

Summary:

Python Developer with 4+ years of experience in building and deploying scalable **backend** applications and **APIs**. Skilled in **Django**, **Flask**, and **FastAPI**, with strong expertise in cloud-native architectures on **AWS** and **Azure**, **microservices**, and **SQL/NoSQL** databases. Proficient in designing secure and efficient solutions with async processing, **API integrations**, **Docker**, **Kubernetes**, and computerized **CI/CD** pipelines. Passionate about leveraging **Generative AI**, writing clean, testable **Python** code, and collaborating in **Agile** teams to deliver high-quality software on time.

Skills:

- **Programming & Frameworks:** Python, R, Django, Flask, FastAPI, SQL, PySpark, Shell Scripting
- **Data Processing:** Gen AI, NumPy, PySpark, JSON, Parquet
- **Database Technologies:** PostgreSQL, MySQL, MongoDB, Snowflake, Redshift, SQLite
- **Big Data & Orchestration:** Apache Spark, Apache Airflow, Databricks
- **Cloud Platforms:** AWS (Lambda, S3, EC2, RDS, Glue), GCP (GKE)
- **DevOps & Tools:** Docker, Git, Jenkins, GitHub Actions, CI/CD pipelines
- **Web & API Development:** Django, Flask, REST APIs, Django ORM, HTML, CSS
- **Others:** Linux/Unix, Agile, JIRA, Unit Testing (PyTest), Data Modeling, Version Control

Education:

- Master's in Computer Science from Texas Tech University, TX

Certifications:

- [AWS Certified Cloud Practitioner](#)
- Google Associate Cloud Engineer
- PCAP – Certified Associate in Python Programming

Professional Experience

Athena Healthcare Systems – USA | Python Developer | Jan 2024 - Current

- Designed and deployed **RESTful APIs** with **Django** and **FastAPI** on **AWS**, ensuring secure communication with internal systems and third-party apps while reducing latency by 35%.
- Implemented **JWT/OAuth2** authentication and fine-grained access control, aligning with cloud security best practices and enterprise compliance standards.
- Migrated legacy monolithic apps into **microservices** on **Docker/Kubernetes**, leveraging **AWS ECS/EKS** for scalability, reducing downtime by 28%, and enabling faster feature delivery.
- Automated **CI/CD** pipelines using **GitHub Actions**, **Jenkins**, and **AWS CodePipeline**, accelerating release cycles by 40% and minimizing manual errors.
- Integrated **Redis** caching, **Celery** queues, and **Gen AI** services for async jobs like **NLP** processing and notifications, improving throughput and performance.
- Conducted unit, integration, and regression testing with **PyTest** and cloud-based test environments, achieving 90%+ coverage and lowering production incidents.
- Developed **Swagger/OpenAPI** documentation and hosted it on cloud portals, enhancing developer onboarding and cross-team integration.
- Collaborated with cross-functional teams in **Agile/Scrum**, leveraging cloud monitoring and logging tools to ensure timely delivery of robust, scalable features.
- Implemented lightweight **AI/ML** features using **Scikit-learn**, exposing **ML** models via **FastAPI** endpoints, and tracked model versions and performance with **MLflow** and **Joblib** for maintainability and reproducibility.

Morgan Stanely - IND | Python Developer | Jul 2020 - Jun 2023

- Engineered scalable web solutions with **Django** and **Flask** deployed on **AWS**, enhancing application reliability and supporting high-volume operations.
- Developed and fine-tuned **RESTful** and **GraphQL** endpoints for secure cloud data exchange, improving accessibility of mission-critical business applications.
- Designed and optimized **PostgreSQL** and **MongoDB** structures on **AWS RDS**, boosting query efficiency by 30% through indexing, normalization, and advanced tuning.
- Leveraged **Gen AI** services alongside external **APIs** to automate financial analytics, improving reporting precision and enabling faster business decisions.
- Packaged applications in Docker containers and deployed using **AWS EC2**, **Lambda**, and **API Gateway**, ensuring high availability and cost-efficient cloud scaling.
- Created comprehensive **Swagger/OpenAPI** documentation, simplifying onboarding for developers and easing cross-team **API** integration.
- Built mechanized **CI/CD** workflows using **Jenkins**, **GitHub Actions**, and **AWS CodePipeline**, accelerating deployment cycles by 35% and minimizing manual errors.
- Utilized **PyTest** and **R** for statistical validation and systematized testing in cloud setups, enhancing test coverage and early identification of defects.
- Adept at bridging software development, deployment, and ML operations to deliver end-to-end solutions efficiently.
