

PRATHYUSHA KOMMINENI

Software Developer

OK, USA | 405-458-9188 | prathyusha.kommineni@outlook.com | [LinkedIn](#)

SUMMARY

Full Stack Developer with **3+ years** delivering enterprise web apps, SaaS platforms, and cloud-native microservices. Expert in **Java** (8–17), **Spring Boot**, **React.js**, **Angular**, and **RESTful APIs**, with exposure to **.NET Core** and **Node.js**. Skilled in designing scalable microservices supporting **100K+ daily users**, implementing **CI/CD pipelines** (Jenkins, GitHub Actions, Docker, Kubernetes), and deploying on **AWS**, **Azure**, and **GCP**. Experienced in **Agile/Scrum** workflows, stakeholder collaboration, and troubleshooting across cross-functional teams.

PROFESSIONAL EXPERIENCE

Software Engineer | BCBS | OK, USA

Sep 2025 – Present

- Engineered Java 17 + Spring Boot microservice with PostgreSQL to replace legacy claims flow, boosting daily throughput to **12K+ claims** and cutting latency from **24 s to 6 s** through enhanced indexing and async calls.
- Orchestrated real-time provider data streaming via **Kafka + Snowflake**, processing **150K events per day** and clearing **1.2K weekly backlog tickets** through schema validation and ingestion.
- Developed React + TypeScript portal with **Apollo GraphQL**, adding **12 self-service workflows** that removed **2.2K monthly support calls** and improved claim-status turnaround.

Software Developer | KPMG | India

Jan 2022 – Jul 2023

- Created a Java 11 and Spring Boot risk-reporting platform using PostgreSQL, replacing fragmented manual audit workflows and saving **40 hours per month** by enabling report generation across regional teams.
- Built JPA and Hibernate modules integrated with Elasticsearch to process **500K+ audit logs monthly**, creating unified log schemas that improved traceability and shortened evidence retrieval time from **3 days to 2 hours**.
- Designed React and Chart.js dashboards connected to Power BI APIs, allowing compliance leaders to visualize key risk KPIs and remove **30 recurring reporting hours each month** through interactive, real-time insights.
- Configured CI/CD and infrastructure provisioning with GitLab CI, Jenkins, Terraform, and Ansible, cutting deployment preparation by **90 minutes per release** and eliminating **90 configuration errors per quarter** through environment standardization.

Full Stack Developer | Adani | India

Nov 2020 – Dec 2021

- Implemented a project oversight platform with **Java 11**, **Spring Boot**, and **PostgreSQL**, enabling tracking of **1,200+ infrastructure projects monthly** and improving reporting visibility for six divisions.
- Deployed REST endpoints and **gRPC services** using **Cassandra**, processing **100K+ safety inspection records** reliably while coordinating with operations and QA teams.
- Designed responsive interfaces with **Vue.js** and **Bootstrap**, introducing input validation and automated submission flows that increased **data accuracy by 900+ records per month**.
- Refined Hibernate ORM mappings to reduce **average query latency** during high-volume transactions, improving backend performance for cross-team reporting and dashboards.
- Managed containerized deployments using **Docker**, **Kubernetes**, **Amazon RDS**, and **DynamoDB**, resolving **200+ staging discrepancies** and ensuring zero downtime for production releases.

Software Developer | Trigent Software | India

May 2020 – Oct 2020

- Architected REST services with **Java 8**, **Spring Boot**, and **JPA** to synchronize data across three internal systems, handling **25K+ daily transactions** and improving system reliability.
- Constructed modular UI components using **React.js**, **Next.js**, and **Bootstrap**, enhancing user experience and reducing average transaction latency by **200ms per interaction** while collaborating with QA teams.
- Streamlined database queries and performance in **PostgreSQL** and **MongoDB**, supporting **50K+ user records** and accelerating analytics and reporting across cross-functional teams.

PROJECTS

- Online Course Registration Portal** – Programmed a full-stack **Spring Boot & React.js** portal handling **500+** student enrollments with automated **Jenkins CI/CD on AWS EC2**, reducing deployment time from 2 hours to 30 minutes.
- Employee Timesheet & Leave Management System** – Built microservices-based Spring Boot & Angular system with JWT authentication and RBAC, streamlining leave management for **200+ employees** and reducing approval errors from **20 errors/month to 5 errors/month**.
- Helpdesk Ticketing Platform** – Engineered Spring Boot & MongoDB ticketing system with Prometheus and AWS CloudWatch monitoring, improving issue resolution from **average 5 hours per ticket to 3 hours** and maintaining **uptime for 730+ operational hours per year**.

TECHNICAL SKILLS

- Programming Languages:** Java (8–17), Python, C++, C#, Go, Node.js, TypeScript
- Backend & Frameworks:** Spring Boot, .NET Core, Hibernate, JPA, JDBC, gRPC, GraphQL, REST APIs
- Frontend:** React.js, Angular, Vue.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap
- Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch, CloudFormation), Azure, GCP, Docker, Kubernetes, Terraform, Helm, Ansible, Jenkins, GitHub Actions, GitLab CI/CD
- Databases & Storage:** PostgreSQL, MySQL, SQL Server, MongoDB, Cassandra, Redis, DynamoDB
- Big Data & Streaming:** Apache Kafka, Apache Spark, Apache Airflow, Hadoop (HDFS, MapReduce), dbt
- Testing & QA:** JUnit, Mockito, Cypress, Selenium, Jest, Postman
- Methodologies & Practices:** Agile/Scrum, SDLC, System Design, Design Patterns, Clean Code, Application Security, Scalability & Performance Tuning

EDUCATION

Master of Science in Information Science/Studies | Trine University | VA, USA

Aug 2023 – May 2025

Bachelor of Technology in Computer Science and Engineering | NRI Institute of Technology | AP, India

Jun 2016 – May 2021
