- Used corporate-developed Agile SDLC approach
- Led **requirements gathering and process analysis** for key projects, improving **operational efficiencies by 20%**.
- Conducted **JAD sessions, stakeholder interviews, and gap analysis** to define project scope.
- Designed **workflow diagrams and wireframes** using MS Visio to enhance business process visualization.
- Developed **detailed user stories and acceptance criteria**, ensuring smooth Agile sprint execution.
- Managed project documentation and tracked milestones in **Jira and Confluence**.
- Created Use stories, Functional, and Object diagrams in Visio

Business Analyst Consultant

07/2021 - 01/2023

Randstad

Hyderābād, India

- Collaborated with stakeholders to gather and understand business needs, objectives, and processes
- Translated business requirements into clear and detailed functional and technical specifications
- Created detailed requirement documents, use cases, user stories, and other artifacts to communicate requirements to development and design teams
- Act as a liaison between business stakeholders, development teams, and other relevant parties
- Participate in solution evaluation and selection processes, which may involve assessing off-the-shelf software, third-party solutions, or custom development
- Identify potential risks and issues related to project scope, requirements, and technology solutions.
- Collaborated with **stakeholders, development teams, and QA** to define business needs and system functionalities.
- Created **BRDs, FRDs, and user stories** for multiple enterprise applications.
- Assisted in **UAT planning, execution, and defect tracking**.
- Developed **customized dashboards** for tracking project progress and performance metrics.
- Assist in the creation of test plans, test cases, and test scripts to validate that developed solutions meet the specified requirements
- Participate in testing activities, identifying defects and working with development teams to resolve issues

SUMMARY

I have over 10 years of experience as a Healthcare SME, Business Analyst. My responsibilities include business analysis, project planning, scheduling, resource management, budget management, project execution, change management, risk mitigation, vendor communication, status reporting, and application closure across multiple portfolios. Proficient in Agile and SCRUM methodologies, including backlog prioritization, planning, user stories, and use cases. Dedicated and results-driven Business Analyst with a proven track record of translating business objectives into actionable technology solutions. Proficient in requirements elicitation, documentation, and analysis, adept at bridging the gap between stakeholders and development teams. Experienced in stakeholder communication, and solution design, with a strong ability to identify opportunities for process improvement. Expertise in Software Development Life Cycle (SDLC) methodologies, including Agile, Waterfall, and RUP. Primarily in Agile methodology. Collaborated with Scrum teams both remotely and on-site. Collaborated with SMES, product owners, and users to prioritize change and work requests while maintaining the necessary State project documents
