

Phillip Gideon

Senior .NET Full Stack Developer

+1 (281) 519 4436 | phillipsgideon990@gmail.com | [linkedin.com/in/phillipgideon/](https://www.linkedin.com/in/phillipgideon/) | Dallas, TX - 75232

SUMMARY

Experienced IT and Software Development professional with over 15 years in the industry, specializing in the .NET framework and adept at delivering robust solutions for large enterprises. Proven expertise spans system analysis, technical leadership, and project management, with a focus on developing intricate applications for diverse sectors including ERP, healthcare, finance, HR, banking, e-commerce, inventory, and accounting. Proficient in data migration, technical documentation, UML designing, application architecture, and well-versed in Agile practices, test-driven development, and software engineering design patterns, holding certifications as a Microsoft Certified Professional Developer (MCPD) and Microsoft Certified Technology Specialist (MCTS).

EDUCATION

Bachelor of Science: Computer Science

06/2011

University of Phoenix

EXPERIENCE

Senior .NET Full Stack Developer / Team Lead

02/2018 - 03/2025

Membersy | Austin, TX

- Led the modernization of a Membership Management System-MMS and Community Health Outreach Program using C#, .NET Core and Angular / TypeScript for frontend.
- Redesigned a .NET MVC monolith healthcare application into a service-oriented architecture (SOA) and refactored legacy .NET Framework applications into .NET Core, making applications cloud-native.
- Developed and deployed key services for patient data management, appointment scheduling, and third-party integrations, ensuring compliance with healthcare data standards like HIPAA and HL7 / FHIR.
- Designed, built, and optimized microservices architecture using .NET Core 6 / 8, Azure Functions, and AKS.
- Implemented serverless computing solutions using Azure Functions and AKS, reducing processing time and eliminating unnecessary background processes.
- Built high-performance REST and GraphQL APIs for MMS with Apollo Federation and Swagger, and integrated Twilio for real-time SMS alerts and notifications.
- Built API gateways and middleware using .NET Core, ensuring secure, scalable, and reusable API interactions across various services.
- Secured data transmission with SSL/TLS between Angular 14 and ASP.NET Core 6, and implemented OAuth 2.0 with JWT for authentication and rate-limiting to protect APIs.
- Implemented Role-Based Access Control (RBAC) and Single Sign-On (SSO) using OAuth 2.0, OpenID Connect, and Azure AD.
- Integrated Apache Kafka for real-time data streaming and asynchronous messaging, boosting communication efficiency across dental services by 3x.
- Developed and maintained WCF services for secure data exchange, implementing SOAP-based communication for legacy system integrations within the MMS platform
- Designed a credit card payment integration microservice using Stripe and PayPal APIs, enabling secure, PCI-compliant transactions for our healthcare projects.
- Optimized data access with Entity Framework Core 6 and SQL Server schema refactoring and added Redis-based distributed caching to reduce database load and speed up retrieval.
- Designed and implemented robust ETL pipelines using SSIS, Azure Data Factory, and Azure Blob Storage, automating data extraction, transformation, and loading.

- Designed optimized stored procedures, triggers, and multi-region replication using SQL Server, Azure SQL, and Cosmos DB
- Optimized Kubernetes workloads with autoscaling and cost efficiency, and created Helm charts to streamline microservice deployment and rollback.
- Built CI/CD pipelines with Azure DevOps, automated infrastructure using Terraform and ARM templates, and applied Git strategies for smooth deployments and version control.
- Monitored application health and performance using Azure Monitor, Application Insights, enabling proactive issue detection and resolution.
- Utilized Blazor Server for faster load times in administrative interfaces and Blazor WebAssembly for client-side performance in patient-facing applications.
- Created a mobile-friendly version of the MMS UI using Xamarin and Blazor and .NET 5, ensuring a seamless and intuitive user experience across web and mobile platforms.
- Developed dynamic and responsive user interfaces for MMS using Angular 14/17 and React 18 with TypeScript and JavaScript, creating schema mapping and error management systems.
- Redesigned and optimized UI components in React and Angular 14 / 17, improving usability, performance, and accessibility.
- Developed a unified UI component library using Angular to ensure consistent branding and UX across several healthcare applications.
- Managed content and user experience on Sitecore, ensuring smooth digital content delivery and integration with backend services.
- Integrated Microsoft Dynamics 365 with .NET services, allowing seamless access to customer relationship data and enhancing loyalty platform capabilities.
- Developed and tested MS Dynamics CRM client side programming using (JavaScript / JSON / jQuery / HTML) using the Microsoft Dynamics CRM Customization SDK Tool Kit.
- Developed custom modules and workflows within Microsoft Dynamics 365 to streamline CRM processes and align customer interactions with loyalty program goals.
- Built a HIPAA-compliant Python pipeline to integrate patient data, using Pandas and NumPy for cleaning, transformation, and real-time reporting.
- Collaborated with Data Science teams to implement AI-driven analytics features, improving predictive insights for customer engagement and performance tracking.
- Integrated an AI-powered chatbot within MMS to assist users with real-time support and troubleshooting, leveraging NLP for understanding user queries and providing context-specific responses.
- Wrote unit tests and integration tests using xUnit and Selenium, ensuring the robustness of .NET applications and high-quality code delivery.
- Led cross-functional Agile teams (8 members) to deliver high-impact solutions, collaborating with stakeholders and guiding junior engineers on coding, design, and DevOps best practices.
- Facilitated Scrum ceremonies and created internal documentation to promote CI/CD, Azure standards, and cloud-native development across teams.

Software Developer

07/2014 – 01/2018

American Express | Dallas, TX

- Key member of the R42 team, contributing to the development and maintenance of American Express's loyalty rewards platform with a focus on backend and frontend development using C# and .NET.
- Engineered backend services using C#, .NET Framework 4.5, implementing business logic for loyalty rewards programs, including partner integrations with Delta, Hilton, and Amazon credit cards.
- Designed and developed microservices architecture using C#, .NET Framework 4.5, ensuring scalability and performance for international and U.S. market segments.
- Developed ASP.NET APIs using C#, improving interoperability and real-time data exchange for backend services within the R42 team.

- Built responsive, modular user interfaces using Vue and React, integrating seamlessly with .NET backend services for high maintainability and performance.
- Next.js with React and Nuxt.js with Vue JS to implement server-side rendering (SSR) and static site generation, improving SEO, load times, and performance. This approach optimized the user experience across data-intensive pages and ensured faster content delivery on both React and Vue interfaces.
- Integrated RabbitMQ with ASP.NET backend services, enabling real-time messaging and communication between services for efficient transaction processing.
- Integrated Salesforce data with .NET services, enabling seamless data flow between the CRM and internal platforms.
- Developed custom Salesforce Lightning components to enhance user experience and tailored features to meet business needs.
- Coordinated the migration of legacy .NET Framework applications to updated architectures, introducing security and compliance protocols.
- Integrated SharePoint with .NET applications for document management and collaboration, ensuring secure and organized content storage for R42 team projects.
- Modernized legacy systems by upgrading .NET services, transforming outdated data formats, and applying big data techniques to process large financial datasets with accuracy and compliance.
- Integrated AWS S3, AWS RDS, and AWS DynamoDB for scalable storage, relational database management, and NoSQL data solutions, optimizing the system architecture for cloud-native environments.
- Utilized AWS Lambda for serverless computing, implementing Python-based microservices for on-demand data processing workflows in AWS.
- Adopted Test-Driven Development (TDD) practices, writing unit and integration tests in C# using xUnit for .NET applications within the R42 team.
- Managed on-premises deployments using OpenShift and integrated C# and .NET services, ensuring compliance with American Express's security protocols for handling financial data.
- Wrote unit tests and integration tests using xUnit and Selenium, ensuring the robustness of .NET applications and high-quality code delivery.
- Deployed containerized C# services built with .NET using Docker and Kubernetes, ensuring efficient deployment in both on-premises and cloud environments.
- Participated in Agile ceremonies within the R42 team, ensuring continuous improvement and timely delivery of .NET-based projects.

.NET Developer

07/2010 to 07/2014

AGI | Dallas, TX

- Implemented a Scrum development process with one-week iterations, resulting in a 20% increase in development speed and a 15% reduction in project delivery times.
- Leveraged UI expertise in AngularJS to troubleshoot existing UI issues and develop new user-friendly forms
- Rewrote tons of stuff from jQuery and legacy CoffeeScript code to vanilla JavaScript
- Optimized the data access layer, reducing its size, resulting in a 13% improvement in data retrieval performance and reduction in database load times
- Consolidated multiple BL(Business Logic) class libraries into a single reusable library, reducing maintenance efforts and improving code reuse
- Enhanced user experience (UX) with AngularJS, HTML5, and CSS, resulting in a 22% increase in user engagement and a 17% improvement in user retention
- Implemented a real-time messaging service using SQL and ASP.NET, facilitating seamless communication between users during live sessions
- Developed business components using C#, WCF, BizTalk, and Entity Framework

SKILLS

Programming Languages:

Backend: C#, Java, Python, TypeScript

Frontend: JavaScript, TypeScript, HTML5, CSS3, SCSS

Frameworks & Technologies:

Backend: .NET Core (2.0–8.0), ASP.NET Core, Web API, Entity Framework Core, Java (11+), Spring Boot 3

Frontend: Angular (8–16), Angular JS, React (15–18), Vue.js (2/3), Blazor

Message Queuing: RabbitMQ, Kafka

API Development: RESTful APIs, WebRTC, Twilio API

Authentication & Security: JWT, OAuth 2.0/2.1, OpenID Connect, SSL/TLS, HIPAA, HL7

Testing: xUnit, Selenium, NUnit, MSTest

Development Practices: Test-Driven Development (TDD), Behavior-Driven Development (BDD), Agile, Scrum

Cloud & DevOps:

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS)

Azure Services: Azure Kubernetes Service (AKS), Azure App Service, Azure Functions, Azure Service Bus, Azure Blob Storage, Azure Redis Cache, Azure SQL Database, Azure DevOps

AWS Services: AWS Lambda, AWS S3, AWS RDS, AWS DynamoDB

Containerization: Docker, Kubernetes, OpenShift

Infrastructure as Code (IaC): Terraform, AWS CloudFormation, Azure Resource Manager (ARM)

CI/CD: Azure DevOps, GitHub, Jenkins, TFS, Git, PowerShell, Bash scripting

Database Management:

SQL Server, MongoDB, PostgreSQL, Neo4j

Database performance optimization (indexing, partitioning, query caching)

Monitoring & Logging:

ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, AWS CloudWatch, Azure Monitor

Development Tools & IDEs:

IDEs: Visual Studio 2022, Visual Studio Code, IntelliJ IDEA, Rider, Eclipse

Version Control: Git, GitHub, GitLab, TFS, Bitbucket

Project Management: JIRA, Azure Boards, Trello, Rational Team Concert (RTC)

Build Tools: MSBuild, Maven, Gradle

Collaboration: Microsoft Teams, Slack, Zoom
