Professional Summary

Full-stack developer with hands-on experience in building scalable Java and Spring Boot microservices, integrating secure REST APIs, and optimizing databases for high-performance applications. Skilled in modern front-end frameworks, CI/CD pipelines, and cloud deployments across AWS and GCP.

Experience

Prasquare Technologies Inc. Plymouth, MN
Software Developer (Remote) Sept 2025 – Present

- Engineered full-stack applications using React, Node.js, and PostgreSQL, designing secure REST APIs that reduced API latency by **35%** and improved overall response efficiency.
- Developed and maintained enterprise-level applications using Java 11, Spring Boot, and Hibernate to build scalable and modular microservices, integrating **5+** third-party APIs for enhanced system functionality.
- Optimized SQL queries and stored procedures for PostgreSQL and MySQL, achieving a **40% reduction in query execution time** and improved data scalability across services.

Hitachi Energy Ltd. Chennai, India
Software Engineer Aug 2022 – July 2023

- Built and maintained scalable backend services using Java, Spring Boot, and RESTful APIs to support critical applications.
- Automated build and deployment workflows with Docker and Jenkins, improving release speed by **30%** and increasing deployment reliability across multiple environments.
- Contributed to internal tools and system monitoring using Python and C++ on Linux platforms, enhancing debugging and operational efficiency.

AICTE Virtual Internship Remote
Cloud Engineering Intern Aug 2021 – Dec 2021

- Migrated legacy workloads to AWS by leveraging S3, API Gateway, and Athena; created serverless solutions with Lambda and DynamoDB; enforced secure access with IAM roles; and automated deployments via AWS CLI and SDKs.

Projects

Image Resolution Enhancement using SRGAN Nov 2024
Python, TensorFlow, Keras, OpenCV

- Designed and trained a Super-Resolution GAN to upscale low-resolution images, performed preprocessing and hyperparameter tuning, and evaluated results with PSNR/SSIM metrics.
- Optimized training with custom callbacks and data augmentation, improving output quality and reducing overall training time.

Real-Time Bus Tracking and Notification System Jul 2024 – Oct 2024
Java, Spring Boot, WebSocket, PostgreSQL, Redis, AWS

- Built a real-time bus tracking platform using Spring Boot microservices to deliver live location updates, route optimization, and ETA notifications.
- Implemented WebSocket communication and Redis caching to reduce API response time by **40%**, ensuring scalability and minimal latency.

Church Website Platform — Personal Project Jul 2024
Java, Python, Spring Boot, Flask, MySQL, Selenium, AWS S3

- Built a complete website for my church with 10+ modules including offerings, prayer requests, and event schedules, achieving rapid development within 4 days.
- Developed a hybrid backend using Java and Python, integrated AWS S3 for media storage, and automated testing with Selenium to ensure smooth functionality.

Education

University at Albany, SUNY Graduated: 2025
Masters of Science in Computer Science

Koneru Lakshmaiah University, AP, India 2019 – 2023
Bachelors of Technology in Computer Science and Engineering

Skills

- Testing & QA:** Manual/Automated Testing, Regression, Functional, JIRA, Agile, Unit Testing
- Automation & CI/CD:** Pytest, Selenium, Postman, Jenkins, Maven, Gradle, Docker
- Programming Languages:** Java, Python, C++, JavaScript, Shell Scripting, SQL
- Web Development:** React.js, Node.js, Express.js, Django, Flask, REST APIs, JWT
- Databases:** MySQL, PostgreSQL, Firebase, MongoDB (SQL/NoSQL)
- Cloud & DevOps:** AWS, Azure, GCP (basic)
- Big Data:** Hadoop, Athena, ETL
- Other Tools:** VS Code, IntelliJ IDEA, Eclipse, Swagger, Linux CLI

Additional Certifications

Automation Anywhere Advanced RPA Professional Sep 2022
Aviatrix Certified Engineer (Multi-Cloud) Feb 2023
Microsoft Certified: Azure Fundamentals (AZ-900) Nov 2021
Microsoft Certified: Azure AI Fundamentals (AI-900) Mar 2023
