

Pavani Paruchuri | Full Stack Developer

Farmington Hills, MI | +1 (716)-617-9152 | pparuchuri89@gmail.com | www.linkedin.com/in/pparuchuri

SUMMARY

Full Stack Developer with over 3 years of experience delivering scalable web applications and user-focused solutions across diverse industries. Skilled in collaborating with cross-functional teams to improve product functionality, enhance user experience, and streamline development workflows. Proven track record of reducing deployment issues, improving code quality, and accelerating feature delivery in Agile environments.

EDUCATION

Master of Science in Information Technology | University of the Cumberlands, Williamsburg, KY

December 2024

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, Java, SQL, TypeScript

Front-End Development: HTML5, CSS3, React.js, Tailwind CSS

Back-End Development: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB, PostgreSQL

Deployment & Cloud: AWS (S3, CloudFront, Lambda, API Gateway, RDS), Git, GitHub

Tools & Practices: npm, VS Code, Postman, Chrome DevTools, Agile Methodologies, Clean Code Principles

WORK EXPERIENCE

LME services, MI, USA

June 2025 - Current

Full Stack Developer Intern

- Built 15+ modular and reusable UI components using React.js, JavaScript (ES6+), and Tailwind CSS, reducing code redundancy by 30% and enhancing design consistency.
- Developed and integrated RESTful APIs using Node.js and Express for secure authentication, session handling, and CRUD operations.
- Optimized MongoDB queries and schema design to support 2,000 daily users, achieving sub-200ms average response time under concurrent load.
- Implemented CI/CD pipelines with GitHub Actions for automated testing and deployments, decreasing staging rollout errors by 50%

Infosys Limited, Bangalore, India

February 2021 - August 2022

Full Stack Developer

- Developed responsive web interfaces for client OPTUS using React.js, JavaScript, HTML, and CSS, ensuring cross-browser compatibility and accessibility compliance (WCAG standards), which reduced UI-related support tickets by 20% across platforms.
- Built and maintained RESTful APIs using Node.js and Express.js to support 5+ enterprise tools, improving data access and reporting for over 10,000 users, while collaborating in Agile sprints, daily standups, and peer code reviews.
- Optimized MongoDB queries and refactored backend logic, achieving a 30% improvement in API response time and a 20% reduction in application load times.
- Implemented secure authentication and role-based access control using JWT and OAuth2, decreasing unauthorized pre-production access by 40%.

Incresol Software Services Pvt. Ltd, Hyderabad, India

June 2020 - December 2020

Java Developer

- Developed REST APIs using Java, Spring Boot, and MySQL to support CRUD operations in employee management and payroll applications.
- Created SQL performance by optimizing joins, indexing, and batch inserts; reduced report generation time by 25% for HR data.
- Participated in manual and automated testing using Postman and internal QA tools, resolving over 20 bugs identified in staging cycles.
- Contributed code using Git for version control; raised, reviewed, and merged pull requests on time with minimal conflicts.

K L University, Vijayawada, India

July 2019 - May 2020

Java Developer

- Built and deployed 3 academic applications including a digital grade tracker, student attendance system, and a basic library management tool using Java, HTML, and MySQL.
- Applied Firebase Auth for secure login and configured basic HTTPS hosting for demo versions accessed by instructors and students.
- Used server-side validation and dynamic content rendering to reduce manual entry errors by 30% in academic use cases.
- Collaborated in a 4-member team, using GitHub for code sharing and tracking, and followed lightweight Agile practices like weekly check-ins and incremental builds.

PROJECTS

Bank Customer Churn Prediction

November 2022

- Built a Flask-based churn prediction app using Random Forest with 87% accuracy for real-time risk analysis.
- Designed full-stack deployment with REST APIs and database integration for scalable model operations.

Voice-Based Virtual Assistant with Emotional Analyzer

December 2020

- Developed a Python AI voice assistant using SAPI5 for weather updates, browser automation, and calendar integration.
- Implemented a CNN-based Speech Emotion Recognition system on 7,442 audio samples with 61% accuracy for real-time emotion analysis.

CERTIFICATIONS

AWS Certified Cloud Practitioner (S3, CloudFront, Lambda, API Gateway, RDS) | February 2025

Automation Anywhere Certified Advanced & Essentials RPA Professional | November 2020

ServiceNow Certified System Administrator (CSA) | August 2020
