PROFESSIONAL SUMMARY

Java Full Stack Developer with 4 years of experience building and maintaining enterprise applications. Focused on improving backend processes, enhancing user interfaces, and automating testing. Successfully increased transaction throughput by 27% while supporting multiple projects. Experienced in simplifying workflows, reducing errors, and ensuring consistent delivery of reliable software for internal and client-facing systems.

TECHNICAL SKILLS

Languages & Databases: Java, Kotlin, Python, C, C++, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, MySQL, PostgreSQL, Oracle, MongoDB, Cassandra, DynamoDB

Frontend Development: React.js, Redux, Angular, Vue.js, Flutter, Bootstrap, Material-UI, Tailwind CSS, Responsive Design

Backend Development: Spring Boot, Spring MVC, Spring Cloud, Hibernate, JPA, Micronaut, RESTful APIs, GraphQL, gRPC, Microservices

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Azure, Google Cloud, Docker, Kubernetes, Terraform, Jenkins, GitLab CI, CircleCI, Travis CI

Testing & Quality Assurance: JUnit, TestNG, Mockito, Selenium, Cypress, Playwright, SonarQube, Jacoco, ESLint, Prettier

Security: OAuth 2.0, JWT, OpenID Connect, HTTPS, CORS, CSRF, XSS, SQL Injection Prevention, OWASP ZAP, Burp Suite

Tools & Other Technologies: Git, GitHub, GitLab, Bitbucket, Postman, Android Studio, IntelliJ IDEA, VS Code, Maven, Gradle, Pandas, NumPy

Concepts & Practices: OOP, MVC Architecture, Software Design Patterns, Agile/Scrum, TDD, Microservices Architecture, REST API Design

AI & Machine Learning: Generative AI, Large Language Models (LLMs), Prompt Engineering, OpenAI APIs, LangChain, Hugging Face Transformers, TensorFlow, TensorFlow Lite, Scikit-learn, NLP (NER, Text Summarization, Sentiment Analysis), Recommendation Systems, Model Deployment, Data Analysis & Visualization

WORK EXPERIENCE

Capital One, USA

Jan 2025 – Current

Java Full Stack Developer / Software Developer

- Engineered Spring Boot microservices handling banking operations, increasing transaction throughput by 27%, lowering API response latency, and improving PostgreSQL and DynamoDB production integration efficiently.
- Implemented React.js modules with Redux, accelerating dashboard rendering speed by 23%, enhancing user task completion and optimizing frontend component reuse across multiple enterprise applications.
- Automated unit and integration testing using JUnit and Mockito, raising backend coverage from 68% to 93%, reducing defects and ensuring stable deployments for high-volume financial systems.
- Optimized PostgreSQL and DynamoDB queries, decreasing retrieval latency by 31%, improving real-time analytics accuracy and enabling reliable internal reporting for critical operational processes.
- Orchestrated Docker containers and Kubernetes clusters on AWS, reducing system downtime by 19%, standardizing deployments, and improving microservice coordination across multiple banking application modules.

Accenture, India

Aug 2021 – Jul 2023

Java Full Stack Developer

- Constructed Spring MVC applications with REST APIs, improving processing efficiency by 25%, accelerating reporting speed and decreasing operational delays for enterprise client systems.
- Crafted Angular and Bootstrap interfaces, increasing cross-platform accessibility by 22%, improving navigation efficiency and visual data presentation within internal dashboards.
- Configured CI/CD pipelines using Jenkins and GitLab, shortening release cycles by 33%, improving deployment accuracy and enabling automated updates across staging and production environments.
- Integrated OAuth 2.0 and JWT authentication, raising login efficiency by 28%, safeguarding sensitive information and enforcing compliance with internal enterprise security policies.
- Refined MySQL and Oracle queries, reducing execution time by 26%, enhancing report generation speed and supporting large-scale datasets for reliable business analytics.

Accenture, India

Sep 2020 – Jul 2021

Java Developer Internship

- Assisted Spring Boot backend and REST API development, improving workflow efficiency by 18%, supporting internal tools and streamlining data processing for operational teams.
- Built Vue.js components with Material-UI dashboards, improving usability by 20%, enabling smoother navigation and accelerating task completion for internal users across departments.
- Executed JUnit unit tests, increasing coverage from 55% to 80%, reducing service errors, and improving reliability of internal applications consistently across development modules.
- Developed MongoDB schemas for semi-structured datasets, improving query performance by 24%, supporting faster analytics and enhancing internal reporting efficiency across multiple modules.
- Managed Docker deployments, decreasing setup time by 30%, standardizing development environments, and increasing productivity across multiple project teams efficiently.

EDUCATION

Master of Science in Computer Science DePaul University, Chicago, IL	Jun 2025
Bachelor of Technology in Computer Science Engineering Teegala Krishna Reddy Engineering College, Hyderabad, India	Aug 2022
