SUMMARY

Software Development Engineer with 4 years of experience building scalable full-stack applications, RESTful APIs, and microservices in Agile environments. Proficient in **JavaScript**, **TypeScript**, **Java**, and **Python** with expertise in **React.js**, **Angular**, **Node.js**, **Spring Boot**, **FastAPI**, and **Django**. Skilled in **CI/CD**, cloud platforms (**AWS**, **GCP**, **Azure**), and databases (**PostgreSQL**, **MongoDB**, **MySQL**) while delivering secure, high-performance solutions in cross-functional teams.

EDUCATION

California State University, Chico Aug 2023 – May 2025
Master of Science in Computer Science (GPA: 3.9)

Pune University, India Aug 2018 – May 2022
Bachelor's Degree in Computer Engineering (GPA: 3.8)

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL, C#, Dart, Shell Script, HTML
Frontend & Backend: React.js, Angular, Vue.js, Node.js (Express), Nest.js, Spring Boot, FastAPI, Django, JWT, CSS
Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Kafka, RabbitMQ
Cloud & DevOps: AWS (Lambda, EC2, CloudWatch), GCP, Docker, Kubernetes, Jenkins, GitHub, Git, CI/CD
AI & ML: GPT-3.5, LLaMA, Keras, TensorFlow, PyTorch, NumPy, Pandas, Scikit-learn, OpenCV, CNN, YOLO
Tools & Others: Maven, Gradle, Webpack, Prometheus, Grafana, Postman, VS Code, Agile, Scrum, TDD, Jira

EXPERIENCE

State Street, USA | Software Development Engineer January 2025 – Present

- Developed a trade processing system using **React.js**, **Java Spring Boot**, and **PostgreSQL**, handling 1.2M+ daily financial transactions with latency under 200ms while ensuring SOX compliance and high availability.
- Architected a dashboard with **React.js**, **Next.js**, and **Kafka**, improving visibility and reducing settlement errors by 35%.
- Integrated asynchronous messaging with **Kafka**, **Google Pub/Sub**, and **Redis**, ensuring 99.99% uptime for audit services.
- Engineered a modular authentication and **RBAC** service integrated with enterprise SSO, while enforcing TDD with **JUnit** and **Jest** to achieve 92% test coverage and cut production defects by 30%.
- Automated releases using **GitHub Actions**, **Docker**, and **Kubernetes**, reducing cycle times by 70% with rollback on failures.

Round Tech Square, San Francisco, CA | Full Stack Developer Intern May 2024 – Aug 2024

- Built a personalized learning roadmap feature with **React.js**, **FastAPI**, and **PostgreSQL**, boosting user engagement by 45%.
- Created an automated task-labeling system using **LSTM** and **zero-shot classification**, improving backlog triaging by 40%.
- Implemented scalable **FastAPI** microservices with **AWS SQS**, cutting async latency by 30% and improving workflow reliability.
- Managed deployments with **Jenkins** and **AWS (EC2, CloudWatch)**, ensuring 95% stability and reducing downtime by 40%.

BrainByte Infotech, India | Software Development Engineer July 2020 – July 2023

- Engineered an e-commerce ordering and tracking system with **Angular**, **Node.js (Express)**, and **MongoDB**, enabling real-time purchases and status updates while improving response times by 30%.
- Optimized **Node.js** APIs and **MongoDB** indexes, reducing latency by 35% and scaling performance under peak traffic.
- Designed an inventory and order microservice with **RabbitMQ**, boosting throughput by 45% and improving fault tolerance.
- Orchestrated deployments with **Azure DevOps**, raising release frequency by 50% and enabling parallel QA cycles.
- Secured checkout with **JWT** authentication, cutting unauthorized access by 70% and ensuring compliance with protocols.

PROJECTS

AI-Powered Plagiarism Checker | Python, FastAPI, Angular, MongoDB, NLP | CSU,Chico July 2024 – Jan 2025

- Constructed a plagiarism checker with **BERT** and **Cosine Similarity**, reducing false positives 40% and improving reliability.
- Assembled a **FastAPI** backend and **Angular** front-end for real-time document analysis of files up to 100 pages.
- Accelerated text retrieval by 50% using **MongoDB** for storage and **Elasticsearch** for fast similarity searches across datasets.

ChessMaster AI | Python, Django, GCP, Docker, WebSockets, Redis, Bootstrap | CSU,Chico Jan 2024 – June 2024

- Coded a multiplayer chess platform with **Django**, adding real-time gameplay and AI move suggestions via the **OpenAI API**.
- Enhanced responsiveness using **WebSockets**, reducing piece movement delay by 70% for seamless multiplayer gameplay.
- Deployed on **GCP** with **Docker** and **PostgreSQL**, ensuring 99.9% uptime with load balancing and health checks.

Agile Pilot | React, Express, PostgreSQL, NodeJS, Postman | CSU,Chico Aug 2023 – Dec 2023

- Built an AI-driven Agile tool with **React** and **Node.js**, cutting planning time by 35% and boosting team efficiency by 40%.
- Analyzed 1,000+ tasks using **LLMs** to detect bottlenecks, reducing sprint delays by 30% and improving task flow across teams.
- Implemented a **GitLab CI/CD** pipeline to streamline testing and deployment, improving release speed by 60% during sprints.
