterfall, Hybrid delivery, Sprint planning, backlog management, release planning, and Jira/Confluence expertise.
- **IT Modernization & Transformation:** Legacy system migration, cloud enablement, API modernization, microservices architecture, DevOps practices, and CI/CD implementation.
- **Technical Environment:** Java/Spring Boot, RESTful APIs, AWS Cloud Services, SQL Server databases, API integrations, version control (Git), Jenkins, Cucumber, Selenium, Amazon Redshift, AWS Glue, Tableau
- **Federal IT Program Management:** Understanding of GSA systems and acquisition lifecycle, FAR/OMB compliance, and Section 508 accessibility standards.
- **Stakeholder & Client Engagement:** Executive reporting, client communication, vendor coordination, cross-functional collaboration, requirements management, and expectation alignment.
- **Governance & Compliance:** Change control, documentation management, audit readiness, KPI tracking, and adherence to program management best practices (PMBOK).
- **Tools & Platforms:** Jira, Confluence, MS Project, SharePoint, and MS Office Suite.
- **Leadership & Team Management:** Coaching Agile teams, performance monitoring, team motivation, conflict resolution, and fostering a culture of accountability and delivery excellence.

EMPLOYMENT HISTORY

PROJECT LEAD REI Systems

Jul 2020 – May 2025
Sterling, VA

- Directed the **modernization of the Personal Property Management System (PPMS)**, transitioning legacy applications to a secure, scalable, and cloud-ready architecture under GSA's Federal IT Modernization Strategy.
- Managed **end-to-end project lifecycle** — scope definition, planning, execution, monitoring, and delivery — ensuring alignment with contractual commitments and GSA objectives.
- Defined project **scope, deliverables, success criteria, and KPIs**, ensuring all requirements were clearly documented, approved, and traceable.
- Established robust **project governance** processes covering change management, issue escalation, quality assurance, and communication protocols.

- Oversaw a **multi-disciplinary Agile team** (developers, analysts, QA, DevOps engineers, and UI/UX specialists) across onshore and offshore locations to deliver high-quality releases on schedule.
- Facilitated **Agile ceremonies** (sprint planning, daily stand-ups, retrospectives) and maintained velocity metrics to track progress and drive continuous improvement.
- Collaborated closely with **GSA product owners, business users, and technical SMEs** to validate requirements, prioritize features, and manage evolving needs.
- Monitored and controlled **project risks and dependencies** through proactive identification, impact assessment, and implementation of mitigation strategies.
- Developed and maintained **comprehensive project documentation** including project charters, risk registers, communication plans, test plans, and deployment guides.
- Managed **budget and financial tracking**, ensuring optimal allocation of resources and adherence to cost baselines for a multi-million-dollar modernization initiative.
- Ensured **compliance with federal IT and security standards** (FISMA, FedRAMP, Section 508, OMB A-130) throughout the development and deployment lifecycle.
- Oversaw **quality assurance processes**, implementing code reviews, test automation, and performance testing to ensure defect-free and stable releases.
- Coordinated **UAT and production rollout** activities, minimizing downtime and ensuring a seamless transition for end users.
- Produced **weekly and monthly executive dashboards**, highlighting project health, milestones, risks, and dependencies to GSA leadership and contracting officers.
- Managed **vendor and subcontractor performance**, enforcing service level agreements (SLAs) and ensuring timely delivery of contracted work.
- Championed **continuous improvement initiatives**—introducing process enhancements, risk-based decision-making, and post-implementation reviews to strengthen future project outcomes.
- Mentored team members on project management best practices, Agile principles, and stakeholder communication to enhance team capability and ownership.

BUSINESS ANALYST
Strategic Technology Institute

Jan 2019 - Jul 2020
Maryland, MD

- Act as the primary liaison between the federal client and the development team, ensuring that all business requirements are captured, documented, and communicated effectively.
- Work closely with product owners and senior stakeholders to define project scope, business needs, and user stories, ensuring alignment with federal regulations and compliance standards.
- Collaborate with Product Owners, Scrum Masters, and development teams to deliver Agile-based solutions for federal IT projects, ensuring alignment with mission objectives.
- Facilitate requirements gathering sessions, workshops, and Agile ceremonies (Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives).
- Develop and maintain user stories, epics, and acceptance criteria in Jira, ensuring a well-prioritized product backlog.
- Analyze and document business processes, workflows, and system requirements using BPMN and UML diagrams, identify areas for improvement, and recommend solutions to enhance efficiency and effectiveness.
- Ensure compliance with federal regulations and security standards throughout the project lifecycle.
- Conduct gap analysis and assess current systems to identify improvements that align with the needs of federal clients and regulations.
- Create and maintain project documentation including business requirement documents (BRD), functional requirement documents (FRD), and user stories in JIRA and Confluence.
- Led the Program Increment planning, conducting detailed discussions on upcoming requirements, providing effort estimates, and addressing impediments to avoid delays in release or escalation of costs.

- Collaborate with the QA team to define test cases and acceptance criteria, ensuring the product meets the federal agency's functional and non-functional requirements.
- Prepare and maintain project schedules, reports, and dashboards for senior leadership and project stakeholders.
- Manage risk and issues associated with projects, working with the project manager and team to develop mitigation strategies.
- Maintained regular communication with key stakeholders, addressing concerns promptly and ensuring a 90% satisfaction rate among project sponsors and end-users.
- Led the UAT effort for the team, creating UAT scripts, tracking defects, and reporting UAT success metrics to key stakeholders.
- Created User Guides for the application developed with support from the technical writer team.
- Created a Train the Trainer Module and conducted training sessions to familiarize agencies and other users with the new application and address questions and concerns.

BUSINESS ANALYST

Innovatia INC

Apr 2015 - Jan 2019
Wilmington, DE

- Facilitate Agile ceremonies, e.g., product backlog refinement, pre planning, planning, daily standup's, sprint reviews, retrospectives.
- Work with the scrum team, as well as internal and external stakeholders, to influence and drive decision making and support the organizational project or product teams.
- Worked with the team to define acceptance criteria, definition of done.
- Worked with Testers and Engineers create test plans and scenarios.
- Worked on development of projects following agile practices and values from conception to delivery.
- Coached new team members on agile and scrum values on strategies to increase transparency, efficiency and overall productivity.
- Worked with product owner to prioritize and groom product backlog.
- Track team's progress daily using burndown chart in Jira.
- Identify risks & impediments to sprint goals and propose solutions to address them quickly and efficiently.
